LEKARI NA PODRUČJU TIMOČKE KRAJINE POSLE II SVETSKOG RATA

Petar Paunović

RAJAČKA ŠKOLA ZDRAVLJA, RAJAC

I

Period na koji se odnosi ovo istraživanje su prve posleratne godine: 1944., 1945. i 1946. godina. To su bile veoma teške godine u životu naroda na području Timočke krajine u kojima je zdravstvena zaštita stanovništva bila na niskom nivou. Potrebe stanovništva za zdravstvenom zaštitom daleko su prevazилe mogućnosti državne službe i privatne lekarske prakse. Stanovništvo u gradovima bilo je u povoljnijoj situaciji jer su lekari, osim u nekoliko seoskih naselja (Salaš, Jabukovac i Andrejevac), svi živeli i radili u gradovima. Brojni seoski lekarstveni osoblja, a posebno ono u zabačenim selima, teško je dolazilo do lekara i često umiralo i od bolesti koje je bilo moguće lečiti. Seosko stanovništvo se umiralo i od posledica povreda jer nisu bili u mogućnosti da blagovremeno potraže potrebu za lekarima na frontu i u vezi sa zavisnosti menjao, povećavajući se i ovo istraživanje imati u vidu da se oni ili po jedan lekar na 7387 stanovnika. Treba imati u vidu da se, s obzirom na vreme na koje se odnosi ovo istraživanje, broj lekara stalno menjao, povećavajući se i smanjujući, pre svega u zavisnosti od potreba za lekarima na frontu i u armijii, u tadašnjoj administraciji, u vezi sa mobilizacijom i demobilizacijom ili su se vratili iz zarobljeništva.

II

Lekari su stub zdravstvene zaštite nekog područja, a njima u radu pomaže zdravstveno osoblje. Iz jednog "Spiska sanitetskog osoblja na teritoriji okruga Zaječar na dan 27. aprila 1944. godine" vidljivo je da su lekari lečili bolesnike na području Timočke krajine. Pored bolesnih sa tog područja, pomoć sanitetskog osoblja u vidu lečenja očekivali su bolesni i ranjeni vojnici sa fronta, izbeglice i ratni zarobljenici. Iz pomenutog spiska se vidi da je u trenutku kada je on sačinjen na području Timočke krajine, "na licu mesta" bilo 39 lekara, ili po jedan lekar na 7387 stanovnika. Treba imati u vidu da se, s obzirom na vreme na koje se odnosi ovo istraživanje, broj lekara stalno menjao, povećavajući se i smanjujući, pre svega u zavisnosti od potreba za lekarima na frontu i u armijii, u tadašnjoj administraciji, u vezi sa mobilizacijom i demobilizacijom ili su se vratili iz zarobljeništva.

U Zaječaru su radili sledeći lekari:

Dr Milan B. Mitrović obavljao je dužnost poverenika, a Dr Branko P. Kosanović dužnost sanitetskog referenta Okružnog narodnog odbora. Referent saniteta komande bio je Dr Stanislav Tadić.

Dr Ahilo Grezo bio je lekar zaječarskog područja, Dr Jevrem Stanojević lekar rudnika "Srpski Balkan". Na dužnosti garnizonskog lekara bila je Dr Olga Pavlović, a lekar Sreskog narodnog odbora bio je Dr Radomir Nikolić.

Bolnički lekari u Zaječaru su bili:

Dr Ljubica Arsović, specijalista za unutrašnje bolesti -šef "unutrašnjeg odeljenja" bolnice, Dr Krunoslav Popović - upravnik bolnice i šef ginekološkog odeljenja, Dr Miroslav Grujić-Dordević -šef hirurškog odeljenja, Dr Desanka Dermanović-Ivanović -lekari u Domu zdravlja, Dr Čvetko Gligorjević -lekar grada Zaječara, Dr Leposava Stevović lekar-činovnik okružnog ureda u Zaječaru, Dr Mileva Kestić - privatna lekarska praksa u Zaječaru.

U Negotinu su radili sledeći lekari:

Dr Svetislav P. Atanasković, malarolog, upravnik zdravstvene stanice i sreski sanitarstveni referent Narodnog odbora, lekari komande mesta: Dr Nikola Andelković i Dr Darinka Letić-Nikolić.

