Table S1. Description of ADHD measures within the groups defined by the short-term therapy outcome (n=136).

| Risk for dropout | ADHD screening (+); n - % | Completers (n=72) | Dropout (n=64) | p  |
|------------------|---------------------------|-------------------|----------------|----|
| Anorexia (n=31)  |                           | 1 5.0%            | 2 18.2%        | .235 |
| Bulimia (n=59)   |                           | 17 51.5%          | 12 46.2%       | .683 |
| OSFED (n=26)     |                           | 4 50.0%           | 5 27.8%        | .272 |
| BED (n=20)       |                           | 3 27.3%           | 2 22.2%        | .795 |

| Short term therapy outcome | Full/partial remission (n=56) | Dropout/non-remission (n=80) | p  |
|----------------------------|-------------------------------|-------------------------------|----|
| Anorexia (n=31)            | 1 6.7%                        | 2 12.5%                       | .583 |
| Bulimia (n=59)             | 15 57.7%                      | 14 42.4%                      | .244 |
| OSFED (n=26)               | 2 50.0%                       | 7 31.8%                       | .482 |
| BED (n=20)                 | 3 27.3%                       | 2 22.2%                       | .795 |

Note. OSFED: other specified feeding eating disorder. BED: binge eating disorder
Table S2. Description of ADHD measures within the groups defined by the short term therapy outcomes (n=136) and the follow-up (n=123).

| Treatment outcome          | Short-term therapy outcome                                      | Outcome at follow-up                                      |
|----------------------------|-----------------------------------------------------------------|----------------------------------------------------------|
| Completers                 | Dropout treatment                                              | Remission Non-remission                                  |
| Completers                 | Dropout treatment                                              | n=87 n=36                                                |
