Appendix 1. Supplementary material
QVH-VGH Telementorship Program
Post-Session Reactions

My role during the simulation scenario was: _________________________________

After this session, how confident do you feel with regards to your…

1. Ability to quickly and accurately assess a critically injured patient?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

2. Ability to resuscitate and stabilize a critically injured patient?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

3. Ability to implement evidence-based fluid management strategies?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

4. Ability to recognize the need for bedside or operative procedures?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

5. Ability to utilize the telehealth equipment to communicate with the on-call trauma surgeon at VGH?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

6. Ability to carry out, with telementorship, trauma liver packing?

| Not at all confident | Not very confident | Confident in *good* circumstances | Confident in *most* circumstances | Confident in *all reasonable* circumstances |
|----------------------|--------------------|-----------------------------------|----------------------------------|---------------------------------------------|
|                      |                    |                                   |                                  |                                             |

How helpful did you find this program?

| Not at all helpful | Not very helpful | Somewhat helpful | Very helpful |
|--------------------|------------------|-----------------|-------------|
## TRAUMA NOTECHS

### Leadership
- **5**
  - Clearly defined team leader. Good time management, all tasks completed, non-hierarchical.
- **4**
- **3**
  - Individual defined, but some tasks not completed.
- **2**
  - Identity of team leader not clear.

### Cooperation and resource management
- **5**
  - All team members clearly fill a role and perform all designated tasks.
- **4**
  - Identity of all members not clear, some do not perform assigned tasks.
- **3**
  - Unable to discern role identity of team members.

### Communication and interaction
- **5**
  - Clear communication with Team Leader as a hub, relayed to scribe.
- **4**
  - Communication not always through Team Leader, or not relayed rapidly to scribe.
- **3**
  - Unorganized or incoherent communication on many different levels.

### Assessment and decision making
- **5**
  - Orderly and complete 1° (ABCDE) and 2° surveys. Plan communicated to team.
- **4**
  - Assessment somewhat out of order, all major tasks complete.
- **3**
  - 1° and 2° surveys disorderly and/or incomplete. Plan not clear.

### Situation awareness/coping with stress
- **5**
  - Untoward findings and distractions did not upset systematic and orderly flow. Team is calm and plans ahead.
- **4**
  - Untoward findings caused disruption but did not preclude task completion.
- **3**
  - Untoward findings or interruptions completely upset orderly assessment and task completion. Not anticipatory.
