9,815 participants ≥ 20 years old

Step 1:
Crude (8,440)

Step 2:
Stratification by History of Mental Disorder (MD) (8,440) used in Fig. 1 and Table 1

Step 3:
Stratification by age and sex (8,024)

Step 4:
Stratification by age, sex, and cohabiting family (7,825) used in Fig. 2A

Step 5:
Stratification by age, sex, cohabiting family, social isolation, and bereavement (7,143) used in Fig. 2B and Table 2

Participants with Social Isolation Negative LSNS-6 score ≥ 12

| Bereavement     | Working, Male, Cohabitating | Working, Male, Alone | Retired, Male, Cohabitating | Retired, Male, Alone |
|-----------------|----------------------------|----------------------|-----------------------------|----------------------|
| Negative        | 428 #010000                | 27 #010100           | 535 #000000                 | 29 #000100           |
| Positive        | 308 #010001                | 15 #010101           | 435 #000001                 | 31 #000101           |

Participants with Social Isolation Positive LSNS-6 score <12

| Bereavement     | Working, Male, Cohabitating | Working, Male, Alone | Retired, Male, Cohabitating | Retired, Male, Alone |
|-----------------|----------------------------|----------------------|-----------------------------|----------------------|
| Negative        | 199 #010010                | 31 #010110           | 182 #000100                 | 14 #000110           |
| Positive        | 90 #010011                 | 14 #010111           | 90 #000011                  | 4 #000111            |

Participants with Social Isolation Negative LSNS-6 score <12

| Bereavement     | Working, Female, Cohabitating | Working, Female, Alone | Retired, Female, Cohabitating | Retired, Female, Alone |
|-----------------|-------------------------------|------------------------|-------------------------------|------------------------|
| Negative        | 461 #011010                  | 31 #011110             | 175 #001010                  | 29 #001110             |
