expanding and intensifying, particularly in developing countries, and new resource mobilization mechanisms were called for to support countries in combating HIV/AIDS. UNAIDS brings together the HIV/AIDS responses of 11 co-sponsor UN agencies, providing an overall framework for action and ensuring better co-ordination between its members. The co-sponsor agencies are: International Labour Organization (ILO), Office of the United Nations High Commissioner for Refugees (UNHCR), United Nations Children’s Fund (UNICEF), United Nations Development Programme (UNDP), United Nations Educational, Scientific and Cultural Organization (UNESCO), United Nations Entity for Gender Equality and the Empowerment of Women (UN Women), United Nations Office on Drugs and Crime (UNODC), United Nations Population Fund (UNFPA), World Bank, World Food Programme (WFP) and World Health Organization (WHO). The proposed budget for 2016–17 amounted to US$484·8m.

Address: 20 avenue Appia, 1211 CH-Geneva 27, Switzerland.
Website: http://www.unaids.org

UN Office for Project Services (UNOPS). Established in 1995, the self-funding unit provides a range of services for other organizations in the UN system, the private sector, NGOs and academic institutions. Services offered include procurement, recruitment and human resources, and loan supervision.

Address: Marmorvej 51, PO Box 2695, 2100 Copenhagen, Denmark.
Website: http://www.unops.org

United Nations Entity for Gender Equality and the Empowerment of Women (UN Women). Established in July 2010, UN Women supports international political negotiations to formulate globally agreed standards for gender equality and helps UN member states to implement those standards by providing expertise and financial support. It merges and builds on the work of four previously distinct parts of the UN system: the Division for the Advancement of Women (DAW), the International Research and Training Institute for the Advancement of Women (INSTRAW), the Office of the Special Adviser on Gender Issues and Advancement of Women (OSAGI) and the United Nations Development Fund for Women (UNIFEM).

Address: 405 East 42nd St., New York, NY 10017, USA.
Website: http://www.unwomen.org

United Nations Office for Disaster Risk Reduction (UNISDR). Established in 1999 after the UN General Assembly adopted an international strategy for disaster reduction, UNISDR is the focal point in the UN system for the co-ordination of disaster risk reduction (DRR) and the implementation of the international blueprint for DRR. Its core areas of work include ensuring DRR is applied to climate change adaptation, increasing investments for DRR, building disaster-resilient cities, schools and hospitals, and strengthening the international system for DRR.

Address: 9–11 rue de Varembé, CH-1211 Geneva 20, Switzerland.
Website: http://www.unisdr.org

Information. The UN Statistics Division in New York provides a wide range of statistical outputs and services for producers and users of statistics worldwide, facilitating national and international policy formulation, implementation and monitoring. It produces printed publications of statistics and statistical methods in the fields of international merchandise trade, national accounts, demography and population, gender, industry, energy, environment, human settlements and disability, as well as general statistics compendiums including the Statistical Yearbook and World Statistics Pocketbook. Many of its databases are available on CD-ROM and the internet.

Specialized Agencies of the UN

The intergovernmental agencies related to the UN by special agreements are separate autonomous organizations which work with the UN and each other through the co-ordinating machinery of the Economic and Social Council. Of these, 19 are ‘Specialized Agencies’ within the terms of the UN Charter, and report annually to ECOSOC.

Food and Agriculture Organization of the United Nations (FAO)

Origin. In 1943 the International Conference on Food and Agriculture, at Hot Springs, Virginia, set up an Interim Commission, based in Washington, with a remit to establish an organization. Its Constitution was signed on 16 Oct. 1945 in Quebec City. Today, membership totals 194 countries plus two associate members. The European Union was made a member as a ‘regional economic integration organization’ in 1991.

Aims and Activities. The aims of FAO are to raise levels of nutrition and standards of living; to improve the production and distribution of all food and agricultural products from farms, forests and fisheries; to improve the living conditions of rural populations; and, by these means, to eliminate hunger. Its priority objectives are to encourage sustainable agriculture and rural development as part of a long-term strategy for the conservation and management of natural resources; and to ensure the availability of adequate food supplies, by maximizing stability in the flow of supplies and securing access to food by the poor.

In carrying out these aims, FAO promotes investment in agriculture, better soil and water management, improved yields of crops and livestock, agricultural research and the transfer of technology to developing countries; and encourages the conservation of natural resources and rational use of fertilizers and pesticides; the development and sustainable utilization of marine and inland fisheries; the sustainable management of forest resources and the combating of animal disease. Technical assistance is provided in all of these fields, and in nutrition, agricultural engineering, agrarian reform, development communications, remote sensing for climate and vegetation, and the prevention of post-harvest food losses. In addition, FAO works to maintain global biodiversity with the emphasis on the genetic diversity of crop plants and domesticated animals; and plays a major role in the collection, analysis and dissemination of information on agricultural production and commodities. Finally, FAO acts as a neutral forum for the discussion of issues, and advises governments on policy, through international conferences like the World Food Summit in 1996, the World Food Summit: five years later in 2002 and the World Summit on Food Security in 2008, all held in Rome.

Special FAO programmes help countries prepare for, and provide relief in the event of, emergency food situations, in particular through the rehabilitation of agriculture after disasters. The Special Programme for Food Security, launched in 1994, is designed to assist target countries to increase food production and productivity as rapidly as possible, primarily through the
widespread adoption by farmers of available improved production technologies, with the emphasis on high-potential areas. FAO provides support for the global co-ordination of the programme and helps attract funds. The Emergency Prevention System for Transboundary Animal and Plant Pests and Diseases (EMPRES), established in 1994, strengthens FAO’s existing contribution to the prevention, control and eradication of diseases and pests before they compromise food security, with locusts and rinderpest among its priorities. The Global Information and Early Warning System (GIEWS) provides current information on the world food situation and identifies countries threatened by shortages to guide potential donors. The interagency Food Insecurity and Vulnerability Information and Mapping System initiative (FIVIMS) was established in 1997, with FAO as its secretariat. Together with the UN, FAO sponsors the World Food Programme (WFP).

Finance. The FAO regular budget for the 2014–15 biennium was US$1,005·6m. FAO’s overall programme of work is funded by assessed and voluntary contributions. Member countries’ assessed contributions comprise the regular budget, set at the biennial FAO Conference.

The total FAO Budget planned for 2014–15 was US$2·4bn. Of this amount 41% was to come from assessed contributions paid by member countries, with 59% mobilized through voluntary contributions from members and other partners.

The voluntary contributions provided by members and other partners support technical and emergency (including rehabilitation) assistance to governments for clearly defined purposes linked to the results framework, as well as direct support to FAO’s core work. The voluntary contributions were expected to reach approximately US$1·4bn. in 2014–15.

In 2014–15, 304 projects totalling US$98·7m. were approved for development support.

Organization. The FAO Conference, composed of all members, meets every other year to determine policy and approve the FAO’s budget and programme. The 49-member Council, elected by the Conference, serves as FAO’s governing body between conference sessions. Much of its work is carried out by dozens of regional or specialist commissions, such as the Asia-Pacific Fishery Commission, the European Commission on Agriculture and the Commission on Plant Genetic Resources. The Director-General is elected for a renewable six-year term.

Headquarters: Viale delle Terme di Caracalla, 00153 Rome, Italy.
Website: http://www.fao.org
Director-General: José Graziano da Silva (Brazil).

