Table 1

| Peptide   | Description | Acylphosphatidylethanolamine (AP-2) Activity (nmol/mg) |
|-----------|-------------|--------------------------------------------------------|
| Peptide 1 | WT          | 0.50                                                   |
| Peptide 2 | G19V        | 0.52                                                   |
| Peptide 3 | T24N        | 0.55                                                   |

**Note:** The table presents the acylphosphatidylethanolamine (AP-2) activity in nmol/mg for different peptides under various conditions.
