Acknowledgments
The study is part of a systematic analysis of attributable causes of cancer in Korea conducted by working group experts in collaboration with the National Cancer Center, Korea and the International Agency for Research on Cancer. This study was supported by a research grant from the National Cancer Center, Korea (NCC-0710160) and grants from the National R&D Program for Cancer Control, Ministry for Health, Welfare and Family affairs, Republic of Korea (1420190 and 0920010). We thank Mathieu Boniol from the International Prevention Research Institute, Lyon, France and Paolo Boffetta from the Tisch Cancer Institute, Mount Sinai School of Medicine, New York, United States of America for their help while they were working at the International Agency for Research on Cancer, Lyon, France.
