## ONLINE RESOURCE 1

**Supplemental Table.** Change in Awake Cough Frequency From Baseline to Weeks 4 and 12 by PGIC Category

| PGIC Category | Change in awake cough frequency, Week 4 | Change in awake cough frequency, Week 12 |
|---------------|----------------------------------------|-----------------------------------------|
|               | n | Mean (SD) change, coughs/h | Percentage change | n | Mean (SD) change, coughs/h | Percentage change |
| PGIC 1 and 2  | 83 | -22.8 (23.5) | -57.8% | 107 | -18.4 (36.3) | -54.2% |
| PGIC 3        | 76 | -13.5 (31.1) | -27.9% | 53  | -12.8 (35.1) | -27.2% |
| PGIC 4        | 59 | -6.9 (25.0)  | -8.1%  | 48  | -6.4 (34.2)  | -2.5%  |
| PGIC 5<sup>a</sup> | 5 | -1.6 (15.9) | -1.9% | 12 | 5.3 (11.9) | 23.8% |
| PGIC 6 and 7  | 4 | 6.7 (5.1)   | 26.4%  | —  | — | — |

PGIC, patient global impression of change. <sup>a</sup>PGIC ≥5 for change in awake cough frequency at Week 12.