U Negotinu su radili sledeći lekari:

Dr Božidar S. Ivković -upravnik bolnice bratinske blagajne i sreski zdravstveni referent, Dr Georgije Pedanov, hirurg, lekar bratinske blagajne,
DOCTORS IN TIMOČKA KRAJINA AFTER WORLD WAR II

MD Petar Paunović

RAJAC SCHOOL OF HEALTH, RAJAC

I

This research covers the period of early post-war years 1944, 1945 and 1946. Those were very difficult years in the life of the people in Timočka Krajina, with population healthcare at a low level. Population healthcare needs by far exceeded what the state and private medical practice could offer. The urban population was in a more favourable situation because doctors, except in a few rural settlements (Salaš, Jabukovac and Andrejevac), all lived and worked in the towns. The larger rural population, especially those in remote villages, found it difficult to reach doctors and often died from diseases that were treatable or from the consequences of injuries due to the inability to timely seek and receive medical help. For the purpose of describing the life and work of doctors in the area in more detail, archival material of the Historical Archives "Timočka krajina Zaječar (1,2)" was used in this paper.

II

Doctors are the pillar of healthcare system in an area, assisted in their work by medical staff. A "List of medical personnel on the territory of the district of Zaječar on the 27th April, 1944" shows which doctors treated patients in Timočka Krajina, where, in addition to patients from the area, sick and wounded soldiers from the front, refugees and prisoners of war sought medical treatment. From the abovementioned list, one can see that at the time when it was made in the area of Timočka krajina, there were 39 doctors "on site", or one doctor per 7,387 inhabitants. One should keep in mind that given the time covered by this research, the number of doctors was constantly changing, increasing and decreasing, primarily depending on the need for doctors at the front and in the army, in the then administration, in relation to mobilization and demobilization or to those who returned from captivity.

The following doctors worked in Zaječar:

MD Milan B. Mitrović, served as the commissioner, and MD Branko P. Kosanović, as the medical officer of the Regional People's Committee. The medical officer of the command was MD Stanislav Tadić. MD Ahilo Grezo was a doctor from the Zaječar area, MD Jevrem Stanojević was a doctor at the "Serbian Balkans" mine; MD Olga Pavlović was the garrison doctor, and MD Radomir Nikolić was the doctor of the District People's Committee.

Hospital doctors in Zajecar were:

MD Ljubica Arsović, an internal medicine specialist, was head of the "internal department" of the hospital,

MD Krunoslav Popović was hospital manager and the head of the gynaecology department,

MD Miroslava Grujić-Đorđević, was head of the department of surgery at the hospital, 

MD Desanka Đermanović-Ivanović, worked as a doctor in the health centre, 

MD Cvetko Gligorijević was the town doctor and MD Leposava Stevović was a doctor-clerk of the district office in Zaječar.

MD Mileva Kestić practiced private medicine in Zaječar.

The following doctors worked in Negotin:

MD Svetislav P. Atanasković, a malarialogist, was the manager of the healthcare facility and the district medical officer of the People's Committee, 

the doctors of the local command were MD Nikola Andjelković and MD Darinka Letić-Nikolić.

At the hospital, MD Midrag K. Kostić was a surgeon, hospital manager and head of the department of surgery. Head of the department of internal medicine of the hospital was MD Stanislava Ružić-Perić.

Private doctors in Negotin were MD Draginja Zdravković and MD Milan Đ. Stojković.

The following doctors worked in Bor:

MD Božidar S Ivković, served as manager of the hospital of Bratinske blagajne (a special type of social and health insurance for miners) and the district Medical Corps. Officer;
Dr Lepold Brničić, zabuni lekar bratinske blagajne, Dr Stevan Jokanović -lekar mesne bratinske blagajne, Dr Mihajlo Petrovski -lekar zdravstvene zadruge u Zlotu.

**U Knjaževcu su radili sledeći lekari:**
- Dr Leka Doković - sreski sanitetski referent Narodnog odbora,
- Dr Radmilo Janković v. d. upravnika bolnice,
- Dr Radomir Vladić, hirurg na hirurškom odeljenju bolnice,
- Dr Evgenija K. Fijošina - privatni lekar.

