From 3D spheroids to tumor bearing mice: efficacy and distribution studies of trastuzumab-docetaxel immunoliposome in breast cancer [Erratum]

Rodallec A, Sicard G, Giacometti S, et al. Int J Nano. 2018;13: 6677–6688. On page 6684, Table 1 should be as follows:

Table 1

| Treatment                      | Beginning of treatment ($\times 10^{10}$) | End of treatment ($\times 10^{10}$) |
|--------------------------------|------------------------------------------|------------------------------------|
| MDA-MB-453 bearing mice        |                                          |                                    |
| Control                        | 1.15                                     | 1.73                               |
| Liposome + free trastuzumab    | 0.877                                    | 2.53                               |
| Immunoliposome                 | 1.70                                     | 1.72                               |
| MDA-MB-231 bearing mice        |                                          |                                    |
| Control                        | 1.19                                     | 5.96                               |
| Liposome + free trastuzumab    | 1.49                                     | 3.88                               |
| Immunoliposome                 | 1.38                                     | 3.44                               |
