### Supplementary Table S3. Duplicate tests and tests not completed for the overall GlauCAT survey, and by quality of life domain

| Total tests taken, n=1701 | Duplicate tests, >1 score generated for a single participant | Not completed, no score generated |
|---------------------------|------------------------------------------------------------|----------------------------------|
| **Overall survey**        | 45 (2.6%)<sup>a</sup>                                      | 34 (2.0%)<sup>b</sup>            |
| **Ocular Comfort**        | 14 (0.8%)                                                  | 13 (0.8%)                        |
| **Activity limitation**   | 11 (0.6%)                                                  | 5 (0.3%)                         |
| **Mobility**              | 9 (5.3%)                                                   | 3 (0.2%)                         |
| **Emotional well-being**  | 4 (0.2%)                                                   | 2 (0.1%)                         |
| **Concerns**              | 3 (0.2%)                                                   | 2 (0.1%)                         |
| **Treatment convenience** | 4 (0.2%)                                                   | 9 (5.3%)                         |

<sup>a</sup>Reasons for test duplication: Test interrupted due to clinic flow (e.g. patient called to see the doctor) and some tests retaken; n=23; Technical glitch (e.g. testing ceased midway through survey) and some tests retaken (n=18); Unknown (n=4)

<sup>b</sup>Reasons for non-completion: Test ceased because of >7 N/A responses (n=18); Test interrupted due to clinic flow (e.g. patient called to see the doctor; n=5); Technical glitch (n=4); Study-related issue, e.g. wrong ID entered, or screen fail (n=6); Unknown (n=1)
