Bousla, Sid Ali
Nontrivial upper bounds for the least common multiple of an arithmetic progression.
(English) Zbl 07425645
Asian-Eur. J. Math. 14, No. 8, Article ID 2150138, 8 p. (2021)

MSC:
11A05 Multiplicative structure; Euclidean algorithm; greatest common divisors
11B25 Arithmetic progressions

Keywords:
least common multiple; arithmetic progressions

Full Text: DOI
