Supplementary File 2. Pearson’s correlations among gross motor, fine motor and cognitive scores at 12 months.

|                  | Gross motor | Fine motor | Cognitive |
|------------------|-------------|------------|-----------|
| 12 months        |             |            |           |
| Gross motor      | -           | 0.478      | 0.486     | 0.001     |
| Fine motor       | -           | -          | 0.507     | 0.001     |

*Note.* Raw scores of locomotor (locomotor subscale), eye and hand coordination (eye and hand coordination subscale) and performance (performance subscale) of the Griffiths Mental Development Scales were used. Significant results (p < .05) are in bold.