**Pored pomenitih, u drugim naseljima na području Timočke krajine radili su sledeći lekari:**
- Dr Radmilo Jokanović -v. d. upravnika u Boljevcu,
- Dr Jovan Panajotović -lekar bratinske blagajne u Majdanpekulu,
- Dr Stojan Nikolić dužnost sreskog referenta Narodnog odbora u Donjem Milanovcu,
- Dr Jovan Zguricos, Sreski sanitetski referent narodnog odbora u Andrejevcu,
- Dr Mirko Subotić - sreski sanitetski referent lekar komande mesta u Jabukovcu,
- Stevan Ilčić-sreski sanitetski referent Opštinskog narodnog odbora u Salašu,
- Privatni lekar u Kladovu bio je Dr Ljutica Đ. Dimitrijević.

U spisku o kome je reč pomenuti su još lekari Dr Branko Krstić, sanitetski major, Dr Dragutin Paunović i Dr Milutin Milenović koji su se vratili iz zarobljeni Đaković i Đaković koji su ponosni za rad.

U Knjaževcu su radili sledeći lekari:
- Dr Leka Doković - sreski sanitetski referent Narodnog odbora,
- Dr Radmilo Janković v. d. upravnika bolnice,
- Dr Radomir Vladić, hirurg na hirurškom odeljenju bolnice,
- Dr Evgenija K. Fijošina - privatni lekar.

- Dr Mirko Subotić - sreski sanitetski referent lekar komande mesta u Jabukovcu,
- Stevan Ilčić-sreski sanitetski referent Opštinskog narodnog odbora u Salašu,
- Privatni lekar u Kladovu bio je Dr Ljutica Đ. Dimitrijević.

U spisku o kome je reč pomenuti su još lekari Dr Branko Krstić, sanitetski major, Dr Dragutin Paunović i Dr Milutin Milenović koji su se vratili iz zarobljeni Đaković i Đaković koji su ponosni za rad.

Većina lekara na području Timočke krajine obavljala je poslove u državnoj službi kao poverenici zdravlja i sanitetski referenti okruga i srezova, lekari komande mesta i gradskog lekara, zatim su radili kao bolnički lekari, lekari bratinskih blagajni u Boru i Majdanpekulu, a samo mali broj bili su privatni lekari. Kako je bilo malo lekara a potrebe naroda za njima velike, bez obzira kakve su funkcije i dužnosti imali u tadašnjem sistemu zdravstvene zaštite, radili su, prema potrebi, istovremeno u bolnici, komandi mesta, po domovima zdravlja, narodnim ambulantama i bolnici i ambulantama, pri bratinskih blagajnama i svuda gde je to bilo potrebno. S obzirom na potrebe naroda za lečenjem, u 1945. godini dozvoljena je privatna lekarska praksa lekarima u slobodno vreme kada nisu na "zvaničnom mestu". U jednom aktu od 19. februara 1945. godine zdravstvenog odeljenja Povereništva za zdravlje ASNOS-a u Beogradu, Okružom narodnooslobodilačkom odboru u Zaječaru, jasno se stavlja do znanja da je zabranjeno raditi privatno, bez obzira na suprotnosti sa pravima oboljeleih "da za svoje lečenje mogu izabrati ili pozvati lekara koga žele". Dalje se kaže da "Privatna praksa nije zabranjena, niti se može zabraniti rešenjem ONO-a, a u tome smislu ne budu izdata naredjenja". Uz akt dostavljen je i pravilnik o nagradama koju su oni mogli naplatiti od bolesnika i to za jedan "dnevni pregled (od 6 časova ujutru do 8 časova posle podne)" - 250 dinara, a u stanu 350. Za intravensku injekciju naplaćivali su 160, za intramuskularnu 80 a za subkutanu 50 dinara.

Među lekarima o kojima je prethodno bilo reči, njih tridesetoro bili su muškarci i bilo je devet žena. Četiri su bile neunade, a dve udovice. Među muškarcima lekarima trojica su bili neoženjeni i jedan udovac. Najveći broj lekara bili su porodični ljudi sa većim brojem dece. Dvojica lekara su imali po četvero i troje dece. Po dva deteta bilo je u porodicama dvanaestoro lekara, a devetoro lekara je imalo po jedno. Bez dece je bilo četvero lekara. Muškaraca lekara je bilo najviše u uzrastnoj dobi između 41. i 50. godine - 18, i između 51. i 60. - 7. Po jedan lekar bio je u starostrini dobi od 21. do 30. godine života, od 31. do 40. i od 61. do 70. godine. Kada je reč o lekarima ženama, i tu je slična situacija. Pet lekarki je bilo u uzrastu između 41. i 50. godine starosti, a po jednu između 31. i 40. i 51. i 60. godine života. Lekari su dobro zarađivali, pa se može reći da su živeli bolje nego drugi. Većina je imala služavku.

