### Table 1. Retirement Community Cohort

| Category                                         | N   | (%)  |
|--------------------------------------------------|-----|------|
| **Living Setting**                               |     |      |
| Nursing Home                                     | 5   | (33%)|
| Assisted Living Facility                         | 10  | (67%)|
| **Prior COVID-19 infection**                     | 3   | (20%)|
| **Sex, Female**                                  | 12  | (80%)|
| **Race, White (non-Hispanic)**                   | 15  | (100%)|
| **Age, median (min, max)**                       | 90  | (62 – 101) |
| **Clinical Frailty Scale (CFS)**                 |     |      |
| Mild Frailty                                     | 3   | (20%)|
| Moderate Frailty                                 | 7   | (47%)|
| Severe Frailty                                   | 5   | (33%)|
| **Sample Collections**                           |     |      |
| Baseline Dose 1                                  | 9   | (60%)|
| Dose 2 (28 days)                                 | 15  | (100%)|
| 2 weeks p. Dose 2                                | 14  | (93%)|
| 3 months p. Dose 2                               | 13  | (87%)|
| 6 months p. Dose 2                               | 14  | (93%)|
| 2 weeks p. Boost                                 | 8   | (53%)|
