A QUR’ANIC CONCEPT OF SADNESS:
Implication For CBT-Q Content Supplement (Part 1)

Nur Afifah binti Abas
School of Humanities, Universiti Sains Malaysia, Penang, Malaysia
Email: afifabas@student.usm.my

Abstract: This study develops a Qur’anic culturally-adapted psychoeducational content supplement on sadness (ḥuzn) for the Cognitive Behavioral Therapy (CBT) Approach in preventing or treating depression among Muslim clients. The content of the concept derived from a Qur’anic Thematic Exegetical Analysis (al-Tafsīr al-Mawdu‘i). It is a support towards religious psychotherapy from the Islamic Studies field. CBT approach is compatible with the religion of Islam provided complying with the Islamic methodologies e.g., the epistemological aspects of constructs/absolute or relative reality. It is educationally important for Muslims’ existential needs to resiliently face the challenges of life in general.

Keywords: Culturally-adapted psychoeducation (CaPE), Qur’anic Thematic Exegetical Analysis, Existential Needs, Existential Resiliency, Islamic Cognitive-Behavioral Therapy (CBT-I), and Qur’anic Cognitive-Behavioral Therapy (CBT-Q).

Introduction
Loss is among the main themes emerged in the literature post-covid-19 outbreak. Loss influences us to bodily and emotionally react against any mishap happened to us especially in processing and understanding the lost health, loved one/s, job, house, normal life before the pandemic, etc.¹ These unexpected sudden miseries are overwhelming compared to our normal life. The overloaded mixed undesirable feelings and emotions naturally afflict people. For some, this awkward situation is unbearable, thus, just opted

1 Andrew T. Gloster et al., “Impact of COVID-19 Pandemic on Mental Health: An International Study,” ed. Joel Msafiri Francis, PLOS ONE 15, no. 12 (December 31, 2020): e0244809, https://dx.plos.org/10.1371/journal.pone.0244809.
the worst to commit suicide where the trend is ascending. But suicide is sinful for Muslims, thus, we need to extend help to fortify our resilience in the trying time.

Therefore, mental health practice has to play as important role as the primary medical care. The trend has relaxed on the stigma on the mental health. It even demands therapists to adapt their clients’ religious and spiritual affiliations in treating or preventing mental illness. Human beings especially Muslims (who believe) in the fact that we are innately created having undeniable existential need of connecting to the Supreme Being: The God/Allah when exposed to great dangers. Indeed, this Qur’anic verse literally and metaphorically illustrated such dire need:

“He is the One who Enables you to travel through the land and the sea. And it so happens that you are on ships, sailing with a favorable wind, to the passengers’ delight. Suddenly, the ships are overcome by a windstorm and those on board are overwhelmed by waves from every side, and they assume they are doomed. They cry out to Allah ‘alone’ in sincere devotion, ‘If You save us from this, we will certainly be grateful.’” [Chapter Jonas (Sūrah Yūnus) 10: verse no. 22]

The trend shift was evident after the tragedy of 9/11 in 2001. Suddenly, more studies started pouring in the literature on the role of religion and spirituality in coping with major life stressors e.g. RCOPE research. The researchers found that positive religious coping methods help people to cope better with the adversary befell them. Furthermore, they found similar pattern in all

religious and spiritual affiliations.\textsuperscript{6}

However, there are religious or spiritual beliefs that are if inaccurately ingrained or misperceived may turn to become negative religious coping, which will be highly correlated with inner psychical conflict (thus, cognitively too) and disharmony among oneself with own self, or/and other fellow humans, or/and the Divine Power. Empirically significant, its Negative Religious Coping subscale is a strong predictor of health problem(s).\textsuperscript{7}

It reflects the role of religious and spiritual beliefs that promotes resilience (e.g., hardy personality) in facing life challenges.\textsuperscript{8} For example, among the life challenges that can develop into depression over lifespan are unfortunate childhood history, perception of deprived social support, present life event(s) stressor(s), a vulnerable personality style, and previous depressive illness.\textsuperscript{9}

Actually, religious/spiritual coping provides a ready belief system to cognitively accommodate adjustment intelligence while experiencing the mishap prepared.\textsuperscript{10} But the more important part is the content of the belief system that will gradually develops

invincible resiliency within the copers’ psyche especially as a protective mechanism. In the long run, they are also able to shield the immune system from being deteriorated, so, will gracefully experience ageing.\textsuperscript{11}

**Muslim Clients Prefer Islamic Psychotherapy**

Basically, the Muslim clients also will prefer their clergies (imams) or respected elderlies to counsel them due to being uncomfortable with Western psychotherapy\textsuperscript{12} with alien ideas unfamiliar to their Islamic cognitive structure of belief system.\textsuperscript{13} Consequently, the trend evolves further in incorporating Islamic beliefs and practice into the mental health practice for religious/spiritual oriented clients e.g., Religious/Spiritual Cognitive-Behavioral Therapy (R/S CBT) Approach.\textsuperscript{14}

Beshai found that CBT is naturally workable with religions and spirituality, as Beck asserted that it is integrative in nature. Comparatively, he further benchmarked the CBT application between Muslim and non-Muslim Western clients where it is equally applicable.

