### Table S1 Distribution of patients from 7 hospitals

| Hospital                                           | Clindamycin Group | FuRong Group | Total  |
|----------------------------------------------------|-------------------|--------------|--------|
| Peking University Shenzhen Hospital           | 3(7.3)            | 4(10.3)      | 7(8.8) |
| The First Affiliated Hospital of Xi'an Jiaotong University | 3(7.3)            | 2(5.1)       | 5(1.3) |
| Second Affiliated Hospital of Chongqing Medical University | 6(14.6)           | 6(15.4)      | 12(15.0)|
| Shandong University Qilu Hospital               | 10(24.4)          | 11(28.2)     | 21(26.3)|
| Xuzhou Central Hospital                         | 3(7.3)            | 1(2.5)       | 4(5.0) |
| The First Affiliated Hospital of Tianjin University of Traditional Chinese Medicine | 8(19.5)           | 9(23.1)      | 17(21.3)|
| Nanjing Maternal and Child Health Care Hospital | 9(22.0)           | 6(15.4)      | 14(17.5)|
| Total                                             | 41(100)           | 39(100)      | 80(100)|

Data presented as n (%)

### Table S2 Diagnosis during the follow-up period

| Diagnosis | Clindamycin Group | FuRong Group | P value |
|-----------|-------------------|--------------|---------|
|           | (n=41)            | (n=39)       |         |
| V2        |                   |              | 0.67    |
| Single AV | 6                 | 5            |         |
| Single BV | 4                 | 3            |         |
| AV+BV     | 3                 | 4            |         |
| V3        |                   |              |         |
| Single AV | 1                 | 3            | 0.34    |
| Single BV | 4                 | 5            |         |
| AV+BV     | 9                 | 8            |         |
