## CONTENTS

A Polarization Reconfigurable Cylindrical Dielectric Resonator Antenna  
Lei Zhong .......................................................... 1

Design of a Dual-Band Antenna System for LTE-M and LTE-MIMO by Exploiting the Characteristic Mode Theory  
Kadidiatou Diallo, Aliou Diallo, Ibra Dioum, Samuel Ouya, and Jean M. Ribero ............... 11

Low Sidelobe Cosecant-Squared Pattern Synthesis for Large Planar Array Using Genetic Algorithm  
Tarek Sallam and Ahmed M. Attiya ........................................... 23

Maxwell’s Derivation of the Lorentz Force from Faraday’s Law  
Arthur D. Yaghjian ......................................................... 35

Bi-Anisotropic Particles and Chiral Inclusions for Highly-Efficient Electromagnetic Energy Harvesting  
Hemn Younesiraad and Mohammad Bemani ........................................... 67

Design and Analysis of Compact Periodic Slot Multiband Antenna with Defected Ground Structure for Wireless Applications  
Bondili S. Hari Prasad and Mokkapat V. S. Prasad ........................................... 77

Yagi-Uda Combined Radiating Structures of Centimeter and Millimeter Wave Band  
Sergey L. Berdnik, Victor A. Katrich, Mikhail V. Nesterenko, Yuriy M. Penkin  
and Oleksandr M. Dumin ..................................................... 89

Design of a Beam Switchtable Superdirective Dipole for IoT Gateway  
Sana Souai, Aliou Diallo, Jean Marc Ribero, and Taouifik Aguili ................................. 99

Perturbative Approach for Fast and Accurate Evaluation of Quasi Axially-Symmetric Cavity Resonance Frequency in Drift Tube Linacs  
Giorgio S. Mauro, Santi C. Pavone, Giuseppe Torrisi, Antonio Palmieri, Luigi Celona  
and Gino Sorbello .............................................................. 109

The Upper Bound of the Speed of Propagation of Waves along a Transmission Line  
Vernon Cooray, Gerald Cooray, Farhad Rachidi, and Marcos Rubinstein ....................... 119

Fast Direction-Finding Algorithm by Partial Spatial Smoothing in Sparse MIMO Radar  
Sheng Liu, Feng Qin, Jing Zhao, Weizhi Xiong, and Ziqing Yuan ................................. 127
Contribution to the Experimental Characterization of the Electromagnetic Properties of HTS
Yazid Statra, Hocine Menana, and Bruno Douine .................................................. 137

A New Speed Multiplier Coaxial Magnetic Gear
Mohd Firdaus Mohd Ab Halim, Erwan Sulaiman, Raja Nor Firdaus Kashfi Raja Othman
and Azhan Ab. Rahman ......................................................................................... 145

Design and Analysis of a Microstrip Planar UWB Bandpass Filter with Triple Notch
Bands for WiMAX, WLAN, and X-Band Satellite Communication Systems
Abdul Basit, Muhammad I. Khattak, and Mu’ath Al-Hasan ..................................... 155

Design of a Directional Antenna Based on a Resonance Based Reflector and Its
Applications on Bio-Electromagnetics
Xiao-Feng Li, Yan-Ru Hua, Bao-Jian Wen, Lin Peng, and Xing Jiang ...................... 165

GPR Data Regression and Clustering by the Fuzzy Support Vector Machine and
Regression
Shahram Hosseinzadeh and Mehdi Shaghaghi ......................................................... 175

Study of Frequency Characteristics for Three-Coil Wireless Power Transfer System with
Different Positions
Xueyi Zhang, Yang Yuan, and Zhongqi Li ................................................................. 185

Research on Active Disturbance Rejection Control of Hybrid Excitation Magnetic
Suspension Switched Reluctance Motor Considering Noise
Yonghong Huang, Libin Yan, Fan Yang, and Wenjun Zeng ..................................... 197