Publications. Unasylva, 1947 ff.—The State of Food and Agriculture, 1947 ff.—FAO Statistical Yearbook: World Food and Agriculture, 2004 ff. International Bank for Reconstruction and Development (IBRD) — The World Bank

Origin. Conceived at the UN Monetary and Financial Conference at Bretton Woods (New Hampshire, USA) in July 1944, the IBRD, frequently called the World Bank, began operations in June 1946, its purpose being to provide funds, policy guidance and technical assistance to facilitate economic development in its poorer member countries. The Group comprises four other organizations: the International Development Association (IDA), which provides interest-free loans and grants to governments of the poorest countries; the International Finance Corporation (IFC), which provides loans, equity and technical assistance to stimulate private sector investment in developing countries; the Multilateral Investment Guarantee Agency (MIGA), which provides guarantees against losses caused by non-commercial risks to investors in developing countries; and the International Centre for Settlement of Investment Disputes (ICSID), which provides international facilities for conciliation and arbitration of investment disputes.

Members. Afghanistan, Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cabo Verde, Cambodia, Cameroon, Canada, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Côte d’Ivoire, Croatia, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, South Korea, Kosovo, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Micronesia, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Myanmar, Namibia, Nauru, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines, Samoa, San Marino, São Tomé and Príncipe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, Somalia, South Africa, South Sudan, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, United Arab Emirates, UK, USA, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia, Zimbabwe.

Activities. The Bank obtains its funds from the following sources: capital paid in by member countries; sales of its own securities; sales of parts of its loans; repayments; and net earnings. A resolution of the Board of Governors of 27 April 1988 provides that the paid-in portion of the shares authorized to be subscribed under it will be 3%.

The Bank is self-supporting, raising most of its money on the world’s financial markets. In the fiscal year ending 30 June 2015 allocable income totalled US$686·m., compared to US$769·m. for the year ending 30 June 2014.

In the fiscal year 2015 the Bank lent US$23·5bn. for 112 new operations. Cumulative lending had totalled US$629·bn. by June 2015.

The Consultative Group to Assist the Poor (CGAP) works toward a world in which everyone has access to the financial services they need to improve their lives. Established in 1995 and housed at the World Bank, CGAP combines a pragmatic approach to market development with an evidence-based advocacy platform to advance poor people’s access to finance. Its global network of members includes over 30 development agencies, private foundations and national governments that share a common vision of improving the lives of poor people with better access to finance.

For the purposes of its analytical and operational work, in 2016 the IBRD characterized economies as follows: low income (average annual per capita gross national income of $1,025 or
INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT (IBRD) — THE WORLD BANK

Jim Yong Kim

Position
President

Introduction
Jim Yong Kim, a medical scientist and anthropologist, became president of the World Bank in July 2012. The first development professional to hold the post, he signalled his support for pursuing private enterprise growth alongside environmental sustainability and social protection. In Sept. 2016 he was re-elected for a second five-year term beginning 1 July 2017.

Early Life
Jim Yong Kim was born on 8 Dec. 1959 in Seoul, South Korea, but moved to the USA aged five and became a US citizen. Having graduated in biology from Brown University in 1982, he received his medical degree in 1991 and a PhD in anthropology in 1993, both from Harvard.

In 1987 he co-founded Partners in Health (PIH), a non-profit organization pioneering community-based health care programmes in low-income areas and developing countries. Working initially in Boston and Haiti, Kim steered the expansion of PIH into Peru in 1990s. Its success in treating a range of diseases was widely recognized and its model later adopted by the World Health Organization (WHO).

In 2003 Kim stepped down as executive director of PIH to become director of the WHO’s HIV/AIDS department, where he led the ‘3 by 5’ initiative to treat 3m. new HIV/AIDS patients in developing countries with antiretroviral drugs by 2005. The programme was credited with greatly accelerating the provision of effective HIV/AIDS treatment and reached its target in 2007.

Kim has held a range of teaching and research posts at Harvard since 1993. In 2006 the University appointed him chair of its department of social medicine (later renamed the department of global health and social medicine), where he developed a global health delivery programme. He has also served as head of the François-Xavier Bagnoud Center for Health and Human Rights at the Harvard School of Public Health, and as chief of the Brigham and Women’s Hospital Division of Social Medicine and Health Inequalities.

In 2009 Kim left Harvard to become president of Dartmouth College, where he established a centre for health care delivery science. In March 2012 President Obama nominated him for the presidency of the World Bank and in April 2012 he beat two rivals in an election for the post. Both his opponents—the Nigerian finance minister, Ngozi Okonjo-Iweala, and a Colombian economist, José Antonio Ocampo—had argued that the president should be from a developing nation.

Career in Office
Kim took office on 1 July 2012. In Nov. 2012 he identified tackling climate change as crucial to ending poverty, announcing that the World Bank would integrate environmental sustainability into future development plans. Achieving this while promoting economic growth in emerging nations has been a key challenge.

In Oct. 2013 he highlighted a shift in strategy, stating that the Bank would ‘become more of a game-changing catalyst that draws billions of dollars of private sector capital into poor countries’. He added: ‘In particular, we will leverage our fund for the poorest—the International Development Association—to bring in other sources of capital ... especially for fragile and conflicted states.’

In 2014 Kim attracted attention for his emphasis on gay rights and anti-discrimination in the Bank’s international lending criteria and also for his plans to reform and modernize the Bank’s internal organization and structures. In June 2015 he said that developing countries, which had been the engine of economic growth following the financial crisis, were facing a more difficult environment in the wake of lower commodity prices and the prospect of higher borrowing costs that would impact globally.

In Nov. 2016, as the landmark 2015 Paris Climate Change Agreement entered into force, Kim identified four priorities for further international action—to build climate ambition into the development plans of every country, to accelerate the transition to cleaner energy, to help countries build resilience to climate shocks, and to factor climate risks and opportunities into the global financial system.

International Development Association (IDA)

A lending agency established in 1960 and administered by the IBRD to provide assistance on concessional terms to the poorest developing countries. Its resources consist of subscriptions and general replenishments from its more industrialized and developed members, special contributions and transfers from the net earnings of IBRD. Officers and staff of the IBRD serve concurrently as officers and staff of the IDA at the World Bank headquarters (see above). In fiscal year 2015 IDA commitments totalled US$19bn.; new commitments totalled 191 new operations. Since 1960 IDA has lent US$312bn. to 112 countries.

Headquarters: 1818 H St., NW, Washington, D.C., 20433, USA.
Website: http://www.worldbank.org/ida
President: Jim Yong Kim (USA).

International Finance Corporation (IFC)

Established in 1956 to help strengthen the private sector in developing countries, through the provision of long-term loans, equity investments, quasi-equipment instruments, standby financing, and structured finance and risk management products. It helps to finance new ventures and assist established enterprises as they expand, upgrade or diversify. In partnership with other donors, it provides a variety of technical assistance and advisory services to public and private sector clients. To be eligible for financing, projects must be profitable for investors, must benefit the economy of the country concerned, and must comply with IFC’s environmental and social guidelines.

The majority of its funds are borrowed from the international financial markets through public bond issues or private placements. Its authorized capital is US$2.58bn.; total capital at 30 June 2016 was US$2.8bn. In fiscal year 2016 IFC’s long-term investment commitments totalled US$18.9bn., including US$7.8bn. mobilized from investment partners. It has 184 members.

Headquarters: 2121 Pennsylvania Ave., NW, Washington, D.C., 20433, USA.
Website: http://www.ifc.org
President: Jim Yong Kim (USA).

