Abstract

Twenty-one species of acanthocephalans, representative of thirteen genera from ten families of seven orders and three classes, are included in this updated checklist of acanthocephalans in South Africa. Although South Africa appears to have a less diverse acanthocephalan fauna compared to some other countries such as Iran in Asia, or Brazil in South America, this is probably an artefact of fewer parasitological surveys.

Keywords

Acanthocephala, helminths, diversity, wildlife, Africa

Introduction

South Africa's landscape is the third most biologically diverse in the world with 6% of the world's mammal species, 8% of bird species and 5% of reptile species of which many are endemic (da Silva and Willows-Munro 2016). In regard to invertebrates, only 36,803 species are listed for Africa, and 12,098 for South Africa (Hamer 2010). It is said that in South African habitats, there are many undiscovered and undescribed animal species, especially invertebrates. It is estimated that as many as 80,000 South
African animal species remain to be discovered or described, and most of these animals are invertebrates (Hamer 2013).

The most comprehensive checklist of helminth parasites of Africa was compiled for freshwater fishes by Khalil (1971) and updated by Khalil and Polling (1997). It included very few records of acanthocephalans considering the total number of freshwater fish species present in the continent. The updated list (Khalil and Polling 1997) comprised 568 adult helminth parasites of which only 21 species are acanthocephalans. These records were compiled from 359 species of African freshwater fishes (assigned to 89 genera belonging to 32 families) of an estimated 3000 existing inland fish species (Khalil and Polling 1997). These examples illustrate the lack of knowledge of the helminth fauna of the wildlife of the African continent in general and in South Africa in particular.

This is the first checklist of acanthocephalans of South Africa and the aim is to provide a comprehensive record of all the previously reported species of Acanthocephala occurring in South African hosts as well as new records from our on-going research on parasites of wildlife, while simultaneously demonstrating the need for more extensive parasitological surveys.

**Materials and methods**

Data were obtained from two sources, published records and our own ongoing studies on the Acanthocephala of South African wildlife. These data are presented in two parts. In the first part parasites are listed systematically, with families, genera, and species in alphabetical order. The scientific name, including any synonyms, followed by the scientific and common name of the host, the locality in which the parasite was reported and museum (location) of type specimens where known. In the second part, the hosts are listed systematically by their scientific names and parasite records from each host are given together with locality and reference. The records without references are those of our ongoing study that are being reported here for the first time.

Classification of the Acanthocephala follows Amin (2013). For the hosts, fish taxonomy is based on Skelton (2001, 2016) and Fishbase (Froese and Pauly 2016), bird taxonomy is based on Clements et al. (2016) and mammal taxonomy on Wilson and Reader (2005) and Apps (2012).

Abbreviations for museums are:

| Abbreviation | Institution                           |
|--------------|---------------------------------------|
| BMNH         | Natural History Museum London, London, UK; |
| GNM          | Gothenburg Natural History Museum, Gothenburg, Sweden; |
| SAMCTA       | South African Museum at Cape Town, South Africa; |
| SAM          | South Australian Museum, Adelaide, Australia; |
| USNM Helm. Coll. | United States National Museum Helminthological Collection |
| USNPC        | United States National Parasite Collection now held in the Invertebrate Zoology collection of the Smithsonian Museum, Washington, USA. |
Acanthocephalan specimens from our ongoing wildlife parasitology projects were mostly collected from roadkill animals, museum collections, hunting/culling surveys and other research permits received for a limited number of specimens through the Limpopo Department of Economic Development, Environment and Tourism (LEDET) (permit number CPM004961 and ZA/LP/HO/3370 for freshwater fish research, 001-CPM403-00012 and ZA/LP/HO/3448 for frogs, ZA/LP/HO/3432 for rodents and ZA/LP/87586 for roadkills).