**Psychotherapists’ Dilemmas in Adapting to Muslim Clients**

Since religion and spirituality returned home to the psychotherapy, the therapists were busy educating themselves religious and spiritual orientation e.g., considering potential belief that can motivate the desired modification on the interaction among thoughts-emotions-actions. As Beck stated: “It’s not the situations in our lives that cause distress, but rather our interpretations of those situation”.

**Misperceptions in Understanding Islam**

Further down the road in adapting therapy to the new trend, non-Muslim psychologists misperceived information about Islam for example Beshai reported Smith said: “the Qur’an is to Muslims what Christ is to Christians”. Whereby, actually the Holy Qur’an is to Muslims like the Holy Bible (Injīl) is to Christians. Or contrarily

can also be adjusted as it is the Prophet Muhammad s.a.w. is to Muslims like Christ (the Prophet ëIsä a.s.) is to Christians.

These misperceptions show a need for more direct involvement from academics of Islamic studies with adequate shared background in the field of psychology and its therapeutic treatments to supply for shortage of relevant reference.21 So far, Islamically integrated psychotherapy are underrepresented by the people who involved directly with the religious service/studies e.g., clergies (Islamic scholars or imams).22 Evidently, e.g., Beck

Institute also responded that it does not have a training course for Islamically adapted CBT approach.\textsuperscript{23} It is undeniable that existing religious belief and value systems are usually based on certain sacred scriptures of respective religions where therapists need to gain some necessary knowledge to apply religious therapy.\textsuperscript{24} Even the psychotherapists themselves confessed that their training was absent of religious training and theirs may differ clients’ religious affiliations. They also complained the fact that they are also not clergies/pastors/religious scholars or authorities themselves but ‘therapists’. Thus, they need collaboration from those in religious service or studies.\textsuperscript{25} Nevertheless, religious sources belong to cultural-sensitive sciences that need special care in handling it due to its revered sources, special meaning attached to it and established fundamental principles or else, will unnecessarily offend the clients.\textsuperscript{26}

It is more complicated when they need to use alternative method in intervening clients’ faulty ideas or incomplete coverage on a certain issue that had influenced their interpretations of the

Islamic beliefs like in maladaptive cognitions cases that caused self-blaming, which are rooted in negative religious coping of believing e.g., being sad is a moral disorder like “divine retribution”, thus, labelled as “lack of faith” or being “an inadequate good Muslim”.

Sometimes Muslim clients themselves are not aware that what they believe is incongruent or not with the authentic Islamic teachings. They may be influenced by what is culturally believed about sadness or depression. These problems are gaining more attention for Islamic solutions where there is a need to use the Qur’an directly to gain better trust and confidence of the clients to comply with the treatments and finally achieve its therapeutic goals. So, Islamically speaking, it is a social duty (fardu kifayah) for those belong to the Islamic Studies fields/services to represent this field like the pastoral/chaplaincy psychology is prosperously developing in the West as a scientific benchmark.

Cognitive Behavior Therapy (CBT)

Cognitive-Behavioral Therapy (CBT) is a conversational psychotherapy, basically between a psychotherapist and a client focuses on cognition. In a professional mental health counseling setting, a therapist plans the treatments in a structured way, which are divided through certain agreed number of sessions that need commitment from the client. The main cognitive model believes that “the way individuals perceive a situation is more closely connected to their reaction than the situation itself”.

Historically, Beck serendipitously founded the cognitive behavioral therapy (CBT) methodology when he was observing a depressed client’s thinking patterns. He continued observing all his clients to see similar thinking patterns to other than depressed problems until he could categorize their patterns of thoughts belong to mental illness. Thus far, the CBT is still robustly crowned among the best evidence-based approach. What is special with CBT is that it can be applied as preventive measure via psychoeducational programs, which gives hope for collective broader health intervention rather than the limited one-to-one treatment session, which is a risky act during the pandemic.

The most common mental health problem, namely depression, becomes overwhelmed due to the sudden outbreak of the COVID-19 pandemic. It was already alarming in the reported pre-pandemic Global Burden of Diseases Study 2019 (GBD 2019). It

highlights more the role of religion in healing it, or better, at preventing it.40

Depression is different from sadness from the aspect of time that depression stalks all walk of the depressed clients’ life and thinking unlike sadness, which is induced temporarily by undesirable event like being upset or unmet expectation or lost someone/something meaningful but does not prolong to become a pathology.41

Meanwhile from the behavioral signs of depression, one may start to experience difficulty to fall asleep and some lost appetite until significantly lost weight while some gain more appetite than usual that significantly become obese. Other common complains are constant fatigue, psychosomatic pain, loss of interest in normally enjoyed activities, easily distracted, influencing decision making processes, or desire to commit suicide. Personally, they also over-criticize themselves as being worthless, hopeless, unlucky and/or unloved. Some may involve with addiction of alcohol or substance abuse. Anyhow, one should get properly diagnosed by a specialist and avoid self-diagnose at any cost as that may do more harm than healing.42

