eFigure 1: Model calibration to key TB epidemiological data*.

A. Annual TB cases over the past 15 years (2003-2018), stratified by nativity.

B. Age distribution of TB cases over the past 15 years (2003-2018), stratified by nativity.

C. US-born IGRA-positive and Mtb infection prevalence in 2011-12, compared to NHANES estimates.

D. Non-US-born IGRA-positive and Mtb infection prevalence in 2011-12, compared to NHANES estimates.

*Panel A: Annual TB cases over the past 15 years (2003-2018), stratified by nativity. Panel B: Age distribution of TB cases over the past 15 years (2003-2018), stratified by nativity. Panel C: US-born IGRA-positive and Mtb infection prevalence in 2011-12, compared to NHANES estimates. Panel D: Non-US-born IGRA-positive and Mtb infection prevalence in 2011-12, compared to NHANES estimates.