Acanthocephalans from freshly dead animals were placed in tap water and refrigerated for a few hours to one day until the proboscis was everted and then fixed and stored in 70% ethanol until studied. Acanthocephalans from frozen hosts were fixed and stored in 70% ethanol. Some specimens were prepared for examination by staining in Mayer’s acid carmine, destained in HCl in 70% ethanol, dehydrated through increasing concentrations of ethanol, cleared in xylene, and mounted as whole worms in Canada balsam. Other worms were examined as temporary mounts following clearing in lactophenol or beechwood creosote.

A total of 102 species of birds (151 individuals), 72 of mammals (420 individuals), 9 of reptiles (18 individuals) and 42 (1050 individuals) of fishes were examined for this study (details in Table 1).

Table 1. Total number of host taxa examined and those infected with acanthocephalans (i.e. number of taxa that harboured acanthocephalans, in parenthesis) during our ongoing study on wildlife parasites in South Africa.

| Taxon Group | Order | Family | Genus | Species |
|------------|-------|--------|-------|---------|
| Amphibians | 1 (0) | 8 (0)  | 13 (0) | 19 (0)  |
| Birds      | 21 (5) | 50 (5) | 87 (5) | 102 (5) |
| Fishes (freshwater) | 8 (1) | 13 (1) | 24 (1) | 42 (1)  |
| Mammals    | 10 (4) | 26 (4) | 59 (6) | 72 (6)  |
| Reptiles   | 3 (1)  | 6 (1)  | 7 (1)  | 9 (1)   |
| Totals     | 43 (11)| 103 (11)| 190 (13)| 244 (13)|

Parasite-Host List

Acanthocephala
Class: Archiacanthocephala Meyer, 1931
Order: Gigantorhynchida Southwell & Macfie, 1925
Family: Gigantorhynchidae Hamann, 1892
Genus: Mediorhynchus Van Cleave, 1916

Mediorhynchus africanus Amin, Evans, Heckmann & El-Naggar, 2013
Empodius segmentatus (de Marval, 1902) Southwell & Mac-Fie, 1925
Mediorhynchus selengensis Harris, 1973
M. gallinarum (Bhalerao, 1937) Van Cleave, 1947 sensu Junker & Boomker, 2006
Notes. *M. gallinarum* is found only in Asia and the species in Africa is actually *M. africanaus* (Amin et al. 2013; Amin 2013) and not *M. gallinarum* previously reported in South Africa (Junker and Boomker 2006).

**Host.** *Numida meleagris* (L. 1758) (Helmeted Guineafowl) (Numididae) (type host).

**Localities.** Kruger National Park, Mpumalanga Province, South Africa (type locality) (Junker and Boomker 2006); Vicinity of Petrus Steyn, Free State Province, South Africa (Davies et al. 2008); Musina, Limpopo Province, South Africa (Junker and Boomker 2007; Junker et al. 2008).

**Mediorhynchus mokgalongi** Smales & Halajian, 2018

**Host.** *Turdus smithi* Bonaparte, 1850 (Karoo Thrush) (Turdidae) (type host).

**Locality.** Polokwane, Limpopo Province, South Africa (type locality) (Smales et al. 2018).

**Type specimens.** Holotype male SAM AHC 48068, allotype female SAM AHC 48069, paratype SAM AHC 48070.

**Mediorhynchus numidae** (Baer, 1925) Meyer, 1932

*Heteroplus numidae* Baer, 1925; *Empodisma numidae* (Baer, 1925) Yamaguti, 1963

**Host.** *Numida meleagris* (L. 1758) (Helmeted Guineafowl) (Numididae)

**Locality.** Pretoria, Gauteng Province, South Africa (Oosthuizen and Markus 1967).

**Mediorhynchus taeniatus** (von Linstow, 1901) Dollfus, 1936

*Echinorhynchus taeniatus* von Linstow, 1901; *E. segmentatus* de Marval, 1902

**Host.** *Numida meleagris* (L. 1758) (Helmeted Guineafowl) (Numididae).

**Locality.** Rooipoort farm, Kimberley, Northern Cape Province, South Africa (Crowe 1977).

**Host.** *Tockus leucomelas* (Lichtenstein, 1842) (Southern Yellow-billed Hornbill) (Bucerotidae)

**Locality.** Limpopo Province, South Africa.
Order: Moniliformida Schmidt, 1972
Family: Moniliformidae Van Cleave, 1924
Genus: Moniliformis Travassos, 1915

Moniliformis kalahariensis Meyer, 1931

Host. Atelerix frontalis (Smith, 1831) (Southern African Hedgehog) (Erinaceidae)
   Locality. Mohlonong village and University of Limpopo, Limpopo Province, South Africa (Amin et al. 2014).

