Supplemental Table 1 - Differences Between Centers

| Center | No. Infants | No. Blood Cultures | % Urine Culture* | % CSF Culture* | BSI (%) | UTI (%) | Meningitis (%) |
|--------|-------------|--------------------|------------------|----------------|---------|---------|----------------|
| 1      | 656         | 1922               | 55               | 14             | 24      | 9       | 1              |
| 2      | 893         | 2674               | 38               | 37             | 22      | 14      | 5              |
| 3      | 596         | 1897               | 40               | 15             | 26      | 7       | 0              |
| 4      | 252         | 652                | 77               | 44             | 26      | 15      | 2              |
| 5      | 118         | 192                | 6                | 13             | 23      | 1       | 1              |
| 6      | 230         | 537                | 46               | 15             | 26      | 8       | 0              |
| 7      | 76          | 74                 | 22               | 7              | 14      | 4       | 0              |
| 8      | 168         | 258                | 45               | 49             | 23      | 5       | 2              |
| Total  | 2989        | 8206               | 44               | 24             | 24      | 10      | 2              |

* Sent at time blood culture was obtained

CSF, cerebrospinal fluid; BSI, bloodstream infection, UTI, urinary tract infection
