S2 Table. MALDI-TOF identification of presumptive isolates obtained from hospital wastewater.

| Family             | Genus          | Species       | Number identified |
|--------------------|----------------|---------------|-------------------|
| Moraxellaceae      | Acinetobacter  | johnsonii     | 4                 |
| Enterobacteriaceae | Citrobacter    | freundii      | 3                 |
|                    | Enterobacter    | amnigenus     | 1                 |
|                    | Enterobacter    | asburiae      | 2                 |
|                    | Enterobacter    | hormaechei    | 1                 |
|                    | Enterobacter    | kobei         | 1                 |
|                    | Escherichia     | coli          | 3                 |
|                    | Klebsiella      | oxytoca       | 11                |
|                    | Klebsiella      | pneumoniae    | 9                 |
|                    | Serratia        | marcescens    | 3                 |
|                    | Raoultella      | ornithinolytica | 1               |
|                    |                |               | 35                |
| Not reliable       |                |               | 5                 |
| GRAND TOTAL        |                |               | 44                |
