Erratum regarding missing Declaration of Competing Interest statements in previously published articles

Declaration of Competing Interest statements were not included in published version of the articles that appeared in previous volumes of Brain, Behavior, & Immunity – Health.

Please see the appropriate Declaration of Competing Interest statements below.

1) Impact of physical activity on monocyte subset CCR2 expression and macrophage polarization following moderate intensity exercise. Brain, Behavior, & Immunity – Health, Volume 2, February 2020, 100033.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

2) P2x7 receptors control demyelination and inflammation in the cuprizone model. Brain, Behavior, & Immunity – Health, Volume 4, April 2020, 100062.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

3) Three insights on psychoneuroimmunology of mood disorders to be taken from the COVID-19 pandemic. Brain, Behavior, & Immunity – Health, Volume 5, May 2020, 100076.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

4) Acute transverse myelitis associated with SARS-CoV-2: A Case-Report. Brain, Behavior, & Immunity – Health, Volume 5, May 2020, 100091.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

5) Isolation, social stress, low socioeconomic status and its relationship to immune response in Covid-19 pandemic context. Brain, Behavior, & Immunity – Health, Volume 7, August 2020, 100103.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

6) Emerging immune and cell death mechanisms in stroke: Saponins as therapeutic candidates. Brain, Behavior, & Immunity – Health, Volume 9, December 2020, 100152.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

7) A review of potential microbiome-gut-brain axis mediated neurocognitive conditions in persons living with HIV. Brain, Behavior, & Immunity – Health, Volume 9, December 2020, 100168.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

8) Central pontine myelinolysis in a patient with methamphetamine abuse. Brain, Behavior, & Immunity – Health, Volume 10, January 2021, 100166.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

9) The role of dopamine receptors in lymphocytes and their changes in schizophrenia. Brain, Behavior, & Immunity – Health, Volume 12, March 2021, 100199.

Declaration of competing interest: The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.
