Demonstrating the possibility to change the trajectory of a solid without a rudder according to the TID.

Prototype I: Fixed torque Torpedo submarine.
Prototype II: Variable torque Torpedo submarine

Prototype I: Design of the remotely controlled fixed torque Torpedo submarine: 1. Propeller; 2. Stern; 3. Motor; 4. Ballast; 5. Battery; 6. Velocity changer; 7. Radio control receptor; 8. Pressure valve.
# TABLE OF CONTENTS

**Volume 2  Number 3  June 2012**

| Title                                                                 | Authors                                                                 | Page |
|----------------------------------------------------------------------|------------------------------------------------------------------------|------|
| Mathematical Analysis of Unsteady MHD Blood Flow through Parallel Plate Channel with Heat Source | I. M. Eldesoky                                                          | 131  |
| Application of He’s Variational Iterative Method for Solving Thin Film Flow Problem Arising in Non-Newtonian Fluid Mechanics | A. M. Siddiqui, A. A. Farooq, T. Haroon, M. A. Rana, B. S. Babcock     | 138  |
| Vibration Control of a Plate Subjected to Impulsive Force by Plate-Type Dynamic Vibration Absorbers | H. S. Bouna, B. R. Nana Nbendjo                                        | 143  |
| Evolution of Hydrodynamic Instability on Planar Jelly Interface Driven by Explosion | T. Wang, J. S. Bai, W. B. Huang, Y. Jiang, L. Y. Zou, P. Li, D. W. Tan  | 152  |
| Evaluation of the Reliability Performance of Failure Criteria for Composite Structures | A. J. Kolios, S. Proia                                                 | 162  |
| An Analytical Approach for Degree Correlations in Complex Network     | K. Takagi                                                              | 171  |
| Analysis of Dynamics Fields in Noninertial Systems                    | G. Barceló                                                            | 175  |

The figure on the front cover is from the article published in World Journal of Mechanics, 2012, Vol. 2, No. 3, pp. 175-180 by Gabriel Barceló.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: wjm@scirp.org
World Journal of Mechanics (WJM) is an international peer-reviewed journal dedicated to presenting the English original research studies, reviews in the general field of mechanics including the mechanics of solids, structures and fluids and their interaction.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Applied Mathematics and Mechanics
- Biomechanics and Modeling in Mechanobiology
- Celestial Mechanics and Dynamical Astronomy
- Classical and Quantum Aspects of Mechanics
- Computational Mechanics
- Computer Methods in Applied Mechanics and Engineering
- Continuum Mechanics and Thermodynamics
- Damage Mechanics
- Dynamics and Vibration Control
- Elasticity and Plasticity
- Engineering Fracture Mechanics
- Environmental Fluid Mechanics
- Experimental Mechanics
- Fluid Mechanics and Aerodynamics
- Mathematical Fluid Mechanics
- Mathematics and Mechanics of Solids
- Mechanical Behavior of Biomedical Materials
- Mechanical Engineering Science
- Mechanical Systems and Signal Processing
- Mechanics & Astronomy
- Mechanics and Materials in Design
- Mechanics in Medicine and Biology
- Mechanics of Materials
- Mechanics of Time-Dependent Materials
- Microfluidics
- Micromechanics and Microengineering
- Multi-Scale Mechanics
- Nanomechanics
- Non-Linear Mechanics
- Non-Newtonian Fluid Mechanics
- Numerical and Analytical Methods in Geomechanics
- Probabilistic Engineering Mechanics
- Rock Mechanics and Mining Sciences
- Solid and Structural Mechanics
- Statistical Mechanics and Its Applications
- Terramechanics
- Theoretical and Applied Fracture Mechanics
- Thermophysics and Aeromechanics
- Thin Film Mechanics
- Viscoelasticity

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of World Journal of Mechanics.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
