Supplemental Tables

Supplemental Table 1. RNA-seq analysis of all genes from NK cell stimulated with DMSO, IL-15, HODHBt, and IL-15 plus HODHBt from 4 donors. F= female and M= male.

Supplemental Table 2. Differentially expressed genes of NK cells stimulated with IL-15, HODHBt, and IL-15 plus HODHBt relative to DMSO control. Values are shown as mean from 4 donors.

Supplemental Table 3. Differentially expressed genes between IL-15 and IL-15 plus HODHBt treatment. Values are shown as mean from 4 donors.

Supplemental Table 4. Reactome pathway analysis. Top 25 pathways differentially regulated between IL-15 and IL-15 plus HODHBt treatment.