Generally, in a psychotherapy, rapport is established between the therapist and the client in the beginning. The client is briefed about what they are going to do and introduced to any CBT methods of choice that is being agreed by both parties, since nowadays there are many new creative therapeutic methods of third wave were invented.\textsuperscript{43}

After they are comfortable then they will discuss about the client’s problem to give ideas to the therapist to investigate the client’s own recurring thought patterns especially related to the tough times in order to detect ‘cognitive distortions’ in his/her flow of automatic thoughts. Perhaps they derived from misinterpretation or misconception of a belief or information strongly accepted by and deep-rooted in the mind. That is why it needs several chunked sessions and homework to pinpoint the cognitive problem that apparently client is suffering from. Then, the therapist can initiate the healing process by replacing the distorted perceptions until the client realized about the main problem to make sense of his/her depressed feelings and emotions.\textsuperscript{44}

The homework usually takes a form of an assignment for the client to examine his/her automatic thoughts: i.e., a brief stream of thought about ourselves and others over a life event. Sometimes, emotions are based on inaccurate ideas termed as “distorted cognitions or dysfunctional beliefs”, which we unexpectedly, most of the times than not, believed as real and true. When those ideas formed “intermediate beliefs”, they influence attitudes or

tendencies that usually sound like ultimatums one (if-so) is tied to in deciding about one’s life e.g., “if I talk, nobody will listen” but left unchallenged. So, will avoid being expressive and keep suppressing opinions, feelings and emotions from being voiced out.45

Islamically, Muslims are educated to refer to revealed sources for the construction of the reality meaning in life, including for healing since the Qur’an is meant for healing: “We send down the Quran as a healing and mercy for the believers (QS. 17: 82)”.

But so far, the researcher did not find any psycho-educational content supplement produced from Qur’anic Thematic Exegetical Analysis (QTEA) on sadness. Albeit the Qur’an is ready to educate Muslims about sadness as it is an undesirable enigmatic emotion that most people found problematic while experiencing it.

Supposed we as Muslims are already matured in this business since it is one of the two first emotions mentioned by Allah before He ordained Prophet Adam to descend to the Earth: “We said, “Descend all of you! Whoever follows My Guidance, they will have no worry, nor will they be continuously sad.” (QS. 2: 38).

But we are seemingly influenced by the non-Islamic prescriptions more than appreciating, investigating, and benefitting from Islamic divine legacy. In a book entitled “The Loss of Sadness: How Psychiatry Transformed Normal Sorrow into Depressive Disorder”, it shows how they lost it to the psychiatric practice being confused between the normal sadness and the pathological ones, which shared symptoms at feeling sad.47

So, let us to investigate in the Qur’an why sadness is important that it is mentioned in the Qur’anic verse, to understand better its function in our life. Then we can integrate the understanding into Islamically adapted psycho-educational psychotherapy (CBT-I) to instill Islamic beliefs and values about sadness, perhaps the understanding will protect our mental hygiene and fortify our resilience in the face of trials and tribulations of life as Rathod found it significantly more effective for religious Muslim clients.48

Muslims belong to a dissimilar belief system about human’s history from before the story of our creation, to being created, was living in the Heaven before descending on the Earth, and other reality based on the revelation in the Holy Qur’an. In the Islamic belief system, everything is principally unified at the Oneness and Uniqueness (al-Tawḥīd) of Allah.

Therefore, Muslims’ psyches and selves need different reference and manual to fix it when it is broke down, as it works on different self-concept with dissimilar standards on the perception and ethics of human existence, relationships, and functions compared to the Western mainstream.49 We specifically select to work applying the classical method of Qur’anic Thematic Exegetical Analysis (al-Tafsīr al-Mawḍūʿi), which is suitable in dealing with the revered holy texts of the Qur’an than the literary critical analysis commonly used by the other scholars in studying the Qur’an.

The Qur’anic Thematic Exegetical Analysis (al-Tafsīr al-Mawḍūʿi)

In fact, there are endless aspects of Islam that need to be catered in integrating Islam into the psychotherapy for Muslims. Here, we attempt to contribute by preparing a basic Qur’anic culturally adapted psychoeducation (CaPE concept like in

Husain’s work\textsuperscript{50} on sadness by using it as a keyword in searching throughout the Qur’anic.

Literally, sadness in Arabic language is rooted at the past tense verb of feeling sad: \(\text{ha-za-na (حزن)}\), which nouns are: \(\text{al-hazan}\) and \(\text{al-huzn}\). \(\text{Al-hazan}\) plainly means roughness on the earth surface. Metaphorically, it relates the roughness due to the soul (psyche) experiences pressures and stresses of life, which strip its delightfulness and happiness.

