Supplement of

Evaluation of NU-WRF model performance on air quality simulation under various model resolutions – an investigation within the framework of MICS-Asia Phase III

Figure S1. Time series of surface meteorological parameters of observed vs. modeled values at different grid resolutions in areas where the monitoring sites are located.
Figure S2. Time series of surface air quality of observed vs. modeled values at different grid resolutions in areas where the monitoring sites are located
Figure S3. Time series of surface $O_3$ and NOx concentrations over QHD (upper) and XL (lower) sites of observed vs. modeled values at different grid resolutions
Figure S4. Domain average vertical wind speeds at different grid resolutions along the altitude.
