S2 Table. ypCR rate according to molecular subtype (n=682)

| Molecular subtype          | ypCR rate, n (%) | OR (95% CI)      | p-value   |
|----------------------------|------------------|------------------|-----------|
| Luminal HER2(–)            | 18/309 (5.8)     | Reference        |           |
| HER2(+)                    | 98/262 (37.4)    | 9.66 (5.64-16.5) | < 0.001<sup>a</sup> |
| Triple-negative            | 19/111 (17.1)    | 3.34 (1.68-6.63) | 0.001<sup>a</sup> |

CI, confidence interval; HER2, human epidermal growth factor receptor; OR, odds ratio; pCR, pathologic complete response. <sup>a</sup>Significant p-value.