In its noun form of \((\text{al-huzn})\) it means a state of being gloomy, glum, sad, unhappy, distress or that causes suffering/grief or feeling saddened, dejected, depressed, discouraged, dispirited, broken-hearted, upset, sorrow, heartache, sorrowful, mournful, doleful, miserable. Its thesaurus includes melancholy, blues, dolefulness, woefulness, worry, boredom, despondence, trouble, affliction, anguish, doldrums, grim, frowning, pain, scowling, suffering, sullenness, lament, regret, forlorn, and frustration.\textsuperscript{51}

Interestingly, Ibnu al-Qayyim al-Jawzi explained that something is saddening due to the attachment to the love feeling to it i.e., a loss of family member you loved will sadden you but not just any loss of somebody you did not even know. Also, he observed that the worry is induced by an expectation of mishap that will happen. When it happened, then, it is replaced by the sadness. While in the pathological sense in the spectrum is the interesting relationship between anxiety and depression.\textsuperscript{52}

We add ‘cry’ and ‘tears’ as keywords also to enrich and broaden the coverage \((\text{al-isti\textsuperscript{v}"ab})\) the search. Similar to the thematic

researchers are Sunni Muslim, so, they are more familiar with this ideological view.

The anticipated hope is that the Sunni Muslim clients can work together with their psychotherapists to compare what they thought about things that sadden them or the sadness itself whether it is pathological or normal according to Islamic orientation in preventing or treating depression as accurate belief system is promised to not experience worry nor to be sad for long until became pathologically depressed.

However, it is worth noting that there are cases of depression that has no relation with cognitive reasons like having brain tumor, secondary illness from another primary chronic illness like heart problems, hypothyroidism, seasonal due to lack of sunlight, lack of Vitamin D, etc.  

Tables 1-3 list the Qur’anic verses related to sadness (for replication with other exegeses (tafāsīr)).

| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|-------------|-----------------------------------------------------------------|
| 1   | Chapter 2 <br> Sūrah Al-Baqarah (Chapter The Cow) | 38 | We said, “Descend all of you! Then when guidance comes to you from Me, whoever follows it, there will be no worry for them, nor they will always be sad. |
|     |         | 62 | Indeed, the believers, Jews, Christians, and Sabians - whoever ´truly´ believes in Allah and the Last Day and does good deeds will have their reward with their Lord. And there will be no worry for them, nor they will always be sad. |
|     |         | 112 | But no! Whoever submits themselves to Allah and does good deeds will have their reward |