Većina je imala služavku.

**III**

Jedan od razloga promena broja i sastava lekarskog kadra na području Timočke krajine bio je mobilizacija lekar za potrebe vojske. Iz jednog akta Okružnog narodnooslobodilačkog odbora od 2. februara 1945. godine može se saznati koje je sanitetsko osoblje mobilisano iz pomenutog okruga [3]. Povereništvo zdravlja Predsedništva ASNOS-a u Beogradu upozorenje je da bi zbog mobilisanja sanitetskog osoblja, među kojima je bilo najviše lekara, došlo do "posledica u sanitetskoj organizaciji Okruga koje se ne bi mogle popraviti i usled kojih bi trpeo i vojni i civilni sanitet."
MD Georgije Pedanov, surgeon and doctor of Bratinske blagajne
MD Lepold Brnčić, dentist, doctor of Bratinske blagajne,
MD Stevan Jokanović who was a doctor of the local branch of Bratinske blagajne.
MD Mihajlo Petrovski was a doctor at the health co-operative in Zlot.

The following doctors worked in Knjaževac:
MD Leka. Djoković, served as district medical officer of the People's Committee,
MD Radmilo Janković was acting hospital manager
MD Radomir Vladić, surgeon at the department of surgery at the hospital.
MD Evgenija K. Fijošina worked as a private doctor.

In addition to those mentioned, the following doctors also worked in Timočka krajina:
MD Radmilo Jokanović, served as acting manager in Boljevac,
MD Jovan Panajotović was a doctor at the Bratinske blagajne in Majdanpek and
MD Stojan Nikolić, served as the district clerk of the People's Committee in Donji Milanovac.
The district medical officer of the People's Committee in Andrejevac was MD Jovan Zguricos while the district medical officer doctor of the local command in Jabukovac was MD Mirko Subotić.
The duty of the district medical officer of the Municipal People's Committee in Salaš was performed by Stevan Ilić.
The private doctor in Kladovo was MD Ljutica Đ. Dimitrijević.

The abovementioned list also includes the following doctors: MD Branko Krstić, Medical Corps. major, MD Dragutin Paunović and MD Milutin Milenović, who returned from captivity and were "proposed to be taken over".
MD Milić Milivoje, who lived in Ganzigradska Banja spa, ill and unable to work, was mentioned.

Most doctors in Timočka krajina served in the civil service as health commissioners and district and medical officers of regions and district, doctors of the local command and town doctors, then worked as hospital doctors, doctors of Bratinske blagajne in Bor and Majdanpek, and only a small number of them were private doctors. As doctors were few and people's needs for them were great, regardless of the functions and duties they had in the then healthcare system, they parallely worked, as needed, in the hospital, local command, health centres, public clinics and hospitals and clinics at Bratinske blagajne and wherever it was absolutely necessary.

Given the needs of the people for treatment, in 1945, doctors were allowed to undertake private medical practice in their free time when they were not on an "official job". In an act dated on the 19th February 1945, the Health Department of the Health Commission of ASNOS in Belgrade made it clear to the District People's Liberation Committee in Zaječar that the ban for doctors to work privately was contrary to the rights of patients to "be able to choose or call for their treatment any doctor they want ". It further states that "private practice is not, nor can be prohibited by the decision of the ONO until orders are issued in that regard." Along with the act, a rulebook on the rewards they could collect from the patients was submitted for a "daily examination (from 6 am to 8 pm - 250 dinars, and in the patient's flat 350 dinars. For an intravenous injection they charged 160 dinars, for an intramuscular injection 80 dinars and for a subcutaneous one 50 dinars.

Among the doctors mentioned earlier, 30 of them were men and 9 were women. Four female doctors were single and two were widows. Among the male doctors, three were single and one was a widower. Most of the doctors were family people with a lot of children. Two doctors had four and three children respectively. Twelve doctors had two children each, and each of nine doctors had one child. Four doctors didn't have any children. Male doctors were mostly aged between 41 and 50 - 18 of them, and between 51 and 60 - 7 of them. One doctor was aged between 21 and 30, one between 31 and 40 and one between 61 and 70. When it comes to female doctors, the situation is similar. 5 of them were aged between 41 and 50, one between 31 and 40 and one between 51 and 60. Doctors made a lot of money, so it can be said that they lived better than others. Most of them had a maid.

