### Appendix 5:
Repartition of pooled analyses by number of included trials

| Number of trials per analysis | Number of possible analyses |
|------------------------------|----------------------------|
| 2                            | 66                         |
| 3                            | 220                        |
| 4                            | 495                        |
| 5                            | 792                        |
| 6                            | 924                        |
| 7                            | 792                        |
| 8                            | 495                        |
| 9                            | 220                        |
| 10                           | 66                         |
| 11                           | 12                         |
| 12                           | 1                          |
| Total                        | 4083                       |
