**Figure S3: p18 ablation did not affect cell proliferation in small intestinal epithelium crypts.**

(a) Immunofluorescence staining for p18 and Ki67 in small intestine sections. DIC images are also shown. Scale bar, 50 µm. (b) Quantification of Ki67⁺ cells per crypt in control and p18 KO crypts in the small intestine. Values are representative of mean ± s.e. control n = 30, p18 KO n = 27. n.s., not significant, Student’s t-test.