III

One of the reasons for the changes in the number and composition of medical staff in Timočka krajina was the mobilization of doctors for army medical corps. From one act of the District People's Liberation Committee from the 2nd February, 1945, it is possible to find out
Ukupno je mobilisano 18 lekara i to: Dr Mićo Mićović, epidemiolog i upravnik Doma narodnog zdravlja, Dr Bosiljka Popović, šef tuberkulozni uođjenje bolnice, Dr Dimitrije Popović, specijalista za dečje bolesti iz Zaječara, Dr Stevan Jokanović, rudarski lekar u Boru, Dr Veljako Milanović, lekar komande mesta u Andrejevcu, Dr Stevan Ilić, sreski lekar u Sališu, Dr Dara Letić-Nikolić, specijalista zaraznih bolesti, Dr Stanslava Perić-Ružić, bolnički lekar i Dr Draginja Zdravković, privatni lekar iz Negotina, Dr Slavko Pištenić, sreski lekar i upravnik bolnice u Kladovu za vojnu bolnicu u Kruževcu.

Dr Mićo Mićović mobilisan je na dužnost lekara "14 korpusa bolnine", kao i Dr Dimitrije Popović, šef dečjeg odeljenja, Dr Radmilo Spalajković, specijalista za uho, grlo i nos i šef uođjenog odeljenja kao i Dr Časlav Babić, hirurg i šef hirurškog odeljenja zajetske bolnice. Pored pomenutih lekara, bio je mobilisan Dr Branko S. Milosavljević, privatni lekar, Dr Vladimir Kujundžić, lekar dečjeg doma u Negotinu, Dr Borivoje Ilić, saobračajni lekar iz Knjaževca i Dr Sotir Stavridis, hirur, hirurg i šef hirurškog odeljenja knjaževačke bolnice, Dr Kosta Mihajlović, referent sanitetske komande mesta u Bojjevcu, Dr Aleksandar D. Anastasijević, lekar komande mesta u Boru, Dr Milivoje S. Kosanović, sreski lekar u Sališu, Dr Miodrag Jelisijević, hirurg sanitetski major i Dr Svetolik Pacić, uredski lekar, Dr Božidar Stanovejlić, lekar školske poliklinike iz Zaječara i Dr Radomir Vlađić, hirurg i šef hirurškog odeljenja iz Knjaževca.

Okružni narodnooslobodilački odbor se zauzimao posebno da se demobilise Dr Slavko Pištenić koji je uživao veliko poverenje tadašnjih vlasti i obavlja važne javno-zdravstvene funkcije sreskog lekara i sanitetskog referenta Komande mesta u Kladovu i vodio bolnicu, i mesto njega mobilisuće Dr Ljutica Dimitrijević, privatni lekar, "bivši narodni poslanik i perjanica Stojadinović i Cvetković koji nije sposoban, ni poverljiv da zameni mobilisanog Dr Pištenića pri NOO, Komandi mesta i da vodi bolnicu [4], tako da bi bio pogodan za vojnu službu. "Traženo je da oslobodi mobilizacije Dr Stanislava Ružić-Perić, v.d. šefa unutrašnjeg odeljenja negotinske bolnice, jer je bila u šestom meseču trudnoće kao i da se umesto njih mobilise privatni lekar Dr Milan Stojkocić koji je bio neoženjen i bez dece. Odgovor na ovakve zahteve bio je da se tu ništa ne može uraditi jer je to "stvar vojnih vlasti i potrebe naše vojske". U prvim posle ratnim godinama bilo je teško naći meru kako da se obezbedi sanitetski kadar da ne tre po potrebe "narodnooslobodilačke vojske i civilne potrebe saniteta Okruga".

