Stellar and substellar companions from Gaia EDR3

Proper-motion anomaly and resolved common proper-motion pairs

(Corrigendum)

Pierre Kervella1, Frédéric Arenou2, and Frédéric Thévenin3

Key words. astrometry – planets and satellites: detection – proper motions – binaries: visual – catalogs – errata, addenda

An incorrect designation of the white dwarf GD 140 is present in the first sentence of Sect. 5.4. It should read: “We confirm the significant PMa signal detected by Kervella et al. (2019) in two of the 17 white dwarfs of the HIPPARCOS catalog (Table A.5; Fig. 25): GD 140 and LAWD 37.” We thank the reader who pointed out this typo.
