CORRECTION

Correction: IDO1 and IDO2 Non-Synonymous Gene Variants: Correlation with Crohn's Disease Risk and Clinical Phenotype

Alexander Lee, Navya Kanuri, Yuanhao Zhang, Gregory S. Sayuk, Ellen Li, Matthew A. Ciorba

Table 2 is incorrect. Please see the corrected Table 2 here.
### Table 2. Expected and identified frequency of patients with IDO2 Variant Alleles.

| rs4503083 (T to A) | Predicted Minor allele frequency | Recessive Logistic Model | Number (and %) of minor alleles |
|---------------------|----------------------------------|--------------------------|---------------------------------|
| Y359stop            | 10.9%–50.0%                     | Estimate coefficient     | P-value                         |
|                     | -1.295                           | White                    | Race                            |
|                     |                                  |                          | Non-IBD (N = 177)              |
|                     |                                  |                          | CD (N = 686)                    |
