In the article "High-frequency representation of a single \( V_{\mu} \) gene in the expressed human B cell repertoire" by A. K. Stewart, C. Huang, B. D. Stollar, and R. S. Schwartz (February 1993, 177:409), Figure 5 was printed incorrectly. The correct version of Figure 5 and its legend appear below.

**Figure 5.** Nucleotide sequences of the CDK3 segments of the 12 \( V_{\mu}18/2 \) hybridizing plaques. Areas with identity to known germline gene segments are shown in bold type, mutations in plain type. These sequence data are available from EMBL/GenBank/DDBJ under accession numbers X67060-X67074.
