Supplementary Fig. 3
original images of western blots

Fig 2a MSFCs and sEOC cells
Fig 2a MSFCs and sEOC cells
Fig3c. K48
Fig3c. Beta-catenin
Fig3d.

- Beta-catenin: 92kDa
- Twist: 21kDa
- Twist+GFP: 48kDa
- GAPDH: 36kDa
Fig 5b

- GAPDH: 36kDa
- Axin2: 95kDa
- Beta-catenin: 92kDa
• We added the original, unprocessed images of western blots (Fig2a, Fig3c, Fig3d, Fig5b, Fig5c) in supplementary material.

• Unfortunately, The western blots did in Yale University are missing because of the work mobility (GangYin came back to China from Yale University, Gil Mor moved to Wayne State University from Yale University).