with alteration appropriately suits this work e.g. for coding – the list is provided for replication with other exegesis and English translation of the Holy Qur’an. It is absent of example of coding and theme-ing due to limitation of word count.
| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|-------------|---------------------------------------------------------------|
|     | Chapter 3 | 262 | Those who spend their wealth in the cause of Allah and do not follow their charity with reminders of their generosity or hurtful words - they will get their reward from their Lord, and there will be no worry for them, nor they will always be sad. |
|     | Chapter 3 | 274 | Those who spend their wealth in charity day and night, secretly and openly - their reward is with their Lord, and there will be no worry for them, nor they will always be sad. |
|     | Chapter 3 | 277 | Indeed, those who believe, do good deeds, establish prayer, and pay alms-tax will receive their reward from their Lord, and there will be no worry for them, nor they will always be sad. |
| 2   | Sūrah Āl ‘Imrān (Chapter The Family of Imran) | 139 | Do not falter or be sad, for you will have the upper hand if you are ‘true’ believers. |
|     | Sūrah Āl ‘Imrān (Chapter The Family of Imran) | 153 | ‘Remember’ when you were running far away ‘in panic’ - not looking at anyone - while the Messenger was calling to you from behind! So, Allah rewarded your disobedience with distress upon distress. Now, do not be sad over the victory you were denied or the injury you suffered. And Allah is All-Aware of what you do. |
|     | Sūrah Āl ‘Imrān (Chapter The Family of Imran) | 170 | rejoicing in Allah’s bounties and being delighted for those yet to join them. There will be no worry for them, nor they will always be sad. |
|     | Sūrah Āl ‘Imrān (Chapter The Family of Imran) | 176 | ‘O Prophet! Do not be sad for those who race to disbelieve - surely they will not harm Allah in the least. It is Allah’s Will to disallow them a share in the Hereafter, and they will suffer a tremendous punishment. |
| 3   | Sūrah al-Mā‘idah (Chapter The Banquet) | 41 | O Messenger! Do not be sad for those who hastily disbelieve - those who say, “We believe” with their tongues, but their hearts are in disbelief. Nor those among the Jews who eagerly listen to lies, attentive to those who are too arrogant to come to you. They distort the Scripture, taking rulings out of context, then say, “If this is the ruling you get ‘from Muḥammad’, accept it. If not, beware!” Whoever Allah allows to be deluded, you can never be of any help to
| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|--------------|---------------------------------------------------------------|
| 4   | Chapter 6 | 69 | Indeed, the believers, Jews, Sabians and Christians—whoever ‘truly’ believes in Allah and the Last Day and does good deeds, there will be no worry for them, nor they will always be sad. |
| 5   | Chapter 7 | 33 | We certainly know that what they said saddens you ‘O Prophet’. It is not your honesty they question - it is Allah’s signs that the wrongdoers deny. |
|     | Chapter 7 | 48 | We have sent messengers only as deliverers of good news and as warners. Whoever believes and does good deeds, there will be no worry for them, nor they will always be sad. |
| 6   | Chapter 9 | 35 | O’children of Adam! When messengers from among yourselves come to you reciting My revelations - whoever shuns evil and mends their ways, there will be no worry for them, nor they will always be sad. |
|     | Chapter 9 | 49 | Are these ‘humble believers’ the ones you swore would never be shown Allah’s mercy?’ Finally, those on the heights will be told: ‘‘Enter Paradise! You will have nothing to worry, nor will you be sad.”’ |
| 6   | Chapter 9 | 40 | ‘It does not matter’ if you ‘o’believers’ do not support him, for Allah did in fact support him when the disbelievers drove him out ‘of Mecca’ and he was only one of two. While they both were in the cave, he reassured his companion, “Do not be sad, for Allah is undoubtedly with us.” So, Allah sent down His serenity upon the Prophet, supported him with forces you ‘believers’ did not see, and made the word of the disbelievers lowest, while the Word of Allah is supreme. And Allah is Almighty, All-Wise. |
|     | Chapter 9 | 92 | Nor ‘is there any blame on’ those who came to you ‘O Prophet’ for mounts, then when you said, “I can find no mounts for you,” they left with eyes overflowing with tears out of sorrow that they had nothing to contribute. |
| 7   | Chapter 10 | 62 | There will certainly be no worry for the close
| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|-------------|-----------------------------------------------------------------|
| 8   | Chapter 12 | 13          | He responded, “It would truly **sadden** me if you took him away with you, and I fear that a wolf may devour him while you are negligent of him.” |
| 8   | Chapter 12 | 84          | He turned away from them, lamenting, “Alas, poor Joseph!” And his eyes turned white out of the **bereavement** he suppressed. |
| 8   | Chapter 12 | 86          | He replied, “I complain of my anguish and **sorrow** only to Allah, and I know from Allah what you do not know. |
| 9   | Chapter 15 | 88          | Do not let your eyes crave the ‘fleeting’ pleasures We have provided for some of the disbelievers, do not **grieve** over them. And be gracious to the believers. |
| 10  | Chapter 16 | 127         | Be patient ‘O Prophet’, for your patience is only with Allah’s help. Do not be **sad** over those ‘who disbelieve’, nor be distressed by their schemes. |
| 11  | Chapter 19 | 24          | So, a voice reassured her from below her, “Do not be **sad**! Your Lord has provided a stream at your feet. |
| 12  | Chapter 20 | 40          | ‘Remember’ when your sister came along and proposed, ‘Shall I direct you to someone who will nurse him?’ So We reunited you with your mother so that her heart would be put at ease, and she would not be **sad**. ‘Later’ you killed a man ‘by mistake’, but We saved you from sorrow, as well as other tests We put you through. Then you stayed for a number of years among the people of Midian. Then you came here as pre-destined, O’Moses! |
| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|-------------|-------------------------------------------------------------|
| 13  | Chapter 21<br>`Sūrah al-Anbiyā’`<br>(Chapter The Prophets) | 103 | The Supreme Horror ’of that Day’ will not <strong>sadden</strong> them, and the angels will greet them, ’saying,’ “This is your Day, which you have been promised.” |
| 14  | Chapter 27<br>`Sūrah al-Naml`<br>(Chapter The Ant) | 70 | Do not be <strong>sad</strong> for them, nor be distressed by their schemes. |
| 15  | Chapter 28<br>`Sūrah al-Qasas`<br>(Chapter Narrations) | 7 | We inspired the mother of Moses: “Nurse him, but when you worried about him, put him then into the river, and do not worry or be <strong>sad</strong>. We will certainly return him to you, and make him one of the messengers.” |
|     |         | 8 | And ’it so happened that’ Pharaoh’s people picked him up, only to become their enemy and source of <strong>sorrow</strong>. Surely Pharaoh, Hamān, and their soldiers were sinful. |
|     |         | 13 | This is how We returned him to his mother, so that her heart would be put at ease, and not <strong>sad</strong>, and that she would know that Allah’s promise is ’always’ true. But most people do not know. |
| 16  | Chapter 29<br>`Sūrah Al-Ankabūt`<br>(Chapter The Spider) | 33 | And when Our messenger-angels came to Lot, he was distressed and worried by their arrival. They reassured ’him’, “Do not worry, nor be <strong>sad</strong>. We will surely deliver you and your family—except your wife, who is one of the doomed. |
| 17  | Chapter 31<br>`Sūrah Luqmān`<br>(Chapter Lukman) | 23 | But whoever disbelieves, do not let their disbelief <strong>saddens</strong> you ’O Prophet’. To Us is their return, and We will inform them of all they did. Surely Allah knows best what is ’hidden’ in the heart. |
| 18  | Chapter 33<br>`Sūrah Al-Ahzāb`<br>(Chapter The Coalition) | 51 | It is up to you ’O Prophet’ to delay/hasten the turn whoever you please among your wives. There is no problem to put the turn to anyone who was delayed after that as that will entertain them, to prevent them from feeling <strong>sad</strong>, and all will feel very pleased with what you offered to each of them. Allah ’fully’ knows what is in the hearts of all of you. And Allah is All-Knowing, Most Forbearing. |
| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|--------------|---------------------------------------------------------------|
| 19  | Chapter 35  
    Sūrah Fātir  
    (Chapter The Originator) | 34 | And they will say, “Praise be to Allah, Who has kept away from us all ‘causes of’ sadness (in the heaven). Our Lord is indeed All-Forgiving, Most Appreciative. |
| 20  | Chapter 36  
    Sūrah Yāsin  
    (Chapter Yāsin) | 76 | So do not let their words sadden you ‘O Prophet’. Indeed, We ‘fully’ know what they conceal and what they reveal. |
| 21  | Chapter 39  
    Sūrah Al-Zumar  
    (Chapter The Troops) | 61 | And Allah will deliver those who were mindful of Him to their place of ultimate triumph. No bad thing will touch them, nor will they be sad. |
| 22  | Chapter 41  
    Sūrah Al-Fussilāt  
    (The Details) | 30 | Surely those who say, “Our Lord is Allah,” and then remain steadfast, the angels descend upon them, ‘saying,’ “Do not worry, nor be sad. Rather, rejoice in the good news of Paradise, which you have been promised. |
| 23  | Chapter 43  
    Sūrah Al-Zukhruf  
    (Chapter The Ornament of Gold) | 68 | ‘who will be told,’ “O’My servants! There is no worry for you Today (the Judgement Day), nor will you be sad - |
| 24  | Chapter 46  
    Sūrah Al-Aḥqāf  
    (The Sand Dunes) | 13 | Surely those who say, “Our Lord is Allah,” and then remain steadfast - there will be no worry for them, nor will they always be sad. |
| 25  | Chapter 58  
    Sūrah Al-Mujādalah  
    (Chapter The Argument) | 10 | Secret talks are only inspired by Satan to sadden the believers. Yet he cannot harm them whatsoever except by Allah’s Will. So, in Allah let the believers put their trust. |