IV

Ministarstvo zdravlja Republike Srbije naredilo je 10. septembra da se popišu i registruju svi lekari i sačinjenik imenik lekara, kao i da se o registrovanju izda potvrda svakom lekaru koju će koristiti kada promeni mesto boravka i službu. Okružni narodni odbori imali su obavezu da, pošto sačinili pisak svojih lekara, posluži ga Ministarstvu koje je sačinilo glavni registar lekara za upisivanje u registar inačica lekara. În Spiskovka lekara objavljuju se osnovni biografski podaci uz svrshishodan komentar iz drugih izvora. Obaveza prijavljivanja lekara bila je neizbežna, jer bi oni lekari koji se nisu njoj podvrgli mogli biti kažnjeni. Kada se lekar upiše u registar dobija "pismenu potvrdu", a kada napusti područje gde radi, dužan je bio da se javi Okružnom narodnom odboru da dobije ispisnicu bez koje se ne može upisati u imenik Ogružnog odbora na čiju je teritoriju došao. Iz sačuvanih "Uptinika za lekare" koji su korišćeni za upisivanje u registar lekara na području Timočke krajine došlo se do biografskih podataka za sledeće lekare:

Jokanović Lj. Dr Stevan, lekar opšte prakse, na službi u bolnici bratinske blagajne u Boru, rođen je 5. oktobra 1899. godine u Ahenu u Nemačkoj, jugoslovenski državljanin. Bio je oženjen i ima dve sina: Ljubomira, Živorada, Miloša i Vol. 46 (2021) br. 1
which medical staffs were mobilized from the mentioned district (3). The Health Commission of the Presidency of ASNOS in Belgrade was warned that the recruitment of medical staff, most of whom were doctors, would have "consequences in the medical organization of the District that could not be remedied and as a result of which both military and civilian medical care would suffer."

A total of 18 doctors were mobilized: MD Mićo Mićović, epidemiologist and manager of the public health centre, MD Bosiljka Popović, head of the department of tuberculosis at the hospital, MD Dimitrije Popović, paediatrics specialist from Zaječar, MD Stevan Jokanović, doctor at the mine in Bor, MD Veljko Milanović, doctor of the local command in Andrejevac, MD Stevan Ilić, district doctor in Salaš, MD Dara Letić-Nikolić, infectious disease specialist, MD Stanislava Perić-Ružić, hospital doctor and MD Draganja Zdravković, private doctor from Negotin as well as MD Slavko Pišetlić, district doctor and manager of the hospital in Kladovo to the military hospital in Kruževac.

MD Mićo Mićović was mobilized as a doctor of the "14th Corps of the Hospital", and so was MD Dimitrije Popović, head of the children's department, MD Radmilo Spalajković, ear, throat and nose specialist, head of the department of otorhinolaryngology and MD Časlav Babić, surgeon and head of the department of surgery at Zaječar Hospital. Apart from the above-mentioned doctors, the following doctors were also mobilized: MD Branko S. Milosavljević, single, private doctor, MD Vladimir Kujundžić, doctor of the children's home in Negotin, MD Borivoje Ilić, traffic doctor from Knjaževac and MD Sotir Stavridis, surgeon and head of the department of surgery at Negotin hospital, MD Miodrag Jelisije, acting head of the internal department at the Negotin hospital, MD Stevan Jokanović, doctor of the local command in Salaš, MD Draganja Zdravković, private doctor from Negotin as well as MD Slavko Pišetlić, district doctor and manager of the hospital in Kladovo to the military hospital in Kruževac.

On the 10th September, the Ministry of Health of the Republic of Serbia ordered that all doctors be registered - and a directory of doctors be compiled, as well as that a certificate of registration be issued to each doctor when he changed his place of residence and service. Having made the list of their doctors, the district people's committees were obliged to send it to the Ministry, which then compiled the main directory for Serbia. From the lists of doctors, basic biographical data from other sources were published along with appropriate commentary. The obligation to register doctors could not be avoided, because those doctors who did not submit to it could be punished. When a doctor was entered in the register, he received a "written confirmation", so that when he left the area where he worked, he was obliged to contact the District People's Committee to get a certificate of withdrawal without which he could not be remedied and as a result of which both military and civilian medical care would suffer..."
rođen je 31. marta 1887. godine u Neorosuču, u polotvoksoj guberniji u Rusiji. Rus je po poreklu, "jugoslovenski podanik" pravoslavne veorisopovesti. Bio je oženjen i imao je sina Evgenija i čerku Katarinu. Diplomirao je na medicinskom fakultetu u Odesi 6. septembra 1913. godine. Pravo na lekarsku praksu dobio je oktobra 1924. godine. Govorio je ruski i srpski. Posle kapitalacije Jugoslavije zaposlio se kao lekar hirurške blagajne borskog rudnika. U narodnooslobodilačkoj borbi je učestvovao "idejno".

