The published version of this paper contained three typographical errors.

- In Eq. (2.11), terms \(-A_d/\sqrt{2v_d}\) and \(-A_u/\sqrt{2v_u}\) were omitted in the expressions for \(m_1^2\) and \(m_2^2\) respectively. The corrected formulae read:

\[
m_1^2 = \left( \frac{v_u}{v} \right)^2 m_A^2 + \left[ \left( \frac{v_u}{v} \right)^4 - 1 \right] \frac{A_d}{\sqrt{2v_d}} + \frac{v_d}{v^2} \frac{A_u}{\sqrt{2v_u}} + \frac{G^2}{4} \left( v_u^2 - v_d^2 \right),
\]

\[
m_2^2 = \left( \frac{v_d}{v} \right)^2 m_A^2 + \left( \frac{v_u v_d}{v^2} \right)^2 \frac{2 A_d}{\sqrt{2v_d}} + \frac{G^2}{4} \left( v_u^2 - v_d^2 \right).
\]

- In Eq. (2.12) a factor of \(s^4_\beta\) should be changed to \(c^4_\beta\) in the 22 element of the matrix. The aforementioned errors in Eq. (2.11) also propagated to this formula. The corrected matrix reads:

\[
M^2_\ell = \begin{pmatrix}
(m_A^2 + m_2^2) s^2_\beta c_\beta + \frac{A_u}{\sqrt{2v_u}} s^3_\beta c_\beta - \frac{A_u}{\sqrt{2v_u}} c^3_\beta s_\beta - \frac{A_d}{\sqrt{2v_d}} s^3_\beta c_\beta & -(m_A^2 + m_Z^2) s_\beta c_\beta - \frac{A_u}{\sqrt{2v_u}} c^3_\beta s_\beta - \frac{A_d}{\sqrt{2v_d}} s^3_\beta c_\beta \\
-(m_A^2 + m_2^2) s^2_\beta c_\beta - \frac{A_u}{\sqrt{2v_u}} c^3_\beta s_\beta - \frac{A_d}{\sqrt{2v_d}} s^3_\beta c_\beta & m_A^2 c^2_\beta + m_2^2 c^2_\beta + \frac{A_u}{\sqrt{2v_u}} c^3_\beta c_\beta + \frac{A_d}{\sqrt{2v_d}} c^3_\beta c_\beta
\end{pmatrix}.
\]

- In Eq. (2.15) the signs in front of the counterterms were flipped. The corrected substitutions are:

\[
v_u \rightarrow Z^{-1/2}_u v_u = v_u \left( 1 - \frac{1}{2} \beta Z_{H_u} \right),
\]

\[
v_d \rightarrow Z^{-1/2}_d v_d = v_d \left( 1 - \frac{1}{2} \beta Z_{H_d} \right).
\]

The subsequent equations in Sect. 2 of the published paper were derived using the corrected versions of Eqs. (2.11), (2.12) and (2.15) exhibited above. Hence, the typographical errors noted above do not affect the remainder of the published paper.