**Table 2.** List of the Qur’anic verses related to sadness from the derivatives of tear (da-ma-a - دمع)
The Quranic Concept of Sadness

Albeit Prof. Dr. Malik Babikir Badri, the founder of Islamic Psychology, endorsed the effectiveness of Cognitive Behavior Therapy (CBT), anyhow we must be very careful in integrating Islam into CBT on the ground of compatibility to Islamic fundamentals, especially at the Creed level (‘Aqīdah).

Badri, Contemplation.

---

Table 3. List of the Qur’anic verses related to sadness from the derivatives of cry (ba-kā - بكى)

| No. | Chapter | Verse (Ayah) | English Translation from The Clear Qur’an by Dr. Mustafa Khattab |
|-----|---------|--------------|---------------------------------------------------------------|
| 1   | Chapter 9  
Sūrah Al-Tawbah  
(Chapter The Repentance) | 16 | So, let them laugh a little - they will weep much as a reward for what they have committed. |
| 2   | Chapter 12  
Sūrah Yūsuf  
(Chapter Joseph) | 16 | Then they returned to their father in the evening, weeping. |
| 3   | Chapter 17  
Sūrah al-Isrā’  
(Chapter The Night Journey) | 109 | And they fall down upon their faces weeping, and it increases them in humility.” |
| 4   | Chapter 53  
Sūrah Al-Najm  
(Chapter The Star) | 43 | [Moreover] He is the One who Makes [one] to laugh (to feel happy) or cry (to feel sad). |
|     |          | 59 - 60 | laughing ’at it’ and not weeping ’in awe’, |

The Messenger, you see their eyes overflowing with tears for recognizing the truth. They say, “Our Lord! We believe, so count us among the witnesses.

Nor is there any blame on those who came to you ‘O Prophet’ for mounts, then when you said, “I can find no mounts for you,” they left with eyes overflowing with tears out of sorrow that they had nothing to contribute.
There are aspects of CBT, which are of Western epistemological fundamentals that are either based on constructivistic orientation (based on idiosyncratic i.e., individual-based reality) or rationalistic orientation (based on tangible absolute reality), incompatible with Islam\(^{61}\) that made it "antithetical to Islam".\(^{62}\) We must purify and process our information through the sciences of Foundations of Religion (\(Uṣūl al-dīn\)) and Foundations of Islamic Jurisprudence (\(Uṣūl al-fiqh\)) to adaptively orient accordingly permissible practice from the CBT. Specifically, referring the foundations of exegesis (\(Uṣūl al-Tafsīr\)) when using the Qur’an and its exegesis like here.