Multilateral Investment Guarantee Agency (MIGA)

Established in 1988 to encourage the flow of foreign direct investment to and among developing member countries, MIGA is the insurance arm of the World Bank. It provides investors with investment guarantees against non-commercial risk, such as expropriation and war, and gives advice to governments on improving climate for foreign investment. It may insure up to 90% of an investment, with a current limit of US$50m. per project. In March 1999 the Council of Governors adopted a resolution for a capital increase for the Agency of approximately US$850m. In addition US$150m. was transferred to MIGA by the World Bank as operating capital. In Feb. 2017 it had 181 member countries. Like IDA and ICSID, it is located at the World Bank headquarters in Washington (see above).

Headquarters: 1818 H St., NW, Washington, D.C., 20433, USA.
Website: http://www.miga.org
President: Jim Yong Kim (USA).

International Centre for Settlement of Investment Disputes (ICSID)

Founded in 1966 to promote increased flows of international investment by providing facilities for the conciliation and arbitration of disputes between governments and foreign investors. The Centre does not engage in such conciliation or arbitration. This is the task of conciliators and arbitrators appointed by the contracting parties, or as otherwise provided for in the Convention. Recourse to conciliation and arbitration by members is entirely voluntary.

In Feb. 2017 its Convention had 161 signatory countries. 397 cases had been concluded by it and 213 were pending. Disputes involved a variety of investment sectors: agriculture, banking, construction, energy, industrial, mining and tourism. ICSID also undertakes research, publishing and advisory activities in the field of foreign investment law. Like IDA and MIGA, it is located at the World Bank headquarters in Washington (see above).

Headquarters: 1818 H St., NW, MSN J2-200, Washington, D.C., 20433, USA.

President: Jim Yong Kim (USA).
Secretary-General: Meg Kinnear (Canada).

International Civil Aviation Organization (ICAO)

Origin. The Convention providing for the establishment of the ICAO was drawn up by the International Civil Aviation Conference held in Chicago in 1944. A Provisional International Civil Aviation Organization (PICAO) operated for 20 months until the formal establishment of ICAO on 4 April 1947. The Convention on International Civil Aviation superseded the provisions of the Paris Convention of 1919 and the Pan American Convention on Air Navigation of 1928.

Functions. It assists international civil aviation by establishing technical standards for safety and efficiency of air navigation and promoting simpler procedures at borders; develops regional plans for ground facilities and services needed for international flying; disseminates air-transport statistics and prepares studies on aviation economics; fosters the development of air law conventions and provides technical assistance to states in developing civil aviation programmes.

Organization. The principal organs of ICAO are an Assembly, consisting of all members of the Organization, and a Council, which is composed of 36 states elected by the Assembly for three years, which meets in virtually continuous session. In electing these states, the Assembly must give adequate representation to: (1) states of major importance in air transport; (2) states which make the largest contribution to the provision of facilities for the international civil air navigation; and (3) those states not otherwise included whose election would ensure that all major geographical areas of the world were represented. The budget approved for 2016 was $99.0m. CDN.

Headquarters: 999 Robert-Bourassa Blvd, Montreal, Quebec, Canada H3C 5H7.

establish IFAD entered into force on 30 Nov. 1977, and the agency began its operations the following month. IFAD is an international financial institution and a United Nations specialized agency dedicated to eradicating rural poverty in developing countries. It mobilizes resources from its 173 member countries to provide low-interest loans and grants to help middle and low-income member countries fight poverty in their poor rural communities. IFAD works with national partners to design and implement innovative initiatives that fit within national policies and systems. These enable poor rural people to access the assets, services, knowledge, skills and opportunities they need to overcome poverty. Since starting operations in 1978, IFAD has invested more than US$16.3bn. in 974 projects and programmes that have reached around 438m. people.

Organization. The highest body is the Governing Council, on which all 173 member countries are represented. Operations are overseen by an 18-member Executive Board (with 18 alternate members), which is responsible to the Governing Council. The Fund works with many partner institutions, including the World Bank, regional development banks and financial agencies, and other UN agencies; many of these co-finance IFAD programmes and projects.

Headquarters: Via Paolo di Dono 44, 00142 Rome, Italy.

International Labour Organization (ILO)

Origin. The ILO was established in 1919 under the Treaty of Versailles as an autonomous institution associated with the League of Nations. An agreement establishing its relationship with the UN was approved in 1946, making the ILO the first Specialized Agency to be associated with the UN. An intergovernmental agency with a tripartite structure, in which representatives of governments, employers and workers participate, it seeks through international action to improve labour and living conditions, to promote productive employment and social justice for working people everywhere. On its fiftieth anniversary in 1969 it was awarded the Nobel Peace Prize. In Feb. 2017 it numbered 187 members.

Functions. The ILO’s programme and budget set out four strategic objectives for the Organization at the turn of the century: i) to promote and realize fundamental principles and rights at work; ii) to create greater opportunities for women and men to secure decent work opportunities. The ILO had adopted 204 Recommendations. Member states to respect the principles inherent in a number of core labour standards: the right of workers and employers to freedom of association and the effective right to collective bargaining, and to work toward the elimination of all forms of forced or compulsory labour, the effective abolition of child labour and the elimination of discrimination in respect of employment and occupation.

Activities. In addition to its research and advisory activities, the ILO now conducts more than 1,000 technical co-operation programmes in over 80 countries with the help of some 60 donor institutions worldwide. The ILO has decentralized most such activities to its regional, area and branch offices in over 40 countries. Decent Work Country Programmes have been established as the main vehicle for delivery of ILO support to countries.

The ILO’s standard-setting and technical co-operation are reinforced by an extensive research, training, education and publications programme. It has established two specialized educational institutions: the International Institute for Labour Studies in Geneva, and the International Centre for Advanced Technical and Vocational Training in Turin.

The International Institute for Labour Studies promotes the study and discussion of policy issues. The core theme of its activities is the interaction between labour institutions, development and civil society in a global economy. It identifies emerging social and labour issues by opening up new areas for research and action; and encourages systematic dialogue on social policy between the tripartite constituency of the ILO and the international academic community, and other public opinion-makers.

The International Training Centre was set up in 1965 to lead the training programmes implemented by the ILO as part of its technical co-operation activities. Member states and the UN system also call on its resources and experience, and a UN Staff College was established on the Turin Campus in 1996.

In June 2009 the International Labour Conference unanimously adopted a ‘Global Jobs Pact’ to address the social and employment impact of the recent international financial and economic crisis. The Pact promotes a recovery centred on investments, employment and social protection. It provides an internationally agreed basis for policy-making designed to reduce the time lag between economic recovery and a recovery with decent work opportunities.

Organization. The International Labour Conference is the supreme deliberative organ of the ILO; it meets annually in Geneva. National delegations are composed of two government delegates, one employers’ delegate and one workers’ delegate. The Governing Body, elected by the Conference, is the Executive Council. It is composed of 28 government members, 14 workers’ members and 14 employers’ members. Ten governments of countries of industrial importance hold permanent seats on the Governing Body. These are: Brazil, China, France, Germany, India, Italy, Japan, Russia, UK and USA. The remaining 18 government members are elected every three years. Workers’ and employers’ representatives are elected as individuals, not as national candidates.

Headquarters: International Labour Office, 4 route des Morillons, CH-1211 Geneva 22, Switzerland.

International Maritime Organization (IMO)

Origin. The International Maritime Organization (formerly the InterGovernmental Maritime Consultative Organization) was established as a specialized agency of the UN by a convention drafted in 1948 at a UN maritime conference in Geneva. The Convention became effective on 17 March 1958 when it had been ratified by 21 countries, including seven with at least 1m. gross tons of shipping each. The IMCO started operations in 1959 and changed its name to the IMO in 1982.

