Belief and values explain international differences in perception of solar radiation management: insights from a cross-country survey

Contribution of the Palaeozoic to albedo of the dimensionless surface of climate changes in China (Prime part)

Complexing climate futures: shared socio-economic pathways and climate

Advancing values-based approaches to climate change adaptation: A case study from Australia

Community-toprivate partnership in enhancing farmers’ adaptation to drought: Insights from the Lijiang Flatland in the Nu River Upper Salween valley, China

 Participatory GIS as a Tool for Stakeholder Engagement in Building Resilience to Sea Level Rise: A Demonstration in Project identifying and quantifying landscape perspectives on integrated flood risk management

 Effectiveness of gaming for communicating and teaching climate change

 Assessing the Capacity to Govern Flood Risk in Cities and the Role of Contextual Factors

 Of Climate and Weather: Examining Canadian Farm and Livestock Organization Discourses from 2010 to 2015

 An institutional analysis to address climate change adaptation in Tenerife (Canary Islands)

 From network to meshwork: Becoming attuned to difference in transdisciplinary environmental research encounters

 An Assessment of the Relationships between Extreme Weather Events, Vulnerability, and the Impacts on Human Wellbeing in Latin America

 Attaining urban water sustainability in Hong Kong: Three suggestions

 Understanding Local Sea Level Rise Risk Perceptions and the Power of Maps to Change Them: The Effects of Distance and Doubt

 The Lancet Countdown on health and climate change: from 25 years of inaction to a global transformation for public health

 The relative importance of subjective and structural factors for individual adaptation to climate change by forest owners in Sweden

 Social justice in the context of adaptation to climate change reflecting on different policy approaches to distribute and alleviate flood risk management

 Characterizing uncertain sewer input projections to support investment decisions

 Thai Lacet Countdown on health and climate change from 25 years of inertia to global transformation for public health

 Collaborative Governance for Climate Change Adaptation: Mapping citizenship-interactions quality interactions

 Climate change impacts on natural resources and communities: Agroecosystem approach for management

 National guidance for adapting to coastal hazards and seawall level. Anticipating change, when and how to change pathway

 Understanding Local Sea Level Rise: Perceptions and the Power of Maps to Change Them: The Effects of Distance and Doubt

 Building coastal defense capacity: supporting tribal agriculture and natural resources in a changing climate

 Adaptive and interactive climate futures: systematic review of ‘ ‘serious games’ ‘ for engagement and decision-making

 Business attitudes towards budgetary ecosystem services provided by urban forests

 Attaining urban water sustainability in Hong Kong: Three suggestions

 An Assessment of the Relationship between Extreme Weather Events and Impacts on Health in Three Mediterranean Euro cases

 From network to meso-scale: Becoming attuned to difference in transdisciplinary environmental research encounters

 Towards a climate change adaptation strategy for national parks: Adaptive management pathways under dynamic risk

 An institutional analysis to address climate change adaptation in Tenerife (Canary Islands)

 Experimental climate change education: Challenges of conducting mixed-methods, inter-disciplinary research in San Juan Islands, WA and Oakland, CA

 The AQA A level Countdown on health and climate change: Australian policy action from threats from

 Mapping Discourses of Climate Change Adaptation in the United Kingdom

 Climate Change: Examining Canadian Farm and Livestock Discourses from 2010 to 2015

 Awareness, Risk Perception, and Protective Behaviours for Extreme Heat and Climate Change New York City

 Assessing the Capacity to Govern Flood Risk in China and the Role of Contextual Factors

 Effectiveness of gaming for communicating and teaching climate change

 A systems approach to understanding contributions to the Australian community adaptation to flood risk

 Mapping urban planning organizations and climate change adaptation

 Using future scenario planning as a tool for informing decision making on infrastructure interventions in Kibera, Nairobi in Kenya

 Mapping Out Climate Change: Assessing How Coastal Communities Adapt Using Alternative Future Scenarios

 Business attitudes towards budgetary ecosystem services provided by urban forests
