Table S2. The DOPE score for each model selected.

For each structure, we constructed 100 models. The best model was selected based on the DOPE score (lower values are best). We also constructed Ramachandran plots for each model selected (available at http://bioinfo.dcc.ufmg.br/glutantbase/index.php/home/download).

| UniProt ID | Model selected | DOPE score  |
|------------|----------------|-------------|
| A3BMZ5     | 8              | 2655.425    |