Functions. To facilitate co-operation among governments on technical matters affecting merchant shipping, especially concerning safety and security at sea; to prevent and control marine pollution caused by ships; to facilitate international maritime traffic. The IMO is responsible for convening international maritime conferences and for drafting international maritime conventions. It also provides technical assistance to countries wishing to develop their maritime activities, and acts as a depositary authority for international conventions regulating maritime affairs. The World Maritime University (WMU), at Malmö, Sweden, was established in 1983; the IMO International Maritime Law Institute (IMLI), at Valletta, Malta and the IMO International Maritime Academy, at Trieste, Italy, both in 1989.

Organization. The IMO has 170 members and three associate members. The Assembly, composed of all member states, normally meets every two years. The 40-member Council acts as governing body between sessions. There are four principal committees (on maritime safety, legal matters, marine environment protection and technical co-operation), which submit reports or recommendations to the Assembly through the Council, and a Secretariat. The budget for 2014–15 amounted to £64,304,000.

International Monetary Fund (IMF)

Established in 1945 as an independent organization, the International Monetary Fund began financial operations on 1 March 1947. An agreement of mutual co-operation with the UN came into force on 15 Nov. 1947. The first amendment to the Articles of Agreement, creating the special drawing right (SDR), the IMF’s reserve asset, took effect on 28 July 1969. The second amendment took effect on 1 April 1978, and established a new code of conduct for exchange arrangements in the wake of the collapse of the par value system. The third amendment came into force on 11 Nov. 1992; it allowed for the suspension of voting and related rights of any member that failed to settle its outstanding obligations to the IMF. The fourth Amendment, in force from 10 Aug. 2009, provided for a special one-time allocation of SDRs. A fifth amendment, effective 18 Feb. 2011, expanded the Fund’s investment authority. The sixth amendment, which took effect on 3 March 2011, strengthened the representation of emerging economies through ad hoc quota increases. On 26 Jan. 2016 the seventh amendment, concerning quota and governance reform, was enacted.

Members. Afghanistan, Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cabo Verde, Cambodia, Cameroon, Canada, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Côte d’Ivoire, Croatia, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, South Korea, Kosovo, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Micronesia, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Myanmar, Namibia, Nauru, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines, Samoa, San Marino, São Tomé and Príncipe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, Somalia, South Africa, South Sudan, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, United Arab Emirates, UK, USA, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia, Zimbabwe.

Aims. To promote international monetary co-operation, the expansion of international trade and exchange rate stability; to assist in the removal of exchange restrictions and the establishment of a multilateral system of payments; and to alleviate any serious disequilibrium in members’ international balance of payments by making the financial resources of the IMF available to them, usually subject to economic policy conditions.

Activities. The IMF is mandated to oversee the international monetary system and monitor the economic and financial policies of its member countries. The IMF highlights possible risks to domestic and external stability and advises on policy adjustments.

Lending. A core responsibility of the IMF is to provide loans to member countries experiencing balance of payments problems. This financial assistance enables countries to rebuild their international reserves, stabilize their currencies, continue paying for imports and restore conditions for strong economic growth, while undertaking policies to correct underlying problems. Unlike development banks, the IMF does not lend for specific projects. The IMF has various loan instruments, or ‘facilities’, that are tailored to address the specific circumstances of its diverse membership. Nonconcessional loans are provided mainly through Stand-By Arrangements (SBAs) and the Extended Fund Facility (which is useful primarily for longer-term needs). The Flexible Credit Line (FCL) was introduced in 2009, for countries with very strong fundamentals, policies and track records of policy implementation.

The IMF also offers special financing facilities for low-income countries. A new Poverty Reduction and Growth Trust, effective from Jan. 2010, incorporates the Extended Credit Facility, which provides flexible medium-term support; the Standby Credit Facility, which addresses short-term and precautionary needs; and the Rapid Credit Facility, which offers emergency support with limited conditionality. The IMF also provides emergency assistance to support recovery from natural disasters and conflicts, in some cases at concessional interest rates.

A major reform of the IMF’s lending facilities took place in March 2009. Conditions linked to IMF loan disbursements are to be better focused and more adequately tailored to the varying strengths of countries’ policies and fundamentals. The flexibility of the SBA has been enhanced. In addition, access limits have been doubled, the cost and maturity structure of the Fund’s lending has been simplified and its lending facilities have been streamlined.
Technical assistance. The IMF provides technical assistance in its areas of core expertise: macroeconomic policy, tax policy and revenue administration, expenditure management, monetary policy, the exchange rate system, financial sector sustainability, and macroeconomic and financial statistics. About 90% of IMF technical assistance goes to low and lower-middle income countries. The IMF operates nine regional technical assistance centres: in the Pacific (Fiji), the Caribbean (Barbados), five in Africa (Gabon, Ghana, Mali, Mauritius and Tanzania), the Middle East (Lebanon) and Central America (Guatemala).

Finances. Quota subscriptions from member countries are the IMF’s main source of financing. A member’s quota is largely determined by its economic position relative to other members; it is also linked to their drawing rights on the IMF, their voting power and their share of SDR allocations. Quotas are generally reviewed at least every five years, although the 15th General Quota Review, which under normal circumstances would have been completed in Dec. 2015, has been delayed. The IMF can supplement its resources through borrowing if it believes that resources might fall short of members’ needs.

The General Arrangements to Borrow (GAB) and New Arrangements to Borrow (NAB) are credit arrangements between the IMF and a group of member countries and institutions to provide supplementary resources to the IMF to deal with an exceptional situation that poses a threat to the stability of that system. The GAB, established in 1962, enables the IMF to borrow specified amounts of currencies from 11 industrial countries (or their central banks) under certain circumstances, at market-related rates of interest. The potential credit available to the IMF under the GAB totals SDR 17bn., with an additional SDR 1-5bn. available under an associated arrangement with Saudi Arabia. The NAB, which came into effect in 1998, is a set of credit arrangements between the IMF and 38 member countries and institutions. Importantly, the NAB is the facility of first and principal recourse vis-à-vis the GAB. The maximum amount of resources available to the IMF under the NAB and GAB is SDR 370bn.

In April 2009 the G20 agreed to increase the lending resources available to the IMF by up to US$500bn., thereby tripling total pre-crisis lending resources. The increase was to be made through immediate bilateral financing from IMF member countries and by subsequently incorporating this financing into an expanded and more flexible NAB increased by up to US$500bn. This objective was achieved by Sept. 2009.

Bilateral loans. Under such an agreement, the member normally commits to allow the Fund to make drawings up to a specified ceiling during the period for which drawings can be made. In 2009 the IMF signed a number of bilateral loan agreements.

IMF notes. Some official creditors may prefer to invest in paper or notes issued by the IMF. In 2009 the IMF’s Executive Board approved a new framework for issuing notes to the official sector. China was the first country to have signed such a note purchase agreement.

SDR allocations. The IMF may allocate SDRs to members in proportion to their IMF quotas. Such an allocation provides each member with a costless asset. There have been three general SDR allocations, made in response to a long-term global need for reserve assets: (i) SDR 9-3bn., distributed in 1970–72; (ii) SDR 12-3bn., distributed in 1979–81; and (iii) SDR 162-1bn., distributed in Aug. 2009. A special one-off allocation of SDRs amounting to SDR 21-5bn. was implemented on 9 Sept. 2009. This allocation was for those countries that joined the Fund after 1981—more than one fifth of the IMF membership—and had never received an SDR allocation. As a result of reforms implemented in Jan. 2016, the combined quotas of the IMF’s then 188 members totalled US$659bn.