Ivković S. Dr Božidar, lekar opšte prakse, upravnik bolnice bratinske blagajne borskog rudnika, rođen je 1902. godine u Prokuplju. Radio je honorarno kao zdravstveni referent za borski srez. Bio je Srb, jugoslovenski državljan, pravoslavne veorisopovesti. Imao je ženu Sofiju i sinu Danila. Diplomirao je na Medicinskom fakultetu u Beogradu 1931. godine. Pravo na lekarsku praksu imao je od 1932. godine. Služio se francuskim i nemačkim jezikom. Od kapitalacije Jugoslavije 14. aprila 1941. pa do 25. avgusta 1942. proveo je u Nemačkoj kao jugoslovenski ratni zarobljenik, a od januara 1943. godine radio je lekar u bolnici bratinske blagajne borskog rudnika u Boru. Nije učestvovao u narodnooslobodilačkom pokretu. Bio je oženjen, bez dece. Stanovao je u borskom rudniku u Sarajevkoj ulici broj 1.

Panajotović J. Dr Jovan, lekar bratinske blagajne u Majdanpek, rođen je 1877. godine u Beogradu. Završio je Medicinski fakultet u Gracu u Austriji. Pravo na lekarsku praksu imao je od 1906. godine. Govorio je nemački jezik. Vreme od kapitalacije Jugoslavije do oslobođenja proveo je u Beogradu i Majdanpek, gde je i posle toga radio kao lekar bratinske blagajne. U narodnooslobodilačkoj borbi nije učestvovao zbog starosti i bolesti. Bio je oženjen i bez dece.

Gligorijević I. Dr Milan, sreski sanitetski referent, rođen je 14. septembra 1895. godine u Donjem Milanovcu. Sporedna služba mu je bila lekar bratinske blagajne u Donjem Milanovcu i Direkcije rečne plovidbe. Bio je Srb po poreklu, jugoslovenski državljan, pravoslavne vere. Medicinski fakultet završio je 1930. godine u Beogradu. Pravo na lekarsku praksu imao je od 1931. godine. Nije imao posebnu specijalnost u struci. Govorio je nemački, francuski i rimunski. Nemci su ga zarobili 1941. godine kao upravnika vojne bolnice u Kruševcu i pustili kući u maju mesecu kao bolesnom. Od tada je živeo u Donjem Milanovcu kao otpušten iz državne službe od okupatora. Dobrovoljno je stupio u jedinice, radio je kao lekar u hirurškoj ekipi tih jedinica i kao epidemiolog do 30. marta 1945. godine, učestvujući u svim borbama tih jedinica po Srbiji i Bosni. Bio je oženjen i imao je dva sina.

From the preserved “Questionnaires for doctors” which were used for registering in the register of doctors in Timočka krajina, biographical data were obtained for the following doctors:

**MD Jokanović Lj. Stevan**, a general practitioner, serving in the hospital of Bratinske blagajne in Bor, was born on the 5th October, 1899 in Aachen, Germany. He was a Serb of Orthodox faith, a Yugoslav citizen. He was married and had four sons: Ljubomir, Zivorad, Miloš and Vojislav. He graduated from the Faculty of Medicine in Belgrade in 1928, and in 1929 he acquired the right to work. He spoke Serbian and also used French and German. During the war, he worked in Brestovačka Banja spa as the manager and spa doctor and as a doctor at the hospital of Bratinske blagajne. He took part in the national liberation struggle “ideologically and propagandistically”. He dwelled in “the Bor mine” at 10, Sarajevska Street.

**MD Pedanov I. Georgije, surgeon**, doctor at the hospital of Bratinske blagajne of the Bor mine, was born on the 31th March, 1887 in Ne³orôš, in Poltava province in Russia. He was a Russian, a “Yugoslav subject” of Orthodox faith. He was married and had a son, Evgeni, and a daughter, Katarina. He graduated from the Medical Faculty in Odessa on the 6th September, 1913. He acquired the right to practice medicine in October 1924. He spoke Russian and Serbian. After the capitulation of Yugoslavia, he got a job as a surgeon at Bratinske blagajne at the Bor mine. He participated “ideologically” in the national liberation struggle.

