Supplementary Figure 1: Patient selection
Supplementary Figure 2: Adjusted hazard ratio for graft loss: year kidney transplant performed

P=0.82

Year of kidney transplant was transformed to (year of transplant)^2.
Supplementary Figure 3: Adjusted hazard ratio for graft loss: time on dialysis prior to kidney transplant

P=0.08

Time on dialysis prior to kidney transplant was transformed to (time on dialysis)^3.
Supplementary Figure 4: Adjusted hazard ratio: time from kidney transplant to AKI admission

P=0.19

Time from kidney transplant to AKI admission was transformed to \((1/\sqrt{\text{time since kidney transplant}})\).