Moniliformis moniliformis (Bremser, 1811) Travassos, 1915 (type species)

Echinorhynchus moniliformis Bremser, 1811
E. grassi Railliet, 1893
E. canis Porter, 1914
E. belgicus Railliet, 1919
Moniliformis moniliformis aegypticus Meyer in Petrochenko, 1958
M. dubius Meyer, 1932
M. travassosi Meyer, 1932 (fide Machado Filho 1946, Van Cleave 1952)

Host. Atelerix frontalis (Smith, 1831) (Southern African Hedgehog) (Erinaceidae).
   Locality. Hammanskraal, Gauteng Province, South Africa (Le Roux 1930).
   Notes. Host recorded as Aethechinus frontalis in Le Roux (1930).

Moniliformis acomysi Ward & Nelson, 1967

Host. Gerbilliscus leucogaster (Peters, 1852) (Bushveld Gerbil), Mastomys natalensis
   (Smith, 1834) (Natal Mastomys), Mus minutoides (Pygmy mouse) (Muridae).
   Localities. Bloemhof, Free State Province; Vyeboom village, Limpopo Province; Hoopstad, Free State Province; South Africa.

Moniliformis sp.

Host. Otolemur crassicaudatus (É. Geoffroy Saint-Hilaire, 1812) (Thick-tailed Bushbaby) (Galagidae).
   Locality. Venda, Limpopo Province, South Africa.
   Remarks. One male and one female worm were found in the small intestine of an adult bushbaby.
Order: Oligacanthorhynchida Petrochenko, 1956  
Family: Oligacanthorhynchidae Southwell & Macfie, 1925  
Genus: Heptamegacanthus Spencer Jones, 1990  

**Heptamegacanthus niekerki** Spencer Jones, 1990 (type species)

**Host.** Chrysospalax trevelyani (Günther, 1875) (Giant Golden Mole) (Chrysochloridae) (type host).  
**Locality.** Nqadu Forest, Transkei, Eastern Cape Province, South Africa (type locality) (Spencer Jones 1990).  
**Type specimens.** Holotype male BMNH 1988.2480; allotype female BMNH 1988.2481; paratypes BMNH 1988.2482-2491.

**Oligacanthorhynchidae sp.**

**Host.** Varanus albigularis Daudin, 1802 (Rock Monitor) (Varanidae).  
**Localities.** Tzaneen; Tolwe, Limpopo Province, South Africa.

Class: Eoacanthocephala Van Cleave, 1936  
Order: Gyracanthocephala Van Cleave, 1936  
Family: Quadrigyridae Van Cleave, 1920  
Genus: Acanthogyrus Thapar, 1927  
Subgenus: Acanthosentis Verma & Datta, 1929

**Acanthogyrus (Acanthosentis) phillipi** (Mashego, 1988) Amin, 2005

**Acanthosentis phillipi** Mashego, 1988

**Host.** Enteromius neefi (Greenwood, 1962) (syn. Barbus neefi) (Sidespot Barb) (Cyprinidae) (type host).  
**Locality.** Lingwe River, Venda, Limpopo Province, South Africa (type locality) (Mashego 1988).  
**Type specimens.** Holotype in Transvaal Museum no. TM14659; Paratypes TM5 at University of Limpopo, Zoology, 5.