**MD Ivković Božidar**, a general practitioner, manager of the hospital of Bratinske blagajne of the Bor mine, was born in 1902 in Prokuplje. He worked part-time as a medical officer for the Bor district. He was a Serb, a Yugoslav citizen, of Orthodox faith. He had a wife Sofija and a son Danilo. He graduated from the Medical Faculty in Belgrade in 1931. He acquired the right to practice medicine in 1932. He spoke French and German. From the moment of the capitulation of Yugoslavia, on the 14th April, 1941, until the 25th August, 1942, he spent time in Germany as a Yugoslav prisoner of war, and from January 1943 he worked as a doctor in the hospital of Bratinske blagajne of the Bor mine in Bor. He participated in the national liberation struggle “ideologically”. He lived in the Bor mine at 2, Ljubljańska Street.

**MD Anastasijević D. Aleksandar**, general practitioner in the hospital of Bratinske blagajne of the Bor mines in Bor, was born on the 16th July, 1900 in Kragujevac. He was also a doctor at the local people’s committee in Bor. He was a Serb, a Yugoslav citizen, of Orthodox faith. He graduated from the Medical School in Vienna in 1927. He had had the right to practice medicine since 1929. He spoke French and German. He spent the time during the capitulation as a doctor in the hospital of Bratinske blagajne in Bor. He participated “ideologically” in the people’s liberation movement. He was married, without children. He lived in the Bor mine at 5 a, Sarajevska Street.

**MD Džinić Fadil**, gynecologist and surgeon, doctor of the department of surgery at the hospital of local Bratinske blagajne in Bor, was born on the 28th September, 1909 in Banja Luka. He was a Croat, a Yugoslav citizen, of Muslim faith. He graduated from the Faculty of Medicine in Zagreb. He spoke French and German. From the moment of the capitulation of Yugoslavia until 1942, he spent time as an assistant at a gynaecological clinic in Zagreb, and from that year until the liberation he worked in Germany. After the Liberation for a while, he worked at the 4th ward of the Main Military Hospital in Zagreb, and after that to this moment in the hospital of Bratinske blagajne of the Bor mine. He was married and had a daughter, Farida.

**MD Brenčić J. Leopold**, a dentist at the hospital of local Bratinske blagajne in Bor, a specialist in oral and dental diseases, was born on the 13th October, 1905 in Petac, Slovenia. He was a Slovenian, a Yugoslav citizen, of Catholic faith. He graduated from the Medical faculty in Prague. From the moment of capitulation of Yugoslavia until the liberation, he worked as a dentist in the hospital of local Bratinske blagajne in Bor. He did not participate in the People’s liberation movement. He was married, without children. He lived in the Bor mine at 1, Sarajevska Street.

**MD Panajotović J. Jovan**, doctor of Bratinske blagajne in Majdanpek, was born in 1877 in Belgrade. He graduated from the Faculty of Medicine in Graz, Austria. He had had the right to practice medicine since 1906. He spoke German. He spent the time from the capitulation of Yugoslavia until the liberation in Belgrade and Majdanpek, where he still worked as a doctor for Bratinske blagajne. He did not take part in the national liberation struggle due to his age and illness. He was married, without children.

**MD Gligorijević I. Milan**, district medical officer, was born on the 14th September, 1895 in Donji Milanovac. His “secondary service” was a doctor of Bratinske blagajne in Donji Milanovac and the Directorate of River Navigation. He was a Serb, a Yugoslav citizen, of Orthodox faith. He graduated from the Faculty of Medicine in Belgrade in 1930. He had had the right to practice medicine since 1931. He did not have a particular specialty in the profession. He spoke German, French and Romanian.

As the manager of the military hospital in Kruševac in 1941, he was captured by the Germans and released home in May as a patient. Since then, he lived in Donji Milanovac, fired from the civil service by the occupiers. On the 9th September, he voluntarily joined the units of the 25th Division, as a doctor of the 16th Brigade. He worked as a doctor in the surgical team of those units and as an epidemiologist until the 30th March, 1945, taking part in all the battles of these
Srbin po poreklu, jugoslovenski državljanin, pravoslavne veroispovesti. Završio je Medicinski fakultet u Parizu 1924. godine. Pravo na lekarsku praksu imao je od 1925. godine.