Governance reform. Implemented on 28 April 2008 this reform made quotas more responsive to economic realities by increasing the representation of fast-growing economies while at the same time giving low-income countries more say in the IMF’s decision making. The reform built on an initial step agreed by the IMF’s membership in Sept. 2006 to have ad hoc quota increases for four countries—China, South Korea, Mexico and Turkey. In Dec. 2010 the IMF Board of Governors approved a shift in quota share to dynamic emerging markets and developing countries of more than 6% using the quota formulas at the time as the basis. The reforms came into effect in Jan. 2016 as part of the IMF’s 14th General Quota Review.

Organization. The highest authority is the Board of Governors; each member government is represented. The Board of Governors has delegated many of its powers to the 24 executive directors in Washington, D.C., who are appointed or elected by individual member countries or groups of countries. The managing director is selected by the executive directors and serves as chairman of the Executive Board, but may not vote except in case of a tie. The term of office is for five years, but may be extended or terminated at the discretion of the executive directors. The managing director is responsible for the ordinary business of the IMF, under the direction of the executive directors, and supervises a staff of about 2,400. There are three deputy managing directors. As of Feb. 2017 the IMF had 189 members.

The IMF Institute is a specialized department providing training in macroeconomic analysis and policy, and related subjects, for officials of member countries. In addition to training offered in Washington, D.C., the IMF also offers training for country officials through a network of seven regional training institutes and programmes. These are: the IMF-Singapore Regional Training Institute; the Africa Training Institute (in Mauritius); the Joint Partnership for Africa (in Côte d’Ivoire); the Joint China-IMF Training Program (in Dalian, China); the IMF-Middle East Center for Economics and Finance (in Kuwait); the Joint Regional Training Center for Latin America (in Brazil); and the Joint Vienna Institute (in Austria).

Current Leaders
Christine Lagarde
Position
Managing Director

Introduction
Christine Lagarde became managing director of the IMF in July 2011 against a backdrop of global financial instability and uncertainty. The 11th consecutive European to head the Fund, she promised to give more voting power to developing nations. Her key challenges have included formulating the IMF response to continuing sovereign debt crises and weak global economic growth. Her appointment for a second term in the post was approved in Feb. 2016.

Early Life
Born on 1 Jan. 1956 in Paris, Christine Lagarde attended school in Le Havre, France and Holton-Arms School in Bethesda, Maryland, USA before studying law at the Université de Paris X-Nanterre. After obtaining a master’s degree from the Institut d’études politiques d’Aix-en-Provence, in 1981 she joined the Paris office of international law firm Baker & McKenzie, specializing in anti-trust law, employment law, and acquisitions and mergers.

Made a partner in 1987, she served on the executive committee from 1995–2004, moving to Chicago in 1999 when she became chairman of the global executive committee. As a member of a Washington-based think tank, the Centre for Strategic and International Studies, Lagarde headed the US-Poland defence industries working group from 1995–2002, promoting the interests of US and Polish companies.
She returned to France in 2005 to serve as minister for foreign trade in Dominique de Villepin’s government, overseeing the growth of exports. She was minister of agriculture and fisheries from May–June 2007, before being appointed finance minister by President Sarkozy. With the onset of the global economic crisis in 2008 she gained a reputation as an astute negotiator, winning praise domestically for her representation of French interests on the international stage. In 2010 she was closely involved in the negotiations over IMF bailout loans for eurozone countries.

IMF managing director Dominique Strauss-Kahn resigned in May 2011, accused of sexual assault, and Lagarde emerged as the favourite to replace him, ahead of Agustín Carstens of Mexico. She was backed by the USA and, despite widely expressed concern over continued European dominance of the Fund, she also won support from the BRIC nations of Brazil, Russia, India and China.

Career in Office
Lagarde took office on 5 July 2011, promising to implement reforms to IMF governance, including more voting power for emerging nations. Her main preoccupation, however, has been the containment of sovereign debt crises in economically advanced countries around the world, and particularly in the eurozone where the IMF has contributed financial support to several countries in an international effort to sustain the viability of the European single currency.

In Oct. 2013 she acknowledged that the worldwide financial turmoil had shaken faith in prosperity through globalization, but stressed the need for continued international policy collaboration in the face of ‘transitions on an epic scale’. A year later she called for resolute policies to prevent economic growth from settling into a ‘new mediocre’, with unacceptably low job creation and inclusion. She was similarly downbeat in Dec. 2015, commenting that the world faced another year of ‘disappointing and uneven’ growth. She approved the first rise that month in borrowing costs in the USA since 2006 as necessary, but warned that higher interest rates, economic slowdown in China and depressed commodity markets could undermine the already tepid and vulnerable global recovery. Earlier, in Nov., she heralded the inclusion of China’s yuan in the basket of currencies that comprise the IMF’s lending reserves.

In Dec. 2015 a French judicial commission ruled that Lagarde should stand trial for alleged negligence over a controversial decision she had made regarding the use of public money in 2008 while minister of finance in France. Although she was convicted in Dec. 2016, the court did not hand down any punishment and the IMF board said that it retained full confidence in her continued leadership.

International Telecommunication Union (ITU)

Origin. Founded in Paris in 1865 as the International Telegraph Union, the International Telecommunication Union took its present name in 1934 and became a specialized agency of the United Nations in 1947. Therefore, the ITU is the world’s oldest intergovernmental body.

Functions. To maintain and extend international co-operation for the improvement and rational use of telecommunications of all kinds, and promote and offer technical assistance to developing countries in the field of telecommunications; to promote the development of technical facilities and their most efficient operation; to improve the efficiency of telecommunication services, increasing their usefulness and making them, so far as possible, generally available to the public; to harmonize the actions of nations in the attainment of these ends.

Organization. The supreme organ of the ITU is the Plenipotentiary Conference, which normally meets every four years. A 48-member Council, elected by the Conference, meets annually in Geneva and acts as the ITU’s governing body in the interval between Plenipotentiary Conferences. A General Secretariat manages the administrative and financial aspects of the ITU’s activities. The Secretary-General is also elected by the Conference. The ITU is made up of three sectors: Radiocommunication Sector; Telecommunication Standardization Sector; and Telecommunication Development Sector. The ITU has 193 member countries; a further 700 scientific and technical companies, public and private operators, broadcasters and other organizations are also members.

Headquarters: Place des Nations, CH-1211 Geneva 20, Switzerland.

Secretary-General: Houlin Zhao (China).

United Nations Educational, Scientific and Cultural Organization (UNESCO)

Origin. UNESCO’s Constitution was signed in London on 16 Nov. 1945 by 37 countries and the Organization came into being in Nov. 1946 on the premise that: Since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed’. In Feb. 2017 UNESCO had 195 members including the UK, which rejoined in 1997 having left in 1985, and the USA, which rejoined in 2003 having left in 1984. There are also ten associate members that are not members of the UN (Anguilla, Aruba, British Virgin Islands, Cayman Islands, Curacao, Faroe Islands, Macao, Montserrat, Sint Maarten and Tokelau).

Aims and Activities. UNESCO’s primary objective is to contribute to peace and security in the world by promoting collaboration among the nations through education, science, communication, culture and the social and human sciences in order to further universal respect for justice, democracy, the rule of the law, human rights and fundamental freedoms, affirmed for all peoples by the UN Charter. Africa and gender equality are the Organization’s two chief global priorities.

