Multimedia Appendix 5: Figure showing data used for the ITT analysis of COP data

Figure S5. Postural balance parameters for the assessment visits T2 and T3. Data as included in the intention-to-treat analysis (control: n = 14, intervention n = 13) is displayed. Red triangles and solid lines show data of participants in the intervention group. Blue points and dashed lines show data of participants in the control group. Circled values represent imputed data.