**Acanthogyrus sp.**

**Host.** Oreochromis mossambicus (Peters, 1852) (Mozambique Tilapia) (Cichlidae).  
**Locality.** Molepo Dam, Limpopo Province, South Africa (Kunutu et al. 2013).
Order: Neoechinorhynchida Southwell & Macfie, 1925
Family: Neoechinorhynchidae (Ward, 1917) Van Cleave, 1928
Genus: *Neoechinorhynchus* Stiles & Hassall, 1905
Subgenus: *Neoechinorhynchus* Hamann, 1892

*Neoechinorhynchus* (*Neoechinorhynchus*) *dorsovaginatus* Amin & Christison, 2005

**Host.** *Argyrosomus japonicus* (Temminck & Schlegel, 1843) (Japanese Meagre, Dusky Kob) Sciaenidae) (type host).

**Locality.** Breede River Estuary, Western Cape Province, South Africa (type locality) (Amin and Christison 2005).

**Type specimens.** No. SAMCTA29536 (holotype male and allotype female; same slide), nos SAMCTA29537-29545 (paratypes), USNPC no. 94918 (paratypes).

Class: Palaeacanthocephala Meyer, 1931
Order: Echinorhynchida Southwell & Macfie, 1925
Family: Pomphorhynchidae Yamaguti, 1939
Genus: *Longicollum* Yamaguti, 1935

*Longicollum chabanaudi* Dollfus & Golvan, 1963

**Host.** *Barnardichthys fulvomarginata* (Gilchrist, 1904) (syn. *B. fulvomarginatus*) (Soleidae) (Sole).

**Locality.** False Bay, Western Cape Province, South Africa (Dollfus and Golvan 1963).

*Longicollum* sp. innom.

**Host.** *Pegusa nasuta* (Pallas, 1814) (syn. *Solea bleekeri*) (Blackhand Sole) (Soleidae).

**Locality.** Klein River estuary, Hermanus, Western Cape Province, South Africa (Bray 1974).

**Remarks.** Three contracted and immature specimens were found in one fish and one male in another fish. Thus it could not be identified to species level (Bray 1974).

Family: Rhadinorhynchidae Lühe, 1912
Genus: *Rhadinorhynchus* Lühe, 1911

*Rhadinorhynchus cadenati* (Golvan & Houin, 1964) Golvan, 1969

*Nipporhynchus cadenati* Golvan & Houin, 1964
Host. *Thyrsites atun* (Euphrasen, 1791) (Snoek) (Gempylidae).
Locality. South Africa’s West and South coasts (Nunkoo et al. 2016).

*Rhadinorhynchus capensis* Bray, 1974

Host. *Pegusa nasuta* (Pallas, 1814) (syn. *Solea bleekerii*) (Blackhand Sole) (Soleidae) (type host)
Locality. Heuninges River estuary, near Cape Agulhas, Western Cape Province, South Africa (type locality) (Bray 1974).
Type specimens. British Museum, Registration number 1974.521-550.

*Rhadinorhynchus* sp.

Host. *Ruvettus pretiosus* Cocco, 1833 (Oilfish) (Gempylidae).
Locality. South Africa’s West coast, Atlantic Ocean (Nunkoo et al. 2017).

Order: Polymorphida Petrochenko, 1956
Family: Centrorhynchidae Van Cleave, 1916 (Golvan, 1960)
Genus: *Centrorhynchus* Lühe, 1911

*Centrorhynchus sarebae* Smales & Halajian, 2017

Host. *Kaupifalco monogrammicus* (Temminck, 1824) (Lizard Buzzard) (Accipitridae) (type host).
Locality. Makhado (Louis Trichardt), Limpopo Province, South Africa (type locality) (Smales et al. 2017).
Type Specimens. Holotype male SAM AHC 47858; allotype female SAM AHC 47859; paratypes SAM AHC 47860.

