Abstract. During the current covid 19 pandemic, fourth grade students of SDN Sumbermulyo 02 Winong District Pati Regency are learning online. Initially during the covid 19 pandemic, grade IV SDN Sumbermulyo 02 Winong District Pati Regency students had a little difficulty learning social studies online. Because the fourth grade students of SDN Sumbermulyo 02 Winong District Pati Regency before covid 19 were used to learning face-to-face (outside the network). Based on these problems, researchers conducted research on the use of internet media in social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic. This study aims to describe the use of internet media in social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic. Therefore, the method used is a qualitative method with data collection techniques of observation, interviews, and documentation. Based on data and analysis, there are two kinds of impact of internet media in social studies learning for class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic, namely positive and negative. The positive impact of internet media for social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency for the covid 19 pandemic is that children quickly find out information about social studies and children can quickly complete assignments. Then, the impact of internet media on social studies learning for fourth grade students of SDN Sumbermulyo Winong District Pati Regency in the covid 19 pandemic. Currently, students’ eye health is reduced because they often stare at the screen of a smartphone or tab or notebook or laptop or computer when looking for information about social science. Social studies learning using internet media for class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic became effective and efficient.

1. Introduction
To produce quality learning, good management is needed and can support the achievement of educational goals. Good management determines the good of learning, teachers should be able to use the right methods, provide sufficient learning tools, and create a pleasant classroom atmosphere during the learning process [5]. Optional learning conditions can occur if teachers are able to organize students and teaching facilities and control them in a pleasant atmosphere to achieve teaching goals [3]. Classroom management is a teacher’s skill to create and maintain optimal learning conditions and restore them in the event of disruption in the learning process [9]. In social science learning in grade IV SDN Sumbermulyo 02 Winong Sub-district Pati Regency, showed that students’ learning performance decreased due to ineffective learning due to covid 19 that hit the life of the world, so that education in Indonesian had a negative impact that could not carry out learning directly in the
In the learning process not only involves mastery of facts or concepts in a field of science, but also involves feelings related to emoticons, affection, hate, spiteful desires and spirituality [7]. The social science learning process carried out in elementary school uses learning methods with a scientific approach. In the process of learning social science teachers should be able to master the material to be delivered and be able to use methods that suit the material, one of the methods of learning social science is the scientific approach. Scientific is a learning approach that uses a process-based approach to science is organizing learning experience in logical order including learning processes: observing, questioning, reasoning, trying, concluding, presenting, and communicating. Learning measures [2] including (1) using learning models, learning methods, learning media, and learning resources tailored to the characteristics of students and subject; (2) formulating learning objectives tailored to attitude characteristics; (3) the method of trying is also called the experimental method; (4) conclude; and (5)
presenting the meaning is the continuation of the process of concluding, after the concluded activity is completed, then the next activity is presenting.

The scope of grade IV social science learning [6] is as follows (1) chapter one reading and drawing maps of the local environment (introduction, get to know the elements of the map, view local neighborhood maps, draw a map of the local environment, measure distance using a simple scale and (2) chapter two social and cultural diversity based on the appearance of nature (introduction, natural appearance diversity, natural symptoms, community behavior and natural events, socio-cultural diversity due to the of natural appearance).

2.3 Strategy to Foster Students’ Learning Spirit
Teachers should be able to abandon learning habits monopolized by teachers themselves. Because teachers in carrying out their role as educators, leaders teachers, administrators, must be able to serve students based on awareness, belief, discipline and responsibility optimally so as to give a positive influence on the development of students optimally both physical and physical.

3. Research Method
This research a field study, so in order to obtain data, researchers can jump directly into the field whether it is a document, or a variety of reliable information. The approach used in this study uses a technically "qualitative" approach to qualitative research seeking to interact with its research subjects naturally, not prominently and in a way that is not coercive and qualitative research is interested in investigating people in a natural setting about how they think and act in their way. The research location is in Grade IV of SDN Sumbermulyo 02 Winong District Pati Regency in the 2019/2020 even semester. The subject of the study was grade IV students of SDN Sumbermulyo 02 Winong District, Pati Regency in 2019/2020 with 12 children. Data collection technique in this study uses interview method, observation method, and documentation method. Data analysis including (1) data reduction, (2) data display, and (3) conclusion drawing.

4. Results and Discussion
Based on observations and documentation, social studies learning using internet media for class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic has been going well. The fourth grade students of SDN Sumbermulyo 02 Winong District Pati Regency were helped by the presence of internet media during the covid 19 pandemic. The fourth grade student of SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic by using internet media quickly obtained information related to social studies learning and quickly completed assignments.

Through in-depth interviews, which reads

Researcher : "What do you know about internet media?"
Informant : "Internet media is a learning aid that uses internet networks, can be accessed on a smartphone or tab or or notebook or laptop or computer, used to find information about social science".

Researcher : "What do you think the impact of internet media on social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 pandemic?"
Informant : "There are two kinds of impacts of internet media in social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 pandemic, namely positive and negative. The positive impact of internet media for social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 pandemic is that children quickly find out information about social studies and children quickly complete tasks. Then, the negative impact of internet media
on social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 pandemic is that the eye health of students is reduced because they often stare at the screen of a smartphone or tab or or notebook or laptop or computer when looking for information about social science ".

Researcher : "How about the fourth grade social studies learning at SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 using the internet?"

Informant : "Learning is more efficient and effective for grade IV SDN Sumbermulyo 02 Winong District Pati Regency during the current covid 19 pandemic".

There are two kinds of impacts of internet media in social studies learning for Class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic, namely positive and negative. The positive impact of internet media for social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency for the Covid 19 pandemic is that children quickly find out information about social studies and children can quickly complete assignments. Then, the negative impact of internet media on social studies learning for fourth grade students of SDN Sumbermulyo 02 Winong District Pati Regency in the COVID-19 pandemic. Currently, students' eye health is reduced because they often stare at the screen of a smartphone or tab or notebook or laptop or computer when looking for information about social science. The purpose of learning is to achieve changes in behavior or competence in students after participating in learning activities changes in behavior or competency in students after participating in learning activities. Good learning takes place through the process. A good learning process can only be created through good and proper planning. It is learning planning that is the main element of learning and one of the most important tools for teachers. A good teacher will always make plans for his learning activities, so there is no reason to teach in the classroom without learning planning [8].

5. Conclusion

From this research it can be concluded that there are two kinds of impacts of internet media in social studies learning for Class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic, namely positive and negative. The positive impact of internet media for social studies learning for grade IV SDN Sumbermulyo 02 Winong District Pati Regency for the Covid 19 pandemic is that children quickly find out information about social studies and children can quickly complete assignments. Then, the negative impact of internet media on social studies learning for fourth grade students of SDN Sumbermulyo 02 Winong District Pati Regency in the COVID-19 pandemic. Currently, students' eye health is reduced because they often stare at the screen of a smartphone or tab or notebook or laptop or computer when looking for information about social science. Social studies learning using internet media for class IV SDN Sumbermulyo 02 Winong District Pati Regency during the covid 19 pandemic became effective and efficient.
