S4 Table 4. SVA titration results for each triplicate at each time/dose. Dose was calculated as a UV-fluence received per unit of time. These data were used for GInaFiT analysis.

| DOSE (J/L) | TIME (min) | Log10/mL |
|------------|------------|----------|
| 0          | 0.00       | 4.68     |
| 0          | 0.00       | 4.50     |
| 0          | 0.00       | 4.86     |
| 750        | 4.01       | 4.15     |
| 750        | 4.01       | 4.05     |
| 750        | 4.01       | 4.15     |
| 1500       | 7.52       | 3.02     |
| 1500       | 7.52       | 2.92     |
| 1500       | 7.52       | 3.02     |
| 3000       | 15.25      | 0.93     |
| 3000       | 15.25      | 1.05     |
| 3000       | 15.25      | 0.85     |
| 6000       | 30.09      | -1.69    |
| 6000       | 30.09      | -1.69    |
| 9000       | 44.14      | -1.69    |
| 9000       | 44.14      | -1.69    |
| 9000       | 44.14      | -1.69    |