*Centrorhynchus clitorideus* (Meyer, 1931) Golvan, 1958

*Gordiorhynchus clitorideus* Meyer, 1931 (*nec clitorideum*)

Host. *Bubo africanus* (Temminck, 1821) (Spotted Eagle Owl) (Strigidae).
Locality. Zandrivierspoort Farm, Polokwane, Limpopo Province, South Africa.
**Centrorhynchus sp.**

**Host.** *Felis catus* L., 1758 (Domestic Cat) (Felidae).  
**Locality.** Pretoria, Gauteng Province, South Africa (Baker et al. 1989).

**Centrorhynchus sp.**

**Host.** *Mungos mungo* (Gmelin, 1788) (Banded Mongoose) (Herpestidae).  
**Locality.** Polokwane, Limpopo Province, South Africa.

**Family: Plagiorhynchidae Golvan, 1960**  
**Genus: Plagiorhynchus Lühe, 1911**  
**Subgenus: Prosthorhynchus Kostylew, 1915**

*Plagiorhynchus (Prosthorhynchus) cylindraceus* (Goeze, 1782) Schmidt & Kuntz, 1966

*Echinorhynchus cylindraceus* Goeze, 1782  
*E. pici* Gmelin, 1791 *fide* Florescu and Ienistea 1984  
*E. merulae* Gmelin, 1791 *fide* Florescu and Ienistea 1984  
*E. transversus* (Rudolph, 1819) Travassos 1926  
*E. obliquus* Dujardin, 1845 *fide* Florescu and Ienistea 1984  
*Centrorhynchus cylindraceus* (Goeze 1782) Kostylew, 1914  
*C. fasciatus* (Westrumb, 1821) Travassos, 1926 *fide* de Marval 1905  
*C. rostratus* de Marval, 1902 *fide* Florescu and Ienistea 1984  
*Prosthorhynchus rosai* (Porta, 1910) Meyer, 1932  
*Prosthorhynchus rostratus* (de Marval, 1902) Meyer, 1932  
*Plagiorhynchus formosus* Van Cleave, 1918 *fide* Amin et al. 1999  
*Plagiorhynchus taiwanensis* Schmidt et Kuntz, 1966 *fide* Amin et al. 1999.

**Host.** *Calidris ferruginea* (Pontoppidan, 1763) (Curlew Sandpiper); *Charadrius pecuarius* Temminck, 1823 (Kittlitz’s Plover); *Charadrius tricollaris* Vieillot, 1818 (Three-banded Plover) (Charadriidae).  
**Locality.** Berg River, Western Cape Province, South Africa (Amin et al. 1999).  
**Host.** *Crex egregia* (Peters, 1854) (syn. *Crex egregia*) (African Crake) (Rallidae).  
**Locality.** Blouberg, Limpopo Province, South Africa.  
**Host.** *Vanellus armatus* (Burchell, 1822) (Blacksmith Lapwing) (Charadriidae).  
**Locality.** Berg River, Western Cape Province, South Africa (Amin et al. 1999).
Unidentified plagiorhynchid

**Host.** Charadrius marginatus Vieillot, 1818 (White-fronted Plover), Charadrius pal-lidus Strickland, 1852 (Chestnut-banded Plover); Charadrius pecuarius Temminck, 1823 (Kittlitz’s Plover); Himantopus himantopus (L., 1758) (Black-winged Stilt); Vanellus armatus (Burchell, 1822) (Blacksmith Lapwing)

**Locality.** Berg River, Western Cape Province, South Africa (Amin et al. 1999).

**Family: Polymorphidae Meyer, 1931**
**Genus: Andracantha Schmidt, 1975**

*Andracantha tunitae* (Weiss, 1914) Zdzitowiecki, 1989

*Corynosoma tunitae* Weiss, 1914

**Host.** Microcarbo africanus (Gmelin, 1789) (Long-tailed Cormorant) (Phalacrocoracidae).

**Locality.** Dyer Island, South Africa (Van Cleave 1937).

**Notes.** Van Cleave (1937) is mentioning that he looked at a large number of immature worms and he tentatively assigning them to *C. tunitae*.

