Supplemental Figure 1

**Fig S1**: a Full blot of cropped image presented in Fig 1a, b Fig 1b, and c Fig 1c of the manuscript.
Supplemental Figure 2

Fig S2: Full blot of cropped image presented in Fig 2a of the manuscript.
**Fig S3**: Negative controls for the Proximity Ligation Assay. Endogenous GFP is shown in green, the PLA signal is shown in red and DAPI is shown in gray.
Fig S4: a Full blot of cropped image presented in Fig 3a and b Fig 3b of the manuscript.
**Supplemental Figure 5**

**Fig S5:** Full blot of cropped image presented in Fig 4b of the manuscript.
**Supplemental Figure 6**

**Fig S6:** Immunoblot analysis of c-Kit, activated ERK1/2 and activated AKT in naïve and virally transduced cardiomyocytes with quantification shown below. Error bars represent SEM, *p<0.05, **p<0.01 and ***p<0.001 as measured by two-way ANOVA, multiple comparison with Tukey.
Fig S7: Immunoblot analysis of activated ERK1/2 and activated AKT in NTg and PIM1 overexpressing cardiomyocytes in response to oxidative stress in presence and absence of Imatinib. Quantification is shown below. Error bars represent SEM, **p<0.01 as measured by two-way ANOVA, multiple comparison with Tukey.
