Letters is one of the basic topics of Persian Grammar and divided to three general groups: Preposition, Conjunction, and Sign. Most important and valuable letter in the grammar is "V" ("and" in English). We find better the importance of this letter when we study its grammar roles. In the first part of this research, we mention the meanings of the letter V that the Grammar researchers have written before, by the poetic example from Sa'adi. In the Second part, we introduce and mention some new and exquisite meanings that nobody has mentioned before. Consequence is that letter V in Sa'adis poems has 32 different and separate meanings. We introduce all those meanings in this research in details.

Between all of these works, a book by the name of "The Grammar of Persian Language, the Book of Preposition and Conjunction" by Khalil Khatib Rahbar is an exception. This book has defined and divided the letters and described their meanings and usages perfectly. Topic of letters, specially conjunction V is a interesting topic that even Mohammd reza Shafiei Kadkani as a one of most famous and effective researchers in Persian Literature has noticed to this topic in his book "The Music of the poem" and invite the researchers of Persian Literature an language to study the meaning of letter V in Sadi's poems (Shafiee Kadkani, 2005).
