Chief Editors: Weng Cho Chew and Sailing He

EMW Publishing
Cambridge, Massachusetts, USA
CONTENTS

An Ultra-Thin Wideband Reflection Reduction Metasurface Based on Polarization Conversion
Tiancheng Han, Kaihuai Wen, Zixuan Xie, and Xiuli Yue ........................................... 1

Recent Progress on Achromatic Metalenses
Qikai Chen, Yitian Liu, Yaoyuan Lei, Sijie Pian, Zhuning Wang, and Yaoguang Ma ............. 9

Portable 4D Snapshot Hyperspectral Imager for Fast Spectral and Surface Morphology Measurements
Jing Luo, Zijian Lin, Yuxin Xing, Erik Forsberg, Chengdong Wu, Xinhua Zhu, Tingbiao Guo, Gaoxuan Wang, Beilei Bian, Dun Wu, and Sailing He .................................................. 25

Massively Parallel Multilevel Fast Multipole Algorithm for Extremely Large-Scale Electromagnetic Simulations: A Review
Wei-Jia He, Xiao-Wei Huang, Ming-Lin Yang, and Xin-Qing Sheng ................................. 37

On Fresnel-Airy Equations, Fabry-Perot Resonances and Surface Electromagnetic Waves in Arbitrary Blanisotropic Metamaterials
Maxim Durach, Felix Williamson, Jacob Adams, Tonilynn Holtz, Pooja Bhatt, Rebecka Moreno, and Franchescia Smith ................................................................. 53

VOC Detections with Optical Spectroscopy
Yuxin Xing, Gaoxuan Wang, Tie Zhang, Fengjiao Shen, Lingshuo Meng, Lihui Wang, Fangmei Li, Yuqi Zhu, Yuhao Zheng, Nan He, and Sailing He .......................... 71

Spoof Surface Plasmons Arising from Corrugated Metal Surface to Structural Dispersion Waveguide
Liangliang Liu and Zhuo Li ..................................................................................... 93

A Physics-Based HIE-FDTD Method for Electromagnetic Modeling of Multi-Band Frequency Selective Surface
Hao Xie, Tielun Hu, Zhili Wang, Yanbin Yang, Xiaohui Hu, Wei Qi, and Hong Liu ....... 129

Tamm States and Gap Topological Numbers in Photonic Crystals
Junhui Cao, Alexey V. Kavokin, and Anton V. Nalitov ............................................. 141

Millimeter-Wave Wideband High Efficiency Circular Airy OAM Multibeam with Multiplexing OAM Modes Based on Transmission Metasurfaces
Hui-Fen Huang and Hong-Ming Huang ................................................................. 151