Education. Various activities support and foster national projects to renovate education systems and develop alternative educational strategies towards a goal of lifelong education for all. The World
Development Forum in Dakar in 2000 set an agenda for progress towards this aim expressed as six goals. Two of these, attaining universal primary education by 2015 and gender parity in schooling by 2005, were also UN Millennium Development Goals. Three elements define the context for pursuing this purpose: promoting education as a fundamental right, improving the quality of education and stimulating experimentation, innovation and policy dialogue.

Science. UNESCO seeks to promote international scientific co-operation and encourages scientific research designed to improve living conditions and to protect ecosystems. Several international programmes to better understand the Earth’s resources towards the advancement of sustainable development have been initiated, including the Man and the Biosphere (MAB) programme, the International Hydrological Programme (IHP), the Intergovernmental Oceanographic Commission (IOC) and the International Geoscience Programme (IGCP).

Culture. Promoting the preservation of heritage, both tangible and intangible, cultural diversity and intercultural dialogue is the principal priority of UNESCO’s cultural programmes. UNESCO’s World Heritage List, now covering 1,052 sites around the world, promotes the preservation of monuments, cultural landscapes and natural sites.

Communication. Activities are geared to promoting the free flow of information, freedom of expression, press freedom, media independence and pluralism. Another priority is to promote multilingualism on the internet, bridge the digital divide and help disadvantaged groups participate in the knowledge societies created through the information and communication technologies. To this end, UNESCO promotes access to public domain information, as well as encouraging the creation of local content.

Social and Human Sciences. UNESCO works to advance knowledge and intellectual co-operation in order to facilitate social transformations conducive to justice, freedom, peace and human dignity. It seeks to identify evolving social trends and develops and promotes principles and standards based on universal values and ethics, such as the Universal Declaration on the Human Genome and Human Rights (1997) and the International Declaration on Human Genetic Data (2003).

Organization. The General Conference, composed of representatives from each member state, meets biennially to decide policy, programme and budget. A 58-member Executive Board elected by the Conference meets twice a year and there is a Secretariat. The approved budget for the biennium 2016–17 was US$667m., with significant extra-budgetary contributions for specific programmes provided by both public and private bodies.

There are also ten separate UNESCO institutes and centres: the International Bureau of Education (IBE), in Geneva; the UNESCO Institute for Lifelong Learning (UIL), in Hamburg; the International Institute for Educational Planning (IIEP), in Paris and Buenos Aires; the International Institute for Capacity Building in Africa (IICBA); in Addis Ababa; the International Institute for Higher Education in Latin America and the Caribbean (IESALC), in Caracas; the Institute for Information Technologies in Education (IIITE), in Moscow; the UNESCO Institute for Statistics (UIS), in Montreal; the UNESCO International Centre for Technical and Vocational Education and Training (UNEVOC), in Bonn; the UNESCO-IHE Institute for Water Education (UNESCO-IHE), in Delft; and the International Centre for Theoretical Physics (ICTP), in Trieste.

**United Nations Industrial Development Organization (UNIDO)**

*Origin.* UNIDO was established by the UN General Assembly in 1966 and became a UN specialized agency in 1985.

*Aims and Activities.* UNIDO helps developing countries in the formulation of policies and programmes in the field of industrial development; analyses trends, disseminates information and co-ordinates activities in their industrial development; acts as a forum for consultations and negotiations directed towards the industrialization of developing countries; and provides technical co-operation to developing countries for the implementation of their development plans for sustainable industrialization in their public and private sectors.

UNIDO focuses its efforts on three thematic priority areas: poverty reduction through productive activities; trade capacity-building; and energy and the environment. Activities under the thematic priorities are reflected in UNIDO’s medium-term programme frameworks and biennial programme documents.

*Organization.* As part of the United Nations common system, UNIDO has the responsibility for promoting industrialization throughout the developing world, in co-operation with its 170 member states. Its headquarters are in Vienna, Austria. UNIDO maintains a field network of 47 regional and country offices around the world. UNIDO maintains offices in Brussels, Geneva and New York.

The General Conference meets every two years to determine policy and approve the budget. The 53-member Industrial Development Board (membership according to constitutional lists) is elected by the General Conference. The General Conference also elects a 27-member Programme and Budget Committee for two years and appoints a Director-General for four years.

*Finance.* UNIDO’s financial resources come from the regular and operational budgets, as well as voluntary contributions. The approved regular budget for 2014–15 was €143.7m. and the approved operations budget €32.8m. More than half of UNIDO’s funding comes from voluntary contributions. The regular budget derives mainly from assessed contributions from member states with a marginal proportion provided from such other sources as interest income, sales publications and government contributions to the UNIDO field offices.

The Constitution of UNIDO provides for 6% of the net regular budget to be used for the Regular Programme of Technical Cooperation. These resources are primarily used for supporting the Organization’s operational and normative activities. The operational budget derives mainly as support cost income (of 5–13%) earned from the implementation of technical co-operation activities. Technical co-operation is funded mainly from voluntary contributions from donor countries and institutions as well as UNDP, the Multilateral Fund for the Implementation of the Montreal Protocol, the Global Environment Facility and the Common Fund for Communities.

**Headquarters:** Vienna International Centre, Wagramerstr. 5, POB 300, A-1400 Vienna, Austria.

**Director-General:** Li Yong (China).

**Publications.** UNIDO Annual Report.—Making It (quarterly).—UNIDO Times (newsletter).—The International Yearbook of Industrial Statistics 2015.—Industrial Development Report 2016.—Introduction to Inclusive and Sustainable Industrial Development. 2015.
Universal Postal Union (UPU)

Origin. The UPU was established in 1875, when the Universal Postal Convention adopted by the Postal Congress of Berne on 9 Oct. 1874 came into force. It has 192 member countries.

Functions. The UPU provides co-operation between postal services and helps to ensure a universal network of up-to-date products and services. To this end, UPU members are united in a single postal territory for the reciprocal exchange of correspondence. A Specialized Agency of the UN since 1948, the UPU is governed by its Constitution, adopted in 1964 (Vienna), and subsequent protocol amendments (1969, Tokyo; 1974, Lausanne; 1984, Hamburg; 1989, Washington; 1994, Seoul; 1999, Beijing; 2004, Bucharest; 2008, Geneva).

Organization. It is composed of a Universal Postal Congress which meets every four years; a 41-member Council of Administration, which meets annually and is responsible for supervising the affairs of the UPU between Congresses; a 40-member Postal Operations Council; and an International Bureau which functions as the permanent secretariat, responsible for strategic planning and programme budgeting. A new UPU body, the Consultative Committee, was created at the Bucharest Congress. This committee represents the external shareholders of the postal sector as well as UPU member countries. The budget for annual expenditure between 2013 and 2016 was 37·2m. Swiss francs.

Headquarters: Weltpoststrasse 4, 3015 Berne, Switzerland.

World Health Organization (WHO)

Origin. An International Conference convened by the UN Economic and Social Council to consider a single health organization resulted in the adoption on 22 July 1946 of the Constitution of the World Health Organization, which came into force on 7 April 1948.

Functions. WHO’s objective, as stated in the first article of the Constitution, is ‘the attainment by all peoples of the highest possible level of health’. As the directing and co-ordinating authority on international health, it establishes and maintains collaboration with the UN, specialized agencies, governments, health administrations, professional and other groups concerned with health. The Constitution also directs WHO to assist governments to strengthen their health services; to stimulate and advance work to eradicate diseases; to promote maternal and child health, mental health, medical research and the prevention of accidents; to improve standards of teaching and training in the health professions, and of nutrition, housing, sanitation, working conditions and other aspects of environmental health. The Organization is also empowered to propose conventions, agreements and regulations, and make recommendations about international health matters; to develop, establish and promote international standards concerning foods, biological, pharmaceutical and similar substances; to revise the international nomenclature of diseases, causes of death and public health practices.