Departing from the above-mentioned important preconditions, we shift to the understanding about sadness as offered by the Qur’an. Sadness is a recognized emotion in Islam and one of the first two emotions mentioned in the Holy Qur’an, before Adam was ordained to descend on the Earth (QS. 2: 38). Sadness is an emotion felt as a reaction when ‘something harmful/awful/wrong/bad (al-sū’: (Q:39: 61)) befell on us as human beings. Before it happens/we frustrate, it appears in the form of worry when we expect or suspect such events will be happening, because they are innately undesired to really happen.

Seemingly, it reflects the distant memory of the psyche (soul) about the better life experience in the heaven (\(Jannah\)) before being ordained to descend onto the Earth (QS. 2: 38) as the difficult life events of the earthly existence are non-existent in the Jannah (QS. 35: 34). At here-life (al-Dunyā) level, we can liken it the feelings of somebody who came from somewhere more safer, prosperous and technologically advanced place but have to migrate to somewhere less resourceful with the least technology one used to live easier with it previously, or like from lush land to arid or icy land, which is challenging to survive. Of course, that will induce strong

\(^{61}\) Beshai, Clark, and Dobson, “Conceptual and Pragmatic Considerations in the Use of Cognitive-Behavioral Therapy with Muslim Clients.”

\(^{62}\) Carrie Y. Al-Karam, Islamically Integrated Psychotherapy: Uniting Faith and Professional Practice. – Alkaram Institute (USA: Templeton Press, 2018), accessed September 2, 2020, https://alkaraminstitute.org/islamically-integrated-psychotherapy-uniting-faith-and-professional-practice/; Sabry and Vohra, “Role of Islam in the Management of Psychiatric Disorders.”
missing feeling and hopeful desire yearning to return to the better place than have to continuously endure sufferings and afflictions in the worse foreign place.

Allah SWT had warned the consequences of feeling fearful and sad, which are as ancient as the duration of human earthly existence (QS. 2: 38) against disobedience towards His Guidance both individually and more collectively. Allah Uses it as a tool to test the love feelings where human beings must love Him and the Prophet Muhammad above everything else as His servants (‘ibād Allah/Al-Rahmān) as the main reason He Created us, to worship Him (liya‘budūni in (QS. 51: 56).

The tests may appear in the form of: (i) fear, (ii) hunger and (iii) loss/lack of wealth or properties, selves or lives, and fruits or food (QS. 2: 155). Hence, when those tests happened, our fearful or sad emotions will play the role of a compass/sensor over measuring our initiatives in obeying His Guidance (QS. 2: 38). Provided, we follow His Guidance, so, nothing that we are fearful of will influence us badly, also, we will not continuously be sad (QS. 2: 38).

Basically, the Qur’an teaches us to say istirjā: ‘İnnā lillāhi wa innā ilayhi rāji‘ūn’ whenever any mishap befalls us, which means: “Indeed we are from Allah and to Him we will return.” Whoever said that Allah Promises him/her:

a) His Blessing (ṣalawāt min rabbihim)
b) His Mercy (raḥmah)
c) His Guidance (ihtiḍā’ - guiding instinct with extra bonus of pacifying effects (insyirah) and resiliency (tathbīt)63 or ease up the way out from any problem and reducing the feeling of sadness.64

The Qur’an also educates us to give the priority on putting efforts to avoid eternal sadness in the matters of the Hereafter (Al-Ākhirah) than of this life (al-Dunyā) (QS. 53: 58-60). We have to trust Allah (QS. 5: 11) that He is managing everything the best for

us where He affirms that whenever harm touches anyone, nobody could free from it except Him, neither anyone could withhold any bounty that is destined when He had granted so upon His wisdom (QS. 10:107). So, whatever happens in the duration of life, actually, Allah is the One who makes us laugh (happy) and cry (sad) (QS. 53: 43). He had predestined all the matters in details (QS. 3: 154, QS. 65: 3). In the end, we will return to Him (QS. 2: 46, QS. 2:156, QS. 21: 93, QS. 23: 60).

The Holy Qur'an also already guides us about what makes us occasionally feel sad - as we list it below:

**Elicitors of Sadness:**
1. Living on the Earth (QS. 2: 38)
2. Prophethood duties (QS. 2: 262-263, QS. 3: 176, QS. 5: 41, QS. 6: 33-35, QS. 36: 76), which may be equivalent to leadership or preaching responsibilities in the non-prophet human beings.
3. Usury (*Ribā*) (QS. 2: 276 – 277).
4. Rivalry especially from someone close to you e.g., a family member or friend (QS. 12: 13; QS. 12: 82-86, QS. 12: 100, QS. 28: 8).
5. When a person is obsessed and fixated on a saddening event and refused to let go but let the mishap of life to weaken and degrade himself (QS. 3: 139 & 146).
6. When somebody is tried with a series of adversity at the same time (QS. 3: 153).
7. Suspicion towards Allah with lack of trust and assurance to Him in managing his businesses in life (QS. 3: 154; 28: 10).
8. Loss of something like loss of the loved one(s) e.g., child (QS. 12: 84; QS. 20: 40; QS. 28: 7).
9. Unfortunate experience(s) (QS. 3: 153).
10. Facing hypocrisy from other people (QS. 3: 154-156).

