Supplementary Table 1. The binding constants of paclitaxel for MTs (35°C).

| Compound          | Binding constants of paclitaxel |
|-------------------|---------------------------------|
| /                 | 0.52±0.05 M⁻¹                  |
| + EM-E-11 4 10μM  | 1.59±0.07 M⁻¹                  |

Data are presented as mean ± SD from three independent experiments.
