Table S4. Pairwise fixation indexes (D_{EST} and F_{ST}) with lower and upper 95% confidence intervals (CI), between sampling areas of the Eastern Tropical Pacific. Significant values $\alpha = 0.05$, are presented in bold.

|         | mean  | Lower 95% CI | Upper 95% CI |
|---------|-------|--------------|--------------|
| **D_{EST}** |       |              |              |
| GUA vs. OJO | 0.0254 | 0.0046       | 0.0554       |
| GUA vs. PAN  | 0.0734 | 0.0434       | 0.1096       |
| GUA vs. ICO  | 0.0415 | 0.0102       | 0.0895       |
| OJO vs. PAN  | 0.029  | 0.0093       | 0.0531       |
| OJO vs. ICO  | 0.007  | -0.0181      | 0.0466       |
| PAN vs. ICO  | 0.003  | -0.0206      | 0.0431       |
| **F_{ST}**  |       |              |              |
| GUA vs. OJO | 0.0587 | 0.0417       | 0.0772       |
| GUA vs. PAN  | 0.0807 | 0.0624       | 0.1003       |
| GUA vs. ICO  | 0.0801 | 0.0584       | 0.1047       |
| OJO vs. PAN  | 0.0185 | 0.0089       | 0.0296       |
| OJO vs. ICO  | 0.0093 | -0.0053      | 0.0292       |
| PAN vs. ICO  | 0.0064 | -0.0093      | 0.0283       |
