Supplementary Table S2: Antifungal susceptibility comparison between *C. tropicalis* and *C. albicans* blood isolates

| Antifungal drugs | Species         | Category number (%) | P-value |
|------------------|-----------------|----------------------|---------|
|                  |                 | S/WT  | SDD/I | R/NWT |              |         |
| Voriconazole     | *C. tropicalis* | 21 (43.8) | 6 (12.4) | 21 (43.8) | < 0.001 |
|                  | *C. albicans*   | 45 (97.8) | 0 (0) | 1 (2.2) |              |         |
| Fluconazole      | *C. tropicalis* | 26 (54.1) | 1 (2.1) | 21 (43.8) | < 0.001 |
|                  | *C. albicans*   | 45 (97.8) | 0 (0) | 1 (2.2) |              |         |
| Posaconazole     | *C. tropicalis* | 30 (62.5) | NA | 18 (37.5) | < 0.001 |
|                  | *C. albicans*   | 45 (97.8) | NA | 1 (2.2) |              |         |
| Anidulafungin    | *C. tropicalis* | 46 (100) | 0 (0) | 1 (2.1) | 0.325 |
|                  | *C. albicans*   | 46 (100) | 0 (0) | 0 (0) |              |         |
| Micafungin       | *C. tropicalis* | 47 (97.9) | 0 (0) | 1 (2.1) | 0.325 |
|                  | *C. albicans*   | 46 (100) | 0 (0) | 0 (0) |              |         |
| Caspofungin      | *C. tropicalis* | 47 (97.9) | 0 (0) | 1 (2.1) | 0.325 |
|                  | *C. albicans*   | 46 (100) | 0 (0) | 0 (0) |              |         |
| Amphotericin B   | *C. tropicalis* | 48 (100) | NA | 0 (0) | NA |
|                  | *C. albicans*   | 46 (100) | NA | 0 (0) |              |         |

Notes: *categorization based on the epidemiologic cut-off values (ECVs); Itraconazole and 5-flucytosine interpretation were not available for *C. albicans*. Abbreviations: MIC, minimal inhibitory concentration; GM, geometric mean; S, susceptible; WT, wild type; SDD, susceptible-dose dependent; I, intermediate; R, resistant; NWT, non-wild type; NA, not applicable