Methods of work. Co-operation in country projects is undertaken only on the request of the government concerned, through the six regional offices of the Organization. Worldwide technical services are made available by headquarters. Expert committees, chosen from the 47 advisory panels of experts, meet to advise the Director-General on a given subject. Scientific groups and consultative meetings are called for similar purposes. To further the education of health personnel of all categories, seminars, technical conferences and training courses are organized, and advisors, consultants and lecturers are provided. WHO awards fellowships for study to nationals of member countries.

Activities. The main thrust of WHO’s activities in recent years has been towards promoting national, regional and global strategies for the attainment of the main social target of the member states: ‘Health for All in the 21st Century’, or the attainment by all citizens of the world of a level of health that will permit them to lead a socially and economically productive life. Almost all countries indicated a high level of political commitment to this goal; and guiding principles for formulating corresponding strategies and plans of action were subsequently prepared.

WHO has organized its responsibilities into four priorities: enhancing global health security, which includes preventing, detecting and containing disease outbreaks, preparing the world for controlling pandemic influenza, combating new diseases such as SARS; preparing for emergencies and responding quickly to minimize death and suffering; accelerating progress on the Millennium Development Goals (MDGs) by reducing maternal and child mortality, tackling the global epidemics of HIV/AIDS, tuberculosis and malaria, promoting safe drinking water and sanitation, promoting gender equality and increasing access to essential medicines; responding to non-communicable disease such as cardiovascular diseases, diabetes and cancers by reducing smoking, promoting a healthy diet and physical activity and reducing violence and road traffic crashes; promoting equity in health through strengthening health systems to reach everyone, particularly the most vulnerable people.

World Health Day is observed on 7 April every year. The 2017 theme for World Health Day was ‘Depressed? Let’s talk;’ the theme for 2016 was ‘Diabetes’. World No Tobacco Day is held on 31 May each year; International Day Against Drug Abuse on 26 June; World AIDS Day on 1 Dec.

The number of cancer cases is expected to increase by 37% between 2007 and 2030. The incidence of lung cancers in women and prostate cancers in men in the Western world is becoming far more prevalent. The incidence of other cancers is also rising rapidly, especially in developing countries. Heart disease and stroke, the leading causes of death in richer nations, will become more common in poorer countries. The number of people affected by diabetes has risen from 171m. in 2000 to 387m. in 2014, and has been forecast by the International Diabetes Federation to increase to 592m. by 2030. There is likely to be a huge rise in some mental and neurological disorders, especially dementia and particularly Alzheimer’s disease, which is projected to affect 34m. people by 2025. In 2013 an estimated 650m. people suffered from mental and neurological disorders. Dementia affected an estimated 36m. people in 2012 and some 50m. worldwide suffered from epilepsy.

These projected increases are reported to be owing to a combination of factors, not least population ageing and the rising prevalence of unhealthy lifestyles. Average life expectancy at birth globally was 71 years in 2014. It is around 50 years in a few low-income countries, well over 70 years in many countries and exceeds 80 years in some. In 2014 there were an estimated 589m. people. By 2050 that number is expected to rise to 955m., representing nearly 12% of the world’s population.

According to WHO, the top ten causes of death in the world in 2012 were: coronary (ischaemic) heart disease 7·4m. deaths; stroke, 6·7m.; chronic obstructive pulmonary disease, 3·1m.; lower respiratory infections, 3·1m.; trachea, bronchus and lung cancers, 1·6m.; HIV/AIDS, 1·5m. (down from a peak of 2·3m. in 2005); diarrhoeal diseases, 1·5m.; diabetes mellitus, 1·5m.; road injury, 1·3m.; hypertensive heart diseases, 1·1m. Tobacco kills nearly 6m. people each year. In total, its use is responsible for the death of almost one in ten adults worldwide.
In response, WHO has called for an intensified and sustained global campaign to encourage healthy lifestyles and attack the main risk factors responsible for many of these diseases: unhealthy diet, inadequate physical activity, smoking and obesity.

The WHO Framework Convention on Tobacco Control (WHO FCTC) was developed in response to the globalization of the tobacco epidemic, and is the first global health treaty negotiated under the auspices of the World Health Organization. The provisions in the Treaty require countries to ban tobacco advertising, sponsorship and promotion; establish new packaging and labelling of tobacco products with prominent health warnings; establish smoking bans in public places, increase price and tax on tobacco products; and strengthen legislation to clamp down on tobacco smuggling, among other measures.

Good progress has been made towards several MDGs. The number of children globally who died before their fifth birthday fell from 12.7m. in 1990 to 6.3m. in 2013. Women dying as a result of pregnancy or childbirth declined from 532,000 in 1990 to 303,000 in 2015. Instances of underweight children aged five or under in the developing world fell from 28% in 1990 to 17% in 2013. Around the world, new HIV infections declined by 38% between 2001 and 2013 while those dying from the disease fell by 43% between 2003 and 2015. Malaria deaths decreased by 48% between 2000 and 2015.

World Health Statistics 2016: Monitoring health for the Sustainable Development Goals compiles data from worldwide sources on health-related issues including access to health, life expectancy and death from main diseases. The report puts sources on health-related issues including access to health, compiles data from worldwide

43% between 2003 and 2015. Malaria deaths decreased by 48% between 2001 and 2013 while those dying from the disease fell by 43% between 2003 and 2015. Malaria deaths decreased by 48% between 2000 and 2015.

World Health Statistics 2016: Monitoring health for the Sustainable Development Goals compiles data from worldwide sources on health-related issues including access to health, life expectancy and death from main diseases. The report puts these results in perspective and promotes healthier lifestyles in accordance with the WHO Sustainable Development Goals agenda. Primarily it strives for universal health coverage and for health equality among and within countries by 2030.

Organization. The principal organs of WHO are the World Health Assembly, the Executive Board and the Secretariat. Each of the 194 member states has the right to be represented at the Assembly, which meets annually in Geneva. The 34-member Executive Board is composed of technically qualified health experts designated by as many member states as elected by the Assembly. The Secretariat consists of technical and administrative staff headed by a Director-General, who is appointed for not more than two five-year terms. Health activities in member countries are carried out through regional organizations which have been established in Africa (Brazzaville), South-East Asia (New Delhi), Europe (Copenhagen), Eastern Mediterranean (Cairo) and Western Pacific (Manila). The Pan American Sanitary Bureau in Washington serves as the regional office of WHO for the Americas. It is the oldest international health agency in the world and is the secretariat of the Pan American Health Organization (PAHO).

Finance. The total two-year budget for 2014–15 was US$4.0bn.

Current Leaders
Margaret Chan Fung Fu-chun

Position
Director-General

Introduction
Dr Margaret Chan was appointed Director-General of WHO on 9 Nov. 2006 to secure a scheduled five-year term from 4 Jan. 2007 to 30 June 2012. In May 2012 she was reappointed for a second term until the end of June 2017.

Early Life
Chan was born in 1947 in Hong Kong. She graduated in medicine from the University of Western Ontario, Canada in 1977, and joined the Hong Kong department of health as a medical officer in Dec. 1978. In 1985 she gained an MSc. in public health from the National University of Singapore. In June 1994 she became the health department’s first female director. Her nine-year tenure was marked by outbreaks of H5N1 avian influenza in 1997 and SARS in 2003.

