would throw some light on "The Origin of Species;" for although, so far as my knowledge goes, eggs laid by a female which had copulated with a male of different species have never been fruitful, it by no means follows that this is universally the case; and although with animals in a state of domestication, hybrids are not prolific, in a state of nature the case may be different. But this is beside my present purpose.—W. V. Andrews.

A Variety of Pieris Rapae Unknown in Europe.—Probably not a few of your readers who interest themselves in butterflies have noticed among the swarms of Ganoris rape occasional specimens differing remarkably from the normal forms in the colour of both surfaces of the wings; these, if we except the dusky markings, are of a sulphur yellow, approaching in depth of colour the wings of Eurema Lisa. I have had New England specimens for three years, and since my stay in this country have been endeavouring, most unsuccessfully, to find out the European name of the variety, and with good reason, for to-day having had the pleasure of a call from Mr. H. T. Stainton, of London, I set these specimens before him, and he assured me that they have nothing of the kind on this continent!

Here then we have developed a new variety of an artificially introduced species within a very short time after its appearance in America. It would be well if Mr. Bowles of Quebec, or some one in Montreal, could tell us the year in which this yellow form first appeared. Two of my specimens were taken in June and July, 1869—one by Mr. Merrill, in Shelbourne, N. H., the other by Prof. Hamlin, in Waterville, Me., and all are males. Are they confined to that sex, and the product of the later broods only? I propose to sell the variety novangiae.—SAMUEL H. SCUDDER, Menton, France, March 6, 1872.

ADVERTISEMENTS.

Exotic Lepidoptera and Coleoptera.—I have a large collection of specimens of Lepidoptera and Coleoptera from Australia, Manilla, Mexico and Central America, which I am now arranging for the purpose of sale, as I intend confining myself to Californian insects for the future. I have also a complete set of the Pacific Railroad Survey Reports (13 volumes), in excellent condition, which I shall be glad to dispose of. Apply to JAMES BEHRENS, San Francisco, Cal.
THE CANADIAN ENTOMOLOGIST.

Collecting Tour in Labrador.—When I penned the notice of my proposed tour to Labrador, I had no idea that there would be so much demand for Entomological material from this Northern quarter. But since the notice has appeared, letters have been received from Mr. P. S. Sprague, Boston Natural History Society; Mr. Samuel Henshaw, Boston; Mr. Geo. D. Smith, Boston, for Coleoptera; and Dr. Theodore L. Mead, New York; Mr. Herman Strecker, Reading, Pa.; Mr. G. M. Levette, Assist. Geol. Survey, Indianapolis, for Lepidoptera; and having neglected to give my full address, possibly other letters may have gone astray. I want only 12 subscribers for Lepidoptera, and the terms are settled by correspondence. I am anxious to put the Coleoptera into the hands of one person, or an institution, who could work and determine the material, in order to put the matter in some form for future reference. I will supply notes with every species collected.—Wm. Couper, 38 Bonaventure St., Montreal.

Platysamia Columbia.—I will give in exchange for a good example of this moth one hundred specimens of Lepidoptera of various genera from California, Southern and Atlantic United States, S. America, Europe, East Indian Archipelago, &c., or double the number for two examples; or, if it is preferable, I will pay in money. Herman Strecker, Box 111, Reading P. O., Berks Cy., Pa. U. S.

Cork.—We have a good supply of sheet cork of the ordinary thickness, price 16 cents (gold) per square foot.

Canadian Entomologist, Vols. 1, 2 and 3.—We have a few copies left of Vols. 1 and 2, No. 1, of Vol. 1, being, however, out of print. Price $1.25 for Vols. 1 and 2; $1 Vol. 3.

List of Canadian Coleoptera.—Price 15 cents each, embracing 55 families, 432 genera, and 1231 species. (For labelling cabinets).

Printed Numbers, in sheets, 1 to 2000, for labelling cabinets. Price 10 cents each set.

These prices are exclusive of cost of transportation, and orders will please state whether the package is to be sent by mail or express.

AGENTS FOR THE ENTOMOLOGIST.

Canada.—E. B. Reed, London, Ont.; W. Couper, Naturalist, Montreal, P.Q.; G. J. Bowles, Quebec, P.Q.; J. Johnston, Canadian Institute, Toronto, Ont.

United States.—The American Naturalist’s Book Agency, Salem, Mass.; J. Y. Green, Newport, Vt.; W. V. Andrews, Room 17, No. 137 Broadway, New York.
