Index

ADHM construction, 394–396
adjoint fermions
  current states, 216
adjoint vacuum, 216–221
affine current algebra, 5, 13, 39
affine Lie algebra, see affine current algebra, 44
  WZW model, 63
algebra
  simply laced, 42
algebraic Bethe ansatz
  \( \mathcal{N} = 4 \) SYM, 332
anomalous dimension, 170, 321, 409
  \( \mathcal{N} = 4, 332 \)
anomaly
  axial, in two dimensions, 178
  axial \( U(1), 346 \)
  axial, bosonized, 184

baryon spectrum
  2d, 247
baryons
  4d large N, 346
\( \beta \) function
  \( CP^{N-1} \) model, 172
  Gross Neveu model, 170
  WZW model, 40, 65
beta function, 323
  large N, 337
Bethe ansatz
  algebraic equations, 114–125
  continuum, 125
Bethe–Salpeter equation, 194
BFKL equation, 334
bootstrap, 31

bosonization, 131–164
  (\( \beta, \gamma \)) ghosts, 162
  (b, c) ghosts, 160–162
  abelian, 132–139
    Dirac fermion, 132
    Mandelstam construction, 135
  chiral, 148–159
  Thirring model, sine-Gordon model, 136
  Wakimoto, 163
  Witten’s non-abelian, 139
    Majorana fermions, 139

BPS
  magnetic monopole, 381
breather, 86
  quantum, 90
BRST quantization
  2d QCD, 281
c-theorem, 100
Callan–Symanzik equation, 321
Cartan matrix, 41
  affine algebra, 47
  Cartan sub-algebra, 40
  Cartan–Weyl basis
    affine Lie algebra, 45
    Lie group, 40
Casimir operator
  \( \text{YM in 2d}, 296 \)
central charge, 20
character, 28
  \( \text{YM in 2d}, 296 \)
  \( \text{ALA}, 52 \)
  WZW model, 77
closed string, 6
collective coordinates
  instantons, 397
collinear symmetry, 314–316
Confinement versus screening
  2d, 265–277
conformal
  dimension, 19
  family, 22
  map, 4
  transformation, 6
conformal anomaly, 309
  4d, 323
conformal dimension, 81
  of \( A_\mu \), 177
conformal field theory 17–38
conformal invariance
  4d QCD, 322–327
conformal symmetry
  in 4 dimensions, 309–327
  in low dimensions, 17
conformal Ward identity
  4d, 319–322
conformal weights, 19
conjugacy class, 72
conserved charges
generating function, 103
multilocial, 104
coset mode
\(G/G\) in 2d QCD, 281
\(CP^{N-1}\)
2d baryons, 242
model, 171–174
critical exponent, 37
crossing symmetry, 31, 96
D branes, 71–73
Dashen–Frishman, 67, 69
Dedekin \(\eta\) function, 157
Derrick’s Theorem, 86
descendant operator, 22
DHN, 90
dilatation operator
\(\mathcal{N} = 4\) SYM, 330
dilogarithm function, 130
Dirac bracket, 151
2d baryons, 243
Dirac fermion, 34, 58
DLCQ, 223–235
adjoint fermions, 228–235
fundamental fermions, 224–228

duality, 31
Dynkin diagram
affine algebra, 47
Lie group, 42
dyons, 378
effective action
Gross-Neveu model, 172
ergy momentum tensor, 4
ets** mass, 344
Euler character, 340
exact sequence, 375
exceptional groups, 49
fixed point
integrable model, 100
flavor content
2d baryons, 247
Frobenius relations, 300
fusion algebra, 23

\(G/G\) coset models, 75
\(G/H\) coset models, 73–75
gauge group
non-abelian, 179
Gegenbauer polynomials, 324
Goldberger-Triman relation, 366
Gross-Neveu model, 166–170

Hartree approximation, 347
highest weight state, 23
affine algebra, 48
Lie algebra, 43
holomorphic
function, 5
homotopy group, 63
D brane, 72
hyper-Kähler manifold
monopoles, 387
hyper-Kahler manifold
instanton moduli space, 397

instanton, 390
4d QCD, 389–405
integrability, 92–99
\(\mathcal{N} = 4\) 4d SYM, 330–333
4d, 329
classical, 101
quantum
\(O(N)\) model, 107
integrable models, 79
Ising model, 37

Jacobi identity, 40
Jacobi polynomials, 318

Kac determinant, 25
KdV equation, 102
kink, see solitons
Knizhnik-Zamolodchikov equation, 53–55, 67–71

large \(N\)
4d QCD, 337–343

counting rules, 342–345
meson phenomenology, 343
large \(N\) limit
of \(QCD_2\), 191
two dimensional models, 165–174
Lax operator
spin chain, 112
Lax pair
sine-Gordon, 101
light-cone
discrete quantization, 223
light-cone gauge, 191

magnetic monopole
’t Hooft Polyakov solutions, 376
Majorana fermion, 34, 55
Mandelstam parameter, 333
Maurer–Cartan equation, 356
Maxwell theory
in two dimensions, 177
