Supplementary Figure 4

Human

a) SERPINA3 mRNA levels in controls, low SCZ, and high SCZ.
b) TNF-α mRNA levels in controls, low SCZ, and high SCZ.
c) IL6 mRNA levels in controls, low SCZ, and high SCZ.
d) IL1β mRNA levels in controls, low SCZ, and high SCZ.

Mouse

e) IL8 mRNA levels in controls, low SCZ, and high SCZ.
f) IL18 mRNA levels in controls, low SCZ, and high SCZ.
g) IL6ST mRNA levels in controls, low SCZ, and high SCZ.

h) SERPINA3 mRNA levels in low vehicle, high vehicle, low polyIC, and high polyIC.
i) TNF-α mRNA levels in low vehicle, high vehicle, low polyIC, and high polyIC.
j) IL6 mRNA levels in low vehicle, high vehicle, low polyIC, and high polyIC.
k) IL1β mRNA levels in low vehicle, high vehicle, low polyIC, and high polyIC.

PolyIC and vehicle treatments are indicated in the graphs.
