Acknowledgements
K.J.T. thanks NWO for a Rubicon fellowship. F.H.L.K. acknowledges support by the 
Fundacio Cellex Barcelona, the ERC Career integration grant 294056 (GRANOP), the 
ERC starting grant 307806 (CarbonLight) and support by the E.C. under Graphene 
Flagship (contract no. CNECT-ICT-604391). F.J.G.d.A. acknowledges support from the 
Graphene Flagship CNECT-ICT-604391 and FP7-ICT-2013-613024-GRASP. The work at 
MIT has been supported by AFOSR grant number FA9550-11-1-0225, a Packard 
Fellowship, and the MISTI-Spain program. This work made use of the Materials Research 
Science and Engineering Center Shared Experimental Facilities supported by the 
National Science Foundation (NSF; award no. DMR-0819762) and of Harvard’s Center 
for Nanoscale Systems, supported by the NSF (grant ECS-0335765). P.G. thanks ANR 
project RAMACO (No. 12-BS08-0035-01).

Author contributions
F.H.L.K., P.J.-H., F.J.G.d.A., H.d.R. and K.J.T. conceived the experiment. K.J.T., L.O., M.B., 
S.C. and L.G. carried out the experiments. K.J.T., L.O., F.J.G.d.A., P.J.-H. and F.H.L.K. 
performed the data analysis. A.F., B.K., T.C., A.C., A.P., A.Z. and P.G. provided materials. 
G.N., M.B., L.O., S.N. and Q.M. fabricated the samples. F.J.G.d.A. developed the 
thoretical models. K.J.T., F.H.L.K., P.J.-H. and F.J.G.d.A. wrote the manuscript with the 
participation of all authors.

Additional information
Supplementary information is available in the online version of the paper. Reprints and 
permissions information is available online at www.nature.com/reprints.
Correspondence and requests for materials should be addressed to F.H.L.K.

ERRATUM
A universal origin for secondary relaxations in supercooled liquids and structural glasses 
Jacob D. Stevenson and Peter G. Wolynes
Nature Physics 6, 62–68 (2010); published online 1 November 2009; corrected after print 18 February 2015.

In the version of this Article originally published the equation for the distribution of free energy barriers, which follows equation 4, 
was incorrect and should have read:
\[
\Gamma(F^\dagger) = \frac{\partial}{\partial F^\dagger} \exp \left( -\frac{F_{\mathrm{in}}}{\delta f} - \frac{1}{2} F_{\mathrm{in} q}^2 \right) \times \left( 1 - \frac{\exp(F_{\mathrm{in} q}) - 1}{\exp(F^\dagger q) - 1} \right) \quad \text{if} \ F_{\mathrm{in}} < F^\dagger
\]

This has now been corrected in the online versions of the Article.