In 2003 Chan joined WHO as director of the department for protection of the human environment. She was promoted to director of communicable diseases surveillance and response in June 2005 and also became the representative of the director-general for pandemic influenza. In Sept. that year she was appointed assistant director-general for communicable diseases. When Dr Lee Jong-wook died in May 2006, Chan was nominated by China to succeed him as Director-General.

Career in Office
Chan identified improvements in health of women and in Africa as key to her term. However, she courted early controversy when, in Feb. 2007, she was accused of favouring pharmaceutical companies over the sick in developing countries by humanitarian groups lobbying for cheaper generic drugs. Then in April she was criticized for her defence of WHO’s refusal to extend membership to Taiwan. In June 2007 new international health regulations obliged governments to report potential pandemics to Chan as WHO Director-General immediately. In June 2009 WHO declared a global swine flu pandemic. The outbreak, first detected in March, had seemingly peaked in many countries by the end of the year, but Chan warned against complacency in tracking the evolution of the virus. In Jan. 2011 Chan warned that the WHO was overextended and facing serious funding shortfalls, necessitating administrative, budgetary and programmatic reform. She said that the organization needed to redirect resources in a more targeted manner, avoiding wasteful duplication with other health financiers and concentrating on areas where it could make the most impact. The Ebola virus epidemic in West Africa in 2014–15, which claimed over 11,000 lives, further exposed weaknesses in the organization’s ability to respond to crises. In Oct. 2015 Chan welcomed the UN’s adoption the previous month of the 2030 Agenda for Sustainable Development aiming to ‘ensure healthy lives and promote well-being for all at all ages’. In Feb. 2016, in response to the rapid spread in much of Latin America of the mosquito-borne Zika virus that is thought to cause birth defects, WHO formally declared a public health emergency of international concern. The emergency was lifted in Nov. as WHO refocused its response to stopping the spread of the disease over the long term.

World Intellectual Property Organization (WIPO)

Origin. The World Intellectual Property Organization (WIPO) was established in 1967 following the conclusion of the Convention Establishing the World Intellectual Property Organization in Stockholm. It was given a mandate by its member states to promote the protection of intellectual property (IP) through co-operation among states and in collaboration with other international organizations. The WIPO Convention entered into force on 26 April 1970 and WIPO became a specialized agency of the United Nations in 1974.

World Health Organization (WHO)
Aims and Activities. WIPO administers 26 treaties that deal with different legal and administrative aspects of intellectual property, notably the Paris Convention for the Protection of Industrial Property, the Patent Cooperation Treaty and the Bern Convention for the Protection of Literary and Artistic Works. WIPO is dedicated to developing a balanced and accessible international intellectual property (IP) system that rewards creativity, stimulates innovation and contributes to economic development while safeguarding the public interest.

In Dec. 2008 WIPO member states adopted a new strategic framework for the Organization comprising nine strategic goals that are designed to enable WIPO to more effectively respond to an evolving technological, cultural and geo-economic environment. In addition to goals relating to the balanced evolution of the international normative framework of IP, to facilitating the use of IP for development and to the provision of premier global IP services, WIPO’s new goals include a focus on building respect for IP; on developing global IP infrastructure; on responsive communication; on becoming a world reference source for IP information; and on addressing IP in relation to global policy challenges such as climate change, public health and food security.

WIPO’s activities fall broadly into three clusters of activities, namely: the progressive development of international IP law; IP capacity-building programmes to support the efficient use of IP, particularly in developing countries; and services to industry that facilitate the process of obtaining IP rights in multiple countries. Also, alternative dispute resolution options for private parties are available through the WIPO Arbitration and Mediation Center.

Organization. As at Feb. 2017 WIPO had 189 member states. WIPO is unique among the family of UN organizations in that it is largely self-financing. The budget for the 2016–17 biennium was 707.0m. Swiss francs. Over 90% of the Organization’s budget comes from earnings derived from the services that WIPO provides to industry and the private sector. The remainder of the budget is made up mainly of revenue generated by WIPO’s Arbitration and Mediation Center, the sale of publications and contributions from member states.

World Meteorological Organization (WMO)

Origin. A 1947 (Washington) Conference of Directors of the International Meteorological Organization (est. 1873) adopted a Convention creating the World Meteorological Organization. The WMO Convention became effective on 23 March 1950 and WMO was formally established. It was recognized as a Specialized Agency of the UN in 1951.

Functions. (1) To facilitate worldwide co-operation in the establishment of networks of stations for the making of meteorological observations as well as hydrological and other geophysical observations related to meteorology, and to promote the establishment and maintenance of centres charged with the provision of meteorological and related services; (2) to promote the establishment and maintenance of systems for the rapid exchange of meteorological and related information; (3) to promote standardization of meteorological and related observations and ensure the uniform publication of observations and statistics; (4) to further the application of meteorology to aviation, shipping, water problems, agriculture and other human activities; (5) to promote activities in operational hydrology and to further close co-operation between meteorological and hydrological services; and (6) to encourage research and training in meteorology and, as appropriate, to assist in co-ordinating the international aspects of such research and training.

Organization. WMO has 185 member states and six member territories responsible for the operation of their own meteorological services. Congress, which is its supreme body, meets every four years to approve policy, programme and budget, and adopt regulations. The Executive Council meets at least once a year to prepare studies and recommendations for Congress, and supervises the implementation of Congress resolutions and regulations. It has 37 members, comprising the President and three Vice-Presidents, as well as the Presidents of the six Regional Associations (Africa, Asia, South America, North America, Central America and the Caribbean, South-West Pacific, Europe), whose task is to co-ordinate meteorological activity within their regions, and 27 members elected in their personal capacity. There are eight Technical Commissions composed of experts nominated by members of WMO, whose remit includes the following areas: basic systems, climatology, instruments and methods of observation, atmospheric sciences, aeronautical meteorology, agricultural meteorology, hydrology, oceanography and marine meteorology. A permanent Secretariat is maintained in Geneva. There are four regional offices for Africa, Asia and the South-West Pacific, the Americas and Europe. The proposed budget for 2012–15 was 276-0m. Swiss francs for regular resources plus 175-0m. Swiss francs for voluntary resources.

Headquarters: 7 bis, avenue de la Paix, Case Postale 2300, CH–1211 Geneva 2, Switzerland.

World Tourism Organization (UNWTO)

Origin. Established in 1925 in The Hague as the International Congress of Official Tourist Traffic Associations. Renamed the International Union for Official Tourism Organizations after the Second World War when it moved to Geneva, it was renamed the World Tourism Organization in 1975 and moved its headquarters to Madrid the following year.

The World Tourism Organization became an executing agency of the United Nations Development Programme in 1976 and in 1977 a formal co-operation agreement was signed with the UN itself. With a UN resolution on 23 Dec. 2003 the World Tourism Organization became a specialized agency of the United Nations.

Aims. The World Tourism Organization exists to help nations throughout the world maximize the positive impacts of tourism, such as job creation, new infrastructure and foreign exchange earnings, while at the same time minimizing negative environmental or social impacts.

Membership. The World Tourism Organization has three categories of membership: full membership which is open to all sovereign states; associate membership which is open to all territories not responsible for their external relations; and affiliate membership which comprises a wide range of organizations and companies working either directly in travel and tourism or in related sectors. In Feb. 2017 the World Tourism Organization had 157 full members, six associate members and more than 480 affiliate members.

Organization. The General Assembly meets every two years to approve the budget and programme of work and to debate topics
