Supplemental Table 1. Detailed information of samples selected for proteomic screening assay

| Samples | IP                                      | EP                                      |
|---------|-----------------------------------------|-----------------------------------------|
|         | Age, year; Gestational age, day; β-hCG (mIU/mL) | Age, year; Gestational age, day; β-hCG (mIU/mL) |
| 1       | 35; 41; 26127.9                          | 30; 54; 47975.8                        |
| 2       | 29; 43; 53407.4                          | 29; 48; 8656.5                         |
| 3       | 35; 56; 6293.1                           | 27; 69; 1086.9                         |
| 4       | 28; 67; 102720.6                         | 37; 41; 1125.7                         |
| 5       | 28; 49; 43764.6                          | 32; 49; 35257                          |