**Genus: Arhythmorhynchus Lühe, 1911**

*Skrjabinorhynchus* Petrochenko, 1956

*Arhythmorhynchus turbidus* (Van Cleave, 1937) Golvan, 1994

*Corynosoma turbidum* Van Cleave, 1937

**Host.** Phalacrocorax neglectus (Wahlberg, 1855) (Bank Cormorant) (Phalacrocoracidae) (type host).

**Locality.** Dyer Island, South Africa (type locality) (Van Cleave 1937).

**Type specimens.** Holotype female (1737, 3) and one paratype female (1737, 1) in GNM. One paratype female (1737, 2) in the collection of H.J. Van Cleave, Urbana, Illinois, U.S.A.
Genus: Bolbosoma Porta, 1908

Bolbosoma capitatum (von Linstow, 1880) Porta, 1908

Echinorhynchus capitatum von Linstow, 1880
Bolbosoma physeteris Gubanov, 1952 (fide Amin & Margolis, 1998)

Host. Ruvettus pretiosus Cocco, 1833 (Oilfish) (Gempylidae).
   Locality. South Africa’s West coast, Atlantic Ocean (Nunkoo et al. 2017).

Bolbosoma vasculosum (Rudolphi, 1819) Porta, 1908

Echinorhynchus vasculosum Rudolphi, 1819
Bolbosoma annulatus Molin, 1858
B. aurantiacus Risso, 1826
B. pellucidus Leukart, 1828
B. serrani Linton, 1888
B. thunni Harada, 1935 (fide Petrochenko 1958)

Host. Thyrsites atun (Euphrasen, 1791) (Snoek) (Gempylidae).
   Locality. South Africa’s West and South coasts (Nunkoo et al. 2016).

Genus: Corynosoma Lühe, 1904 (fide Van Cleave, 1945)

Chentrosoma Monticelli, 1905
Centrosoma Lühe, 1912
Coryusoma Railliet & Henry, 1907 (misprint)
Echinosoma Porta, 1907

Corynosoma australe Johnston, 1937

Corynosoma otariae Morini & Boero, 1961

Host. Thyrsites atun (Euphrasen, 1791) (Snoek) (Gempylidae).
   Locality. South Africa’s West and South coasts (Nunkoo et al. 2016).
### Host-Parasite List

| Host | Parasite | Locality Country/ Reference |
|------|----------|-----------------------------|
| **Class Aves** | | |
| **Order Accipitriformes** | | |
| **Family Accipitridae** | | |
| *Kaupifalco monogrammicus* (type host) | *Centrorhynchus sarehae* (Centrorhynchidae) | Makhado (Louis Trichardt), Limpopo Province, South Africa |
| **Order Bucerotiformes** | | |
| **Family Bucerotidae** | | |
| *Tockus leucomelas* | *Mediorhynchus tauriatus* (Gigantorhynchidae) | Limpopo Province, South Africa |
| **Order Charadriiformes** | | |
| **Family Charadriidae** | | |
| *Charadrius ferruginea* | *Plagiorhynchus* (*Prosthorhynchus*) *cylindraceus* (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| *Charadrius marginatus* | Unidentified plagiorhynchid acanthocephalan (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| *Charadrius pallidus* | Unidentified plagiorhynchid acanthocephalan (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| *Charadrius pecuarius* | *Plagiorhynchus* (*Prosthorhynchus*) *cylindraceus* (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| *Charadrius tricolor* | Unidentified plagiorhynchid acanthocephalan (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| *Vanellus armatus* | *Plagiorhynchus* (*Prosthorhynchus*) *cylindraceus* (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| **Family Recurvirostridae** | | |
| *Himantopus himantopus* | Unidentified plagiorhynchid acanthocephalan (Plagiorhynchidae) | Berg River, Western Cape Province, South Africa (Amin et al. 1999) |
| **Order Galliformes** | | |
| **Family Numididae** | | |
| *Numida meleagris* (type host) | *Mediorhynchus africanus* (previously identified as *Mediorhynchus gallinarum*) (Gigantorhynchidae) | Kruger National Park, Mpumalanga Province, South Africa (Junker and Boomker 2006); Vicinity of Petrus Steyn, Free State Province, South Africa (Davies et al. 2008); Musina, Limpopo Province, South Africa (Junker and Boomker 2007; Junker et al. 2008) |
| *Mediorhynchus numidae* (Gigantorhynchidae) | Pretoria, Gauteng Province, South Africa (Oosthuizen and Markus 1967) |
| *Mediorhynchus taeiatus* (Gigantorhynchidae) | Rooipoort farm, Kimberley, Northern Cape Province, South Africa (Crowe 1977) |
| **Order Gruiformes** | | |
| **Family Rallidae** | | |
| *Crecopsis egregia* | *Plagiorhynchus* (*Prosthorhynchus*) *cylindraceus* (Plagiorhynchidae) | Blouberg, Limpopo Province, South Africa |
| **Order Passeriformes** | | |
| **Family Turdidae** | | |
| *Turdus smithi* (type host) | *Mediorhynchus mop뭇longi* (Gigantorhynchidae) | Polokwane, Limpopo Province, South Africa (type locality) (Smales et al. 2018) |
| Host                        | Parasite                          | Locality Country/ Reference                                      |
|-----------------------------|-----------------------------------|-----------------------------------------------------------------|
| **Order Strigiformes**      |                                   |                                                                 |

