**S4 Fig.** Receiver operative characteristic curves for grade ≥ 2 lower gastrointestinal (GI) toxicities versus cumulative EQD$_2$ D$_{2cc}$ of sigmoid colon (A), grade ≥ 2 lower GI toxicities versus cumulative EQD$_2$ D$_{2cc}$ of rectum (B), grade ≥ 2 urinary toxicities versus cumulative EQD$_2$ D$_{2cc}$ of bladder (C), grade ≥ 2/3 lower GI toxicities versus cumulative EQD$_2$ of rectal point (D). (A-C) Calculated based on data from the image-guided brachytherapy group. (D) Calculated based on data from the conventional brachytherapy group. CI, confidence interval.