---

65 E.g., as Allah Decreed the rivalry of Prophet Mūsā (Moses) a.s. as a cause of sadness to the Pharoah (Firaun) as his rival/enemy.
66 The Story of Prophet Jacob (Yaqūb) a.s. who lost his dearest son: Prophet Joseph (Yūsuf) a.s.
67 The story of Prophet Moses’ (Mūsā) a.s. mother.
11. The evil urging hypnotizing whisper of satan (nazgh al-shayṭān) infused into the soul (QS. 7:200, QS. 12: 100, QS. 17: 53, QS. 41: 36).
12. Misperception (QS. 3: 154, QS. 6: 148, QS. 18: 35-36, QS. 53: 28-35).
13. Sinful deed(s) especially from major sins specifically stated: (1) unlawful sexual intercourse (openly or secretly), (2) unfair oppression, (3) polytheism (shirk), and (4) saying fabricated things about Allah of which one has no knowledge (QS. 7: 33-37), (5) arrogance (QS. 27: 14).
14. Being harmed (‘ifsād)QS. 2: 10-16, 205, QS. 18: 94, QS. 47: 22).
15. Perceived Threat/Danger/Harm (QS. 9: 40, QS. 29: 33).
16. Consequence(s) from believing in fortune-telling e.g., in the story of Prophet Moses where the Pharoah issued law to kill all male new born babies of Israeli people (QS. 28: 4).
17. Being conspired against you (QS. 12: 1569; 16: 127; 27: 70; 29: 3370, 58: 1071),
18. Concern over people we care (QS. 20: 4072, QS. 29: 32-33).
19. Staining virginity or chastity of a lady with fabricated allegations (QS. 19: 18-2173).
20. Inexplicable mystical experience(s) which could shake the psychological state of a person, worse more, if one is to face it alone i.e., without any social and psychological support (QS. 19: 20-2374).
21. Strong pain e.g., childbirth pain especially alone (QS. 19: 2375).

---

68 Munir Baa'baki and Rohi Baalbaki, Al-Mawrid: English-Arabic and Arabic-English Dictionary (Lebanon, 2001).
69 The story of Prophet Joseph (Yūsuf) a.s. whereby his brothers conspired to make him out of their father’s sight in Chapter 12.
70 The story of Prophet Lot (Lūt) a.s. whose people were going to harm his guests.
71 In (QS. 58: 10) the literal term of whisper (najwā) or secret counsel corresponds conspiracy in the translation by King Fahd Complex for the Printing of the Holy Qur’ān.
72 The story of Prophet Moses’ (Mūsā) mother when he was a newborn.
73 The story of Mary (Maryam) who is Prophet Jesus’ (Īsā) a.s. mother.
74 The story of Mary (Maryam) who is Prophet Jesus’ (Īsā) a.s. mother.
75 The story of Mary (Maryam) who is Prophet Jesus’ (Īsā) a.s. mother.
22. Social reaction e.g., through harmful remarks or speech against someone especially when one was thought had broken any social sanctions (QS. 19: 21-39).  
23. Doubt and suspicion over one’s innocency (QS. 19: 34).  
24. Parent-child love relationship leaves both parties vulnerable due to sensitivity induced by the love feeling towards certain actions from either party; be it interactive between them or independently although it is from misunderstandings only actually or from harmful deeds/remarks from other people to either parties will influence the other party too (QS. 19: 28, QS. 12: 70-86, QS. 28: 7-10, QS. 28: 8).  
25. Trials of love (QS. 20: 39-41).  
26. Involved in killing case (QS. 20: 40).  
27. Unattainable desire(s) (QS. 3: 176, QS. 21: 23).  
28. During dying process (QS. 41: 30-31).  
29. Ill-treatment from others e.g., abusive remarks (QS. 2: 263, QS. 6: 33, QS. 10:65).  
30. Undergoing the Day of Judgment i.e., named as “The Day of the Greatest Horor” (Yawm al-Fazi’ al-Akbar) event (QS. 21: 103; 43: 66-68) that is why, among its names is “the Day of Grief” (Yawm al-Ḥasrat) in (QS. 19: 39).

Conclusion  
Actually, there is detailed information of everything in the Qur’an on any topic we need to know about living on the Earth including about sadness. We can exhaustively explain about sadness in terms of the wisdoms of experiencing this unique emotion, specific guidance on how to face it, and many more but the space is limited and does not permit us in one paper due to restricted word count permitted by the journal. We will continue the content supplement in the Part 2.

Disclosure of interest  
The authors report no conflict of interest.

76 The story of Mary (Maryam) who is Prophet Jesus’ (Ĭsā) a.s. mother