**Results and discussion**

A total of twenty-one species of acanthocephalans, from thirteen genera from ten families of seven orders, comprise this updated checklist of acanthocephalans in South Africa. Representatives of three of the four classes of acanthocephalans (Amin 2013) have been reported in South Africa, with only the Polycanthoncephala Amin, 1987 not having been recorded yet. The composition of reported acanthocephalan fauna shows that the Polymorphidae is the most represented family with five named species parasitic in marine fish and wild birds.

In South Africa, birds have the highest species richness of acanthocephalans to this date with nine named species (from five genera) and five records only identified to group level, followed by fish with eight named species (from six genera) and two species only identified to genus level, mammals with four named species (from two genera) and three species only identified to genus level and finally reptiles with a single species only identified to group level. No acanthocephalans have been reported in amphibians to date. During the current study 110 frog specimens belonging to 19 species were examined but none harboured any acanthocephalans. However, this forms a small part of the entire amphibian fauna of the country which includes 128 described frog species (Frost 2018).
Only a small fraction of the vertebrate fauna of South Africa has been surveyed for acanthocephalans and we expect that in future additional acanthocephalan species will be discovered and described. For example it is estimated that many of South Africa’s marine fish parasites have yet to be discovered (Smit and Hadfield 2015). South Africa has an extremely rich biodiversity (Huntley et al. 2005), with nearly 8% of the world’s known species of birds, 6% of mammal species and 5% of reptile species (Driver et al. 2012). Therefore we might expect a more diverse acanthocephalan fauna compared to that of Brazil which has 23 genera and 34 species (from only 119 fish species) (Santos et al. 2008) or Iran with 30 described species (Tavakol et al. 2015). The lower species richness reported for South Africa probably reflects sampling effort rather than the true diversity of the acanthocephalan fauna. Until more data are available it will not be possible to determine the true species richness of the South African acanthocephalan assemblage.

Acknowledgements

We would like to thank all the scientists who assisted us to access literature, particularly Geoffrey Allan Boxshall and David Gibson, and all those who helped AH with roadkill animals, especially Kgethedi Michael Rampedi and K David Kunutu. Special thanks are due to Ms Lorna Modiba (Librarian, University of Limpopo). Thanks also to Paul Skelton for his advice on fish species name changes. This work is based on the research supported by the South African Research Chairs Initiative of the Department of Science and Technology and National Research Foundation (NRF) of South Africa (Grant No 101054). Any opinion, finding and conclusion or recommendation expressed in this material is that of the author(s) and the NRF does not accept any liability in this regard.
